Global Corruption Report: Sport Transparency International, 2016-02-05 Sport is a global phenomenon engaging billions of people and generating annual revenues of more than US\$ 145 billion. Problems in the governance of sports organisations, fixing of matches and staging of major sporting events have spurred action on many fronts. Yet attempts to stop corruption in sport are still at an early stage. The Global Corruption Report (GCR) on sport is the most comprehensive analysis of sports corruption to date. It consists of more than 60 contributions from leading experts in the fields of corruption and sport, from sports organisations, governments, multilateral institutions, sponsors, athletes, supporters, academia and the wider anti-corruption movement. This GCR provides essential analysis for understanding the corruption risks in sport, focusing on sports governance, the business of sport, planning of major events, and match-fixing. It highlights the significant work that has already been done and presents new approaches to strengthening integrity in sport. In addition to measuring transparency and accountability, the GCR gives priority to participation, from sponsors to athletes to supporters an essential to restoring trust in sport.

Owning the Olympics Monroe Price, Daniel Dayan, 2009-12-10 A major contribution to the study of global events in times of global media. Owning the Olympics tests the possibilities and limits of the concept of 'media events' by analyzing the mega-event of the information age: the Beijing Olympics. . . . A good read from cover to cover. —Guobin Yang, Associate

Professor, Asian/Middle Eastern Cultures & Sociology, Barnard College, Columbia University From the moment they were announced, the Beijing Games were a major media event and the focus of intense scrutiny and speculation. In contrast to earlier such events, however, the Beijing Games are also unfolding in a newly volatile global media environment that is no longer monopolized by broadcast media. The dramatic expansion of media outlets and the growth of mobile communications technology have changed the nature of media events, making it significantly more difficult to regulate them or control their meaning. This volatility is reflected in the multiple, well-publicized controversies characterizing the run-up to Beijing 2008. According to many Western commentators, the People's Republic of China seized the Olympics as an opportunity to reinvent itself as the New China---a global leader in economics, technology, and environmental issues, with an improving human-rights record. But China's maneuverings have also been hotly contested by diverse global voices, including prominent human-rights advocates, all seeking to displace the official story of the Games. Bringing together a distinguished group of scholars from Chinese studies, human rights, media studies, law, and other fields, *Owning the Olympics* reveals how multiple entities--including the Chinese Communist Party itself---seek to influence and control the narratives through which the Beijing Games will be understood. digitalculturebooks is an imprint of the University of Michigan Press and the Scholarly Publishing Office of the University of Michigan Library dedicated to publishing innovative and accessible work exploring new media and their impact on society, culture, and scholarly communication. THE SECOND REPORT ON THE STATE OF THE WORLD'S ANIMAL GENETIC RESOURCES FOR FOOD AND AGRICULTURE Food and Agriculture Organization of the United Nations,2018-06-06 Animal genetic resource diversity underpins the supply livestock products and services across a wide range of production environments. It promotes resilience and serves as a basis for adapting livestock management to changing conditions. It is vital to livelihoods of many of the world's poor people. It can contribute to the delivery of ecosystem services such as landscape management and the maintenance of wildlife habitats. However, it is often undervalued, underused and under threat. This report updates the global assessment provided in the first report on The State of the World's Animal Genetic Resources for Food and Agriculture, published in 2007. It focuses particularly on changes that have occurred during the period since the first report was published. It serves as a basis for a review, and potential update, of the Global Plan of Action for Animal Genetic Resources, which since 2007 has provided an agreed international framework for the management of livestock biodiversity.

Drawing on 129 country reports, it presents an analysis of the state of livestock diversity, the influence of livestock-sector trends on the management of animal genetic resources, the state of capacity to manage animal genetic resources, including legal and policy frameworks, and the state of the art in tools and methods for characterization, valuation, use, development and conservation.

Natural Resources and Violent Conflict Ian Bannon,Paul Collier,2003-01-01 Research carried out by the World Bank on the root causes of conflict and civil war finds that a developing country's economic dependence on natural resources or other primary commodities is strongly associated with the risk level for violent conflict. This book brings together a collection of reports and case studies that explore what the international community in particular can do to reduce this risk.; The text explains the links between natural resources and conflict and examines the impact of resource dependence on economic performance, governance, secessionist movements and rebel financing. It then explores avenues for international action - from financial and resource reporting procedures and policy recommendations to commodity tracking systems and enforcement instruments, including sanctions, certification requirements, aid conditionality, legislative and judicial instruments.

Unleashing the potential Marope, P.T.M.,Chakroun, B.,Holmes, K.P.,2015-05-26 UNESCO has recently published the third volume of its Education on the Move series, a series dedicated to the analysis of key trends in education with the hope of inspiring dialogue among policy makers, educators and other key stakeholders on the challenges of education for tomorrow. The latest publication, entitled Unleashing the Potential: Transforming Technical and Vocational Education and Training is focused entirely on issues related to technical and vocational education and training (TVET). It takes stock of the

steadily increasing demands and expectations on TVET systems around the globe and presents recent policy trends in the field of TVET. In their analysis, the authors provide insights into what it takes to unleash the potential of TVET systems around the world. They propose an integrated analytical approach that takes into consideration such factors as economic growth, social equity and issues related to sustainability so that TVET can contribute more effectively to contemporary policy issues such as youth unemployment, gender disparities and climate change. Overall, the book calls for a transformation of TVET systems to enable them to respond to the demands of their contexts. This transformation should enable TVET systems to acquire agility to stay current and responsive to the rapidly changing demands of the twenty-first century.--Publisher's website.
