Authentic School Science Wolff-Michael Roth, 2012-12-06 According to John Dewey, Seymour Papert, Donald Schon, and Allan Collins, school activities, to be authentic, need to share key features with those worlds about which they teach. This book documents learning and teaching in open-inquiry learning environments, designed with the precepts of these educational thinkers in mind. The book is thus a first-hand report of knowing and learning by individuals and groups in complex open-inquiry learning environments in science. As such, it contributes to the emerging literature in this field. Secondly, it exemplifies research methods for studying such complex learning environments. The reader is thus encouraged

not only to take the research findings as such, but to reflect on the process of arriving at these findings. Finally, the book is also an example of knowledge constructed by a teacher-researcher, and thus a model for teacher-researcher activity.

Digital adaptation kit for HIV: operational requirements for implementing WHO recommendations in digital systems

World Health Organization,2023-12-21 To ensure that countries can effectively benefit from digital health investments, "digital adaptation kits" (DAKs) are designed to facilitate the accurate reflection of WHO's clinical, public health and data use guidelines in the digital systems that countries are adopting. DAKs are operational, software-neutral, standardized documentations that distil clinical, public health and data use guidance into a format that can be transparently incorporated into digital systems. For this particular DAK, the operational requirements are based on systems that provide the functionalities of digital tracking and decision support (DTDS) and include components such as personas, workflows, core data elements, decision-support algorithms, scheduling logic and reporting indicators. Web annexes provide certain components in additional detail including: data dictionary (Web Annex A), decision-support logic (Web Annex B), indicator

definitions (Web Annex C), and functional and non-functional requirements (Web Annex D). Data elements within the DAK (Web Annex A) are mapped to standards-based terminology, such as the International Classification of Diseases (ICD), to facilitate interoperability. This DAK focuses on providing the content requirements for a DTDS system for HIV care used by health workers in primary health care settings. It also includes cross-cutting elements focused on the client, such as self-care interventions.
