*Desert Plants* Kishan Gopal Ramawat, 2009-12-16 Deserts appear very fascinating during our short visits. However, the lives of plants and animals are very difficult under the harsh climatic conditions of high temperature and scant water supply in deserts, sometimes associated with high concentrations of salt. The editor of this book was born and brought up in the Great Indian Desert, and has spent much of his life studying the growth and metabolism of desert plants. It is very charming on a cool summer evening to sit at the top of a sand dune listening only to blowing air and nothing else. It has been my dream to prepare a volume on desert plants encompassing various aspects of desert plant biology. In this book, I have tried to present functional and useful aspects of the vegetation resources of deserts along with scientific input aimed at understanding and improving the utility of these plants. The scant vegetation of deserts supports animal life and provides many useful medicines, timber and fuel wood for humans. Therefore, there are chapters devoted to medicinal plants (Chap. 1), halophytes (Chaps. 13, 14), and fruit plants (Chaps. 17, 20). Desert plants have a unique reproductive biology (Chaps. 9-11), well-adapted eco-physiological and anatomical characteristics (Chap. 7), and specialised metabolism and survival abilities. These plants are difficult to propagate and pose many problems to researchers developing biological approaches for their amelioration (Chaps. 18-20).

Swimming Across Andrew Grove, 2019-08-09 Elegant and concise, this childhood memoir of Andy Grove, one of the pioneers of Silicon Valley, begins in Budapest, Hungary where the author was born into a secular Jewish family in 1936. As a small child, Andy Grove was told, "Jesus Christ was killed by the Jews, and because of that, all of the Jews will be thrown into the Danube." Grove's school years were marked by such anti-semitism and interrupted first by the Nazi occupation and then by the post-war Communist regime. He was a good student who excelled at chemistry which he was studying at the University of Budapest when the Hungarian uprising of 1956 persuaded him to "swim across" the border and emigrate to the West. Grove provides an interesting sketch of a boy's coming of age in a deeply dangerous 20th century Budapest under the control of Nazis and then Communists and concludes the memoir with an account of his escape and eventual resumption of his studies at the City College of New York. "Haunting and inspirational. It should be required reading in schools." — Tom Brokaw "A poignant memoir... a moving reminder of the meaning of America and the grit and courage of a remarkable young man who became one of America's phenomenal success stories." — Henry Kissinger "This honest and riveting account gives

a fascinating insight into the man who wrote *Only the Paranoid Survive*.” — George Soros “Andy Grove is a tremendous role model, and his book sheds light on his amazing journey. I would choose him as my doubles partner any day!” — Monica Seles “Combines a unique and often harrowing personal experience with the virtues of fiction at its most engrossing — vivid scenes, sharply delineated characters, and an utterly compelling narrative... a wonderful reading experience.” — Richard North Patterson “A poignant tale leading to human courage and hope.” — Elie Wiesel “Grove, the founder and chairman of Intel Corporation, does not whine about his hardships. Instead he recalls ordinary events and matter-of-factly juxtaposes these against the turmoil of midcentury Hungary, creating a subtle though compelling commentary on the power to endure.” — Diane Scharper, *The New York Times* “Swimming Across tells the childhood stories [Grove] has guarded since first entering the public eye four decades ago... [It] is driven not by executives battling for money and power, but the experiences — some mundane, some extraordinary — of a nonobservant Jewish boy growing up in Hungary through a fascist regime, a Nazi invasion and a Soviet occupation.” — Chris Gaither, *The New York Times* “The intelligence, dedication and ingenuity that earned him fame and fortune (he was *Time*’s Man of the Year in 1997) are evident early on... Grove’s story stands smartly amid inspirational literature by self-made Americans” — *Publishers Weekly* “A tight, simply told, extremely intimate memoir... a polished, solid portrait of a particular time and place.” — *Kirkus* “[A] moving and inspiring memoir... Grove’s account of life in Hungary in the 1950s is a vivid picture of a tumultuous period in world history.” — *Booklist*

