**Post-Consumer Waste Recycling and Optimal Production** Enri Damanhuri,2012-05-23 This book deals with several aspects of waste material recycling. It is divided into three sections. The first section explains the roles of stakeholders, both informal and formal sectors, in post-consumer waste activities. It also discusses waste collection programs for recycling. The second section discusses the analysis tools for recycling system. The third section focuses on the recycling process and optimal production. I hope that this book will convey both the need and means for recycling and resource conservation activities to a wide readership, at both academician and professional level, and contribute to the creation of a sound material-cycle society.

**Advancing Technology and Educational Development through Blended Learning in Emerging Economies** Ololube, Nwachukwu Prince,2013-09-30 Blended learning continues to emerge as a more proactive and high quality method of teaching and learning. Yet as the academic landscape shifts towards technology-based efforts, the lack of economic support in developing countries has hindered its educational growth. Advancing Technology and Educational Development through Blended Learning in Emerging Economies provides an insight on blended learning approaches and its importance in the educational development of emerging economies. This book is a vital resource for researchers, academics, professionals, and students involved in the management and organizational development of technology use in educational settings.

**The Future of Accessibility in International Higher Education** Alphin Jr., Henry C.,Chan, Roy Y.,Lavine, Jennie,2017-05-17 Education is the foundation to almost all successful lives, and it is important that a high level of schooling be available on a global scale. Studying the trends in accessibility in education will allow educators to improve their own teaching techniques, as well as expand their influence to more remote areas in the world. The Future of Accessibility in International Higher Education is a comprehensive reference source for the latest scholarly material on emerging methods and trends in disseminating knowledge in university settings. Featuring extensive coverage on relevant topics such as e-learning, economic perspectives, and educational technology, this publication is ideally designed for educators, academics, students, and researchers interested in expanding their knowledge of global education.

**Saving the Future** Alex Otti,2016-06-15 Saving the Future is an urgent wake-up call to a new generation of leaders to rise to the historic challenge to save Nigeria and to retreat from the wasteful, destructive trajectory we have stumbled along

over the decades. It is filled with golden nuggets of insights from the world of business, high finance and economic science. It diagnoses Nigerias manifold national maladies as: corruption, waste, poor governance, failure of the rule of law, the infrastructure deficit, weak property rights and the poor business environment. The author demonstrates an uncommon understanding of world economics and the structural parameters of 21st century integrated digital industrial civilization. He strongly believes that if the right things are done to put the house in order, the future of Nigeria can still be saved.

**Accessibility and Diversity in Education: Breakthroughs in Research and Practice** Management Association, Information Resources,2019-12-06 Education is a necessary foundation for improving one's livelihood in today's society. However, traditional learning has often excluded or presented a challenge to students with visual, physical, or cognitive disabilities and can create learning gaps between students of various cultures. It is vital that learning opportunities are tailored to meet individual needs, regardless of individual disabilities, gender, race, or economic status in order to create more inclusive educational practices. *Accessibility and Diversity in Education: Breakthroughs in Research and Practice* examines emerging methods and trends for creating accessible and inclusive educational environments and examines the latest teaching strategies and methods for promoting learning for all students. It also addresses equal opportunity and diversity requirements in schools. Highlighting a range of topics such as open educational resources, student diversity, and inclusion barriers, this publication is an ideal reference source for educators, principals, administrators, provosts, deans, curriculum developers, instructional designers, school boards, higher education faculty, academicians, students, and researchers.

**Explicit Biology - A Revision Course (3rd Edition)** O. J. Olaoye,2014-05-01 The monograph *Explicit Biology: A Revision Course for UTME, POST-UTME and other related examinations* written by O.J. Olaoye is a complementary text to the various textbooks that have been written in the subject area. The book has five sections and twenty six chapters on all the biology topics. This book has become timely in view of the poor results that are being witnessed in the UTME examination especially in the sciences and mathematics, biology inclusive. These majorly are due to poor or inadequate access to good study materials. Each chapter has annotated topics followed by copious specimen questions on some past UTME and POST - UTME examination, for practice and emphasis. The topics in each chapter are adequately treated and with clarity. The illustrations are simple but effective. The author has done a lot of work and put in efforts to come out with a very readable and useful text. It is highly recommended to all the students aspiring to undertake the UTME and POST-UTME examination, in order to improve highly their chances of success. O.A. Sofola B.Sc, M.Sc, M.B.B.S (Lagos), Ph.D (Leeds), FAS (Nig.) Professor of physiology, College of Medicine, University of Lagos Former Vice Chancellor, OOU, Ago- Iwoye. Ogun State.

