Ivory Basement Leadership Joan Eveline, 2004 Many people fear that the ivory tower is crumbling. Of urgent concern are deteriorating standards, fewer jobs, waning professional prestige and new layers of inequity. Leadership in the tower is easy to spot. It is hierarchical, detached and mostly male. In this highly readable book, Joan Eveline turns her acute gaze to the ivory basement, where the corridors, departments, laboratories and offices are peopled. There she observes a greedy organization cannibalizing the efforts, energy and care of the basement's workers, most of whom are women. Voices from the basement - of the University of Western Australia, but it could be any university - speak about the devaluing of their work. Eveline detects a new linkage, through shared experience, of administrative staff, research assistants and the lower order of academics, who increasingly are casual workers. And she discerns a courageous and almost invisible exercise of leadership. This post-heroic leadership values personal relationship, loyalty and diversity. It is creative, flexible and, above all, collaborative. This book will hearten those dismayed by the restructuring pandemic. For ivory basement workers have, in adversity, forged a leadership model that might well be mobilized to revive Australia's ailing universities.

Better Buildings Richard Partington, Simon Bradbury, 2017 Despite an increasing demand for energy-efficient design, it is generally accepted that architects rarely return to their creations to ensure that they are performing as intended: to talk to

users, observe how the buildings work and have been adapted, and whether the environments created are enjoyable places to be in. While most building professionals recognise the value of follow-through and involvement after handover, there are many perceived barriers to undertaking this work in practice. This book provides a bold vision for how some of these perceived barriers can be overcome. *Better Buildings* provides architects with the inspiration and tools they need to deliver truly sustainable design. Through essays and illustrated case studies, this essential book explores how sustainable buildings are occupied and work and sheds light on the methods used to observe this. It illustrates that in observing building performance in-use, sustainable architecture has moved beyond simply creating beautiful spaces, to deliver on the low-energy performances promised (4e de couverture).

Academic Governance in the Contemporary University Julie Rowlands, 2016-10-12 This book addresses three central questions in contemporary university governance: (1) How and why has academic governance in Anglophone nations changed in recent years and what impact have these changes had on current practices? (2) How do power relations within universities affect decisions about teaching and research and what are the implications for academic voices? (3) How can those involved in university governance and management improve academic governance processes and outcomes and why is it important that they do so? The book explores these issues in clear, concise and accessible language that will appeal to higher education researchers and governance practitioners alike. It draws on extensive empirical data from key national systems in the Anglophone world but goes beyond the simply descriptive to analyse and explain.

Student Retention and Success in Higher Education Mahsood Shah, Sally Kift, Liz Thomas, 2021-09-15 This book draws together international research to assess the quality of successful efforts to retain students. The editors and contributors unite diverse global research from countries who have led student retention and success projects at national, institutional, faculty or program level with positive outcomes. The book is underpinned by the philosophy that a more diverse student population requires higher education institutions to fundamentally change, in order to facilitate the success of all students. All of humanity, its economies and societies, are being pummelled by waves of pandemic-induced crises in tandem with globalisation and demographic shifts. Ultimately, this book acts as a clarion to higher education institutions to better support and retain their students, in order to create a more stable learning environment.

Brings together the experience of academics and administrators in higher education institutions Examines international experience on the extent to which external quality audits have improved quality assurance at national, institutional and faculty levels Gives perspective from a variety of higher education institutions

Philosophy and the New Physics Jonathan H Powers, 2023-07-14 First Published in 1982 *Philosophy and the New Physics* is a compact and yet remarkably rich excursion through the history of physics from Newtonian mechanics to quantum physics. The theory of relativity, quantum mechanics and ideas about the 'fundamental constituents' of matter have attracted a great deal of philosophical comment. Indeed, the originators of some of these theories thought they were solving philosophical problems as well as scientific ones. Classical physics is often portrayed as epitomizing 'mechanistic materialism', and the revolution in modern physics is variously claimed to vindicate 'logical positivism', 'operationalism', 'organicism', 'dialectical materialism' and 'Buddhist metaphysics'. In this book Jonathan Powers criticizes all of these claims and argues that such varied and conflicting interpretations are possible because of ineradicable elements of conventionality in scientific theories. This is a must read for scholars and researchers of philosophy of science and philosophy in general.