*Electrode Materials for Energy Storage and Conversion* Mesfin A. Kebede, Fabian I. Ezema, 2021-11-17 This book provides a comprehensive overview of the latest developments and materials used in electrochemical energy storage and conversion devices, including lithium-ion batteries, sodium-ion batteries, zinc-ion batteries, supercapacitors and conversion materials for solar and fuel cells. Chapters introduce the technologies behind each material, in addition to the fundamental principles of the devices, and their wider impact and contribution to the field. This book will be an ideal reference for researchers and individuals working in industries based on energy storage and conversion technologies across physics, chemistry and engineering. FEATURES Edited by established authorities, with chapter contributions from subject-area specialists Provides a comprehensive review of the field Up to date with the latest developments and research Editors Dr. Mesfin A. Kebede obtained his PhD in Metallurgical Engineering from Inha University, South Korea. He is now a principal research scientist at Energy Centre of Council for Scientific and Industrial Research (CSIR), South Africa. He was previously an assistant professor in the Department of Applied Physics and Materials Science at Hawassa University, Ethiopia. His extensive research experience covers the use of electrode materials for energy storage and energy conversion. Prof. Fabian I. Ezema is a professor at the University of Nigeria, Nsukka. He obtained his PhD in Physics and Astronomy from University of Nigeria, Nsukka. His research focuses on several areas of materials science with an emphasis on energy applications, specifically electrode materials for energy conversion and storage.

Bounded Rationality Sanjit Dhami, Cass R. Sunstein, 2022-07-12 Two leaders in the field explore the foundations of bounded rationality and its effects on choices by individuals, firms, and the government. Bounded rationality recognizes that human behavior departs from the perfect rationality assumed by neoclassical economics. In this book, Sanjit Dhami and Cass R. Sunstein explore the foundations of bounded rationality and consider the implications of this approach for public policy and law, in particular for questions about choice, welfare, and freedom. The authors, both recognized as experts in the field, cover a wide range of empirical findings and assess theoretical work that attempts to explain those findings. Their presentation is comprehensive, coherent, and lucid, with even the most technical material explained accessibly. They not only offer observations and commentary on the existing literature but also explore new insights, ideas, and connections. After examining the traditional neoclassical framework, which they refer to as the Bayesian rationality approach (BRA), and its empirical issues, Dhami and Sunstein offer a detailed account of bounded rationality and how it can be incorporated into the social and behavioral sciences. They also discuss a set of models of heuristics-based choice and the philosophical foundations of behavioral economics. Finally, they examine libertarian paternalism and its strategies of “nudges.”

**Independence-Friendly Logic** Allen L. Mann, Gabriel Sandu, Merlijn Sevenster, 2011-05-05 Bringing together over twenty years of research, this book gives a complete overview of independence-friendly logic, an exciting logical formalism at the interface of logic and game theory. It is suitable for graduate students and advanced undergraduates who have taken a course on first-order logic.

**Corporate Law Stories** J. Mark Ramseyer, 2009 Using 11 pivotal cases that have shaped the evolution of corporate law, internationally renowned scholars explore the people behind the disputes and the forces that led the judges to decide the cases the way they did. From *Meinhard v. Salmon* to *Paramount v. QVC*, they unravel the logic (and, often, apparent illogic) of the opinions. Simultaneously amusing and clarifying, the resulting chapters make sense of cases that have puzzled students and scholars for decades.

Materials Witold Brostow, Haley E. Hagg Lobland, 2016-10-10 Presents a fully interdisciplinary approach with a stronger emphasis on polymers and composites than traditional materials books. Materials science and engineering is an interdisciplinary field involving the properties of matter and its applications to various areas of science and engineering. Polymer materials are often mixed with inorganic materials to enhance their mechanical, electrical, thermal, and physical properties. *Materials: Introduction and Applications* addresses a gap in the existing textbooks on materials science. This book focuses on three Units. The first, Foundations, includes basic materials topics from Intermolecular Forces and Thermodynamics and Phase Diagrams to Crystalline and Non-Crystalline Structures. The second Units, Materials, goes into the details of many materials including Metals, Ceramics, Organic Raw Materials, Polymers, Composites, Biomaterials, and Liquid Crystals and Smart Materials. The third and final unit details Behavior and Properties including Rheological,