**Sustainable Transformation in African Higher Education** Felix Maringe,Emmanuel Ojo,2017-04-18 The book is a

must read for policy makers, academics, university administrators and post graduate research students in the broad field of education and in higher education studies in particular. The book brings together a wealth of information regarding the imperatives of transformation in Africa's higher education systems. Not only do some of the chapters provide critical discussion about the conceptualisation of transformation, the majority of the chapters reflect on empirical evidence for transformation in diverse fields of mathematics, science, gender, the training of doctoral students and the governance and management of universities. This central theme of sustainable change and reform runs across the chapters of the book. For students, the book provides exemplars of practical research in higher education. For scholars in higher education and policy makers, specific issues for reform are identified and discussed.

**Women of Owu** Femi Osofisan, 2006 This is an African retelling of Euripides: an unnervingly topical story of a people and a beloved city destroyed by the brutality of war. The play was first performed in Lagos in 2003 under the distinguished director Chuck Mike, and subsequently toured the UK.

**In Dependence** Sarah Ladipo Manyika, 2019 In the early sixties, Tayo Ajayi sails to England from Nigeria to take up a scholarship at Oxford University. There he discovers a whole generation high on visions of a new and better world. He meets Vanessa Richardson, the beautiful daughter of a former colonial officer. Their story, which spans four decades, is a bittersweet tale of a brave but doomed affair and the universal desire to fall truly, madly and deeply in love. A lyrical and moving story of unfulfilled love fraught with the weight of history, race and geography and intertwined with questions of belonging, aging, faith and family secrets. In Dependence explores the complexities of contemporary Africa, its Diaspora and its interdependence with the rest of the world.

**Customer Service Management in Africa** Robert Hinson, Ogechi Adeola, Terri Lituchy, Abednego Amartey, 2020-05-07 Customer Service Management in Africa: A Strategic and Operational Perspective (978-0-367-14337-4, K410515) Customer Service is Changing! The message of 34 authors featured in Customer Service Management in Africa: A Strategic and Operational Perspective is clear: Today's consumers are no longer 'passive audiences' but 'active players' that engage with businesses at each stage of product or service design and delivery systems. Consumer demands and expectations are also increasingly being dictated by changing personal preferences, enhanced access to information and expanding digital reality. The customer service principles - strategic and operational - advocated by these authors are universal, but particularly compelling as they apply to Africa's unique and dynamic operating environment. In recognition of the importance of excellent customer service, this comprehensive and well-timed book provides an essential guide on the increasing role of the customer to business success. This book discusses the management and delivery of customer service under seven broad themes: Customer Service as Shared Value, Customer Service Strategy, Customer Service Systems, Customer Service Style, Customer Service Culture, Customer Service Skills and Customer Experience - Advancing Customer Service in Africa.

Central questions posed and addressed include: What is the new definition of customer service management? How should organisations position themselves to create value for customers and stakeholders? How should employees project themselves to align with customer service promises made by their organisations? Overall, this book provides strategic and operational insights into effective customer service management in Africa. The customer service management concepts, roles and practices outlined, particularly as they apply to the African context, make it an important addition to scholars' or practitioners' reference works.

Sustainability of Higher Education: A Global Perspective (Penerbit USM) Rosni Bakar, Aziah Ismail, As the higher education landscape is ever evolving, sustainability continues to be an essential concern. This publication covers existing sustainability matters ranging from internationalisation and Massive Open Online Courses (MOOCs) to university social responsibility. The main contribution of this book is to reveal the efforts and issues of internationalisation of higher education for sustainable tomorrow from global perspectives. Since the institutions educate current and future decision makers, they play a key role in building more sustainable entities and creating new paradigms. The articles are written by a number of experts with various backgrounds in higher education that give global perspective on the issues of sustainability. Specific country studies give a timely review on the substantial growth of higher education institutions in certain parts of the world. This publication provides invaluable knowledge and skills to guide the reader in designing appropriate frameworks in critical problem solving of current higher education issues.

