Animals in the Third Reich Boria Sax,2000-01-01 This is the first book to explore the paradox of the Nazi cult of animals and the obsession with the annihilation of biologically inferior people. *Animals in the Third Reich* begins by contrasting Jewish, Christian, and polytheistic traditions relating to animals in Germany, and examines the ways that the Nazi movement adopted, altered, challenged, or exploited these traditions. This discussion covers several perspectives on the treatment of animals, including those of zoologists, veterinarians, novelists, painters, sculptors, and the general public. Adopting and exploiting such traditions, the Nazis elaborated their own symbolic system of relating certain animals to supporters and antagonists of the movement - Aryan wolves and horses; Jewish pigs and apes.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Encyclopedia of Traditional British Rural Sports Tony Collins,John Martin,Wray Vamplew,2005 Providing a social, economic and political study of field sports and those other activities and customs labelled as rural sports, from the earliest of times to the present day in all of the United Kingdom and Ireland. This book brings together several distinct types of traditional rural sports with particular emphasis on the social history and 'traditional' aspects. It contains several hundred entries focusing on individual sports and others providing analysis of key concepts, themes and terminologies. The *Encyclopedia of Traditional British Rural Sports* is an invaluable reference that provides students, scholars and sports enthusiasts with a focussed and authoritative source of information on the history and culture of rural sport in Britain.

A Mathematical Medley George Szpiro,2010 Describes in layman's terms mathematical problems that have recently been

solved (or thought to have been solved), research that has been published in scientific journals, and mathematical observations about contemporary life. Anecdotal stories about the lives of mathematicians and stories about famous old problems are interspersed among other vignettes.

Sport Richard D. Mandell,1999 Today's calendar is set in the minds of many people by the World Series, Wimbledon, the Super Bowl, and the World Cup, rather than by months and days. Sport must mean something. What? Richard Mandell's *Sport: A Cultural History* shows that sport has always vividly illustrated and reinforced the existing social and moral order. Considering that much of modern sport has evolved in England and America, it is remarkable that so few comprehensive serious studies of sport have appeared in English. This fascinatingly written, generously illustrated volume fills a gap in the literature of world cultural history. The author deals here not only with sport in the classical world where the Olympics were born, but also with sport in early industrial England, China, Japan, and modern America.

Studies in the Lancelot Legend Ernst Soudek,1972

British Sport: Local histories Richard William Cox,2003 Volume three of a bibliography documenting all that has been written in the English language on the history of sport and physical education in Britain. It lists all secondary source material including reference works, in a classified order to meet the needs of the sports historian.

Early British Swimming, 55 BC-AD 1719 Nicholas Orme,1983 In 1857 Everard Digby published the first scientific treatise on swimming - and one of the first on any modern sport. Nicholas Orme rehabilitates Digby as a pioneer of the history of sport. The book opens with a history of swimming in Britain from the Romans to the sixteenth century, which is followed by an account of Digby's life and work.

Numbers Rule George Szpiro,2020-11-03 The author takes the general reader on a tour of the mathematical puzzles and paradoxes inherent in voting systems, such as the Alabama Paradox, in which an increase in the number of seats in the Congress could actually lead to a reduced number of representatives for a state, and the Condorcet Paradox, which demonstrates that the winner of elections featuring more than two candidates does not necessarily reflect majority preferences. Szpiro takes a roughly chronological approach to the topic, traveling from ancient Greece to the present and, in addition to offering explanations of the various mathematical conundrums of elections and voting, also offers biographical details on the mathematicians and other thinkers who thought about them, including Plato, Pliny the Younger, Pierre Simon Laplace, Thomas Jefferson, John von Neumann, and Kenneth Arrow.

A History of African Higher Education from Antiquity to the Present Y. G-M Lulat, 2005-08-30 Until recently, Eurocentrist history professors taught that it was the Europeans who brought higher education to the African continent. While the Europeans have indeed influenced African education in recent times, there is some vital information that most history books leave out: for centuries before the arrival of the Europeans, the vast and advanced native African civilizations already had sophisticated universities and other institutions of higher education to boast about. This book is an attempt to fill the chasm in today's literature regarding this topic. It will be of interest to those researching the accurate, non-Euro-biased history of Africa.

Quarrying in Antiquity John Bryan Ward-Perkins, 1972 A wide survey over four millennia is possible for quarrying tools and techniques because of their simplicity and long-lived traditions. The chief contribution of the Romans was their organisation of the stone trade by mass production, standardisation and long-distance transport. Indeed, in post-Roman Europe, especially in Britain, it was the excellence of Roman building stone which allowed so much subsequent 'quarrying' in the buildings themselves. One exception in Saxon times was the quarry for Bradford-on-Avon's church. With the 12th-century spurt in church building activity, however, natural stone quarries once more became common and distribution methods familiar to the Roman world re-emerged. - COPAC.

Later Roman Egypt Roger S. Bagnall, 2003 Egypt, with its ever-growing wealth of evidence from the papyri, has in recent decades been one of the liveliest areas of scholarship on the later Roman Empire. This volume collects two dozen articles on the social, economic, and administrative history of Egypt by Roger Bagnall, whose book 'Egypt in Late Antiquity' has helped to bring this region and this evidence into the mainstream of historical debate. In these studies some of the main themes of his work are visible, in particular attempts to explore the possibilities for quantifying not only questions like the burden of taxation or the distribution of land-ownership, but more tantalizing and controversial matters like the rate at which the population of Egypt was Christianized.

The Healthy Body and Victorian Culture Bruce Haley, 1978 Health obsessed the Victorians. The quest for health guided Victorian living habits, shaped educational goals, and sanctioned a mania for athletic sports. As both metaphor and ideal, it influenced psychology, religion, moral philosophy; it affected the writing of history as well as the criticism of literature. Here is a wide-ranging and ably written exploration of this fascinating aspect of Victorian ideas. Bruce Haley looks at developments in personal and public health, and at theories about the relation between medical and psychological disorders. He examines influential conceptions of the healthy man: Carlyle's healthy hero, Spencer's biologically perfect man, Newman's gentleman-Christian, Kingsley's muscular Christian. He describes the development of sports and physical training

in nineteenth-century England and their importance in schools and universities. He traces the concept of healthy body and healthy mind in boy's fiction (such as Tom Brown's School Days), self-help literature, and the widely read novels of George Eliot, Wilkie Collins, George Meredith, and Charles Kingsley. All these strands of social history, literature, and philosophy are woven together into a seamless whole.