The Hermeneutical Spiral Grant R. Osborne, 2010-01-25 In this revised and expanded edition, Grant Osborne provides seminary students and working pastors with the full set of tools they need to travel the hermeneutical spiral—moving from sound exegesis to the development of biblical and systematic theologies and to the preparation of sound, biblical sermons.

Exploring Unequal Achievement in the Schools George Ansalone, 2009-03-16 One of the most disturbing problems in American education today is the unequal achievement of children in schools. Few problems have sparked greater concern than the issue of why students from different social origins differ so significantly in their academic performance. This book explores the role played by families and schools in this troubling problem. It employs a social constructionist approach in considering how ascribed characteristics (race, gender, and class) intersect with the daily interactions of teachers and students in classrooms and with the educational practices and structures within schools (tracking, testing, and teacher expectations) to play an exacting role in the construction of success or failure. It suggests that the new student identity that

begins to emerge as a result of these processes provides a self-fulfilling prophecy of expectation and belief, which defines how students see themselves as learners and achievers. Through these practices, schooling becomes a crucial factor in the social construction of academic success. The author's final conclusion is inescapable: unequal achievement in school is largely a social construction. But it is a social construction facilitated both by student attributes including gender, race, and class and by the educational structures and policies some schools employ. Because of this undeniable fact, parents, educational practitioners, and policy makers must continue to investigate social policies and practices relative to student abilities and make every effort to understand how they may be related to achievement. Informed by research, they must endeavor to see this power inherent in schooling and the need to effect change.

**Psychology of Space Exploration: Contemporary Research in Historical Perspective** Douglas A. Vakoch, National Aeronautics and Space Administration, 2012-01-27 Through essays on topics including survival in extreme environments and the multicultural dimensions of exploration, readers will gain an understanding of the psychological challenges that have faced the space program since its earliest days. An engaging read for those interested in space, history, and psychology alike, this is a highly relevant read as we stand poised on the edge of a new era of spaceflight. Each essay also explicitly addresses the history of the psychology of space exploration.

**Chemical Engineering Design** Gavin Towler, Ray Sinnott, 2012-01-25 Chemical Engineering Design, Second Edition, deals with the application of chemical engineering principles to the design of chemical processes and equipment. Revised throughout, this edition has been specifically developed for the U.S. market. It provides the latest US codes and standards, including API, ASME and ISA design codes and ANSI standards. It contains new discussions of conceptual plant design, flowsheet development, and revamp design; extended coverage of capital cost estimation, process costing, and economics; and new chapters on equipment selection, reactor design, and solids handling processes. A rigorous pedagogy assists learning, with detailed worked examples, end of chapter exercises, plus supporting data, and Excel spreadsheet calculations, plus over 150 Patent References for downloading from the companion website. Extensive instructor resources, including 1170 lecture slides and a fully worked solutions manual are available to adopting instructors. This text is designed for chemical and biochemical engineering students (senior undergraduate year, plus appropriate for capstone design courses where taken, plus graduates) and lecturers/tutors, and professionals in industry (chemical process, biochemical, pharmaceutical, petrochemical sectors). New to this edition: Revised organization into Part I: Process Design, and Part II: Plant Design. The broad themes of Part I are flowsheet development, economic analysis, safety and environmental impact and optimization. Part II contains chapters on equipment design and selection that can be used as supplements to a lecture course or as essential references for students or practicing engineers working on design projects. New discussion of conceptual plant design, flowsheet development and revamp design Significantly increased coverage of capital cost

estimation, process costing and economics New chapters on equipment selection, reactor design and solids handling processes New sections on fermentation, adsorption, membrane separations, ion exchange and chromatography Increased coverage of batch processing, food, pharmaceutical and biological processes All equipment chapters in Part II revised and updated with current information Updated throughout for latest US codes and standards, including API, ASME and ISA design codes and ANSI standards Additional worked examples and homework problems The most complete and up to date coverage of equipment selection 108 realistic commercial design projects from diverse industries A rigorous pedagogy assists learning, with detailed worked examples, end of chapter exercises, plus supporting data and Excel spreadsheet calculations plus over 150 Patent References, for downloading from the companion website Extensive instructor resources: 1170 lecture slides plus fully worked solutions manual available to adopting instructors