Mechanical, Thermophysical, Color and Optical, Electrical and Dielectric, Magnetic, Surface Behavior and Tribology, Materials, Environment and Sustainability, and Testing of Materials. *Materials: Introduction and Applications* features: Basic and advanced Materials concepts Interdisciplinary information that is otherwise scattered consolidated into one work Links to everyday life application like electronics, airplanes, and dental materials Certain topics to be discussed in this textbook are more advanced. These will be presented in shaded gray boxes providing a two-level approach. Depending on whether you are a student of Mechanical Engineering, Electrical Engineering, Engineering Technology, MSE, Chemistry, Physics, etc., you can decide for yourself whether a topic presented on a more advanced level is not important for you—or else essential for you given your professional profile Witold Brostow is Regents Professor of Materials Science and Engineering at the University of North Texas. He is President of the International Council on Materials Education and President of the Scientific Committee of the POLYCHAR World Forum on Advanced Material (42 member countries). He has three honorary doctorates and is a Member of the European Academy of Sciences, Member of the National Academy of Sciences of Mexico, Foreign Member of the National Academy of Engineering of Georgia in Tbilisi and Fellow of the Royal Society of Chemistry in London. His publications have been cited more than 7200 times. Haley Hagg Lobland is the Associate Director of LAPOM at the University of North Texas. She is a Member of the POLYCHAR Scientific Committee. She has received awards for her research presented at conferences in: Buzios, Rio de Janeiro, Brazil; NIST, Frederick, Maryland; Rouen, France; and Lviv, Ukraine. She has lectured in a number of countries including Poland and Spain. Her publications include joint ones with colleagues in Egypt, Georgia, Germany, India, Israel, Mexico, Poland, Turkey and United Kingdom.

*A Model of Growth Through Creative Destruction* Philippe Aghion, Peter Howitt, 1990 This paper develops a model based on Schumpeter's process of creative destruction. It departs from existing models of endogenous growth in emphasizing obsolescence of old technologies induced by the accumulation of knowledge and the resulting process or industrial innovations. This has both positive and normative implications for growth. In positive terms, the prospect of a high level of research in the future can deter research today by threatening the fruits of that research with rapid obsolescence. In normative terms, obsolescence creates a negative externality from innovations, and hence a tendency for laissez-faire economies to generate too many innovations, i.e too much growth. This business-stealing effect is partly compensated by the fact that innovations tend to be too small under laissez-faire. The model possesses a unique balanced growth equilibrium in which the log of GNP follows a random walk with drift. The size of the drift is the average growth rate of the economy and it is endogenous to the model ; in particular it depends on the size and likelihood of innovations resulting from research and also on the degree of market power available to an innovator.

*On Tolerance* Frank Furedi, 2013-02-14 Outwardly, we live in an era that appears more open-minded, non-judgemental and tolerant than in any time in human history. The very term intolerant invokes moral condemnation. We are constantly

reminded to understand the importance of respecting different cultures and diversities. In this pugnacious new book, Frank Furedi argues that despite the democratisation of public life and the expansion of freedom, society is dominated by a culture that not only tolerates but often encourages intolerance. Often the intolerance is directed at people who refuse to accept the conventional wisdom and who are stigmatised as 'deniers'. Frequently intolerance comes into its own in clashes over cultural values and lifestyles. People are condemned for the food they eat, how they parent and for wearing religious symbols in public. This book challenges the 'quiet mood of tolerance' towards morally stigmatised forms of behaviour. The author examines recent forms of 'unacceptable behaviour'. It will tease out the real motives and drivers of intolerance.

**A History of African Higher Education from Antiquity to the Present** Y. G-M Lulat, 2005-08-30 Until recently, Eurocentrist history professors taught that it was the Europeans who brought higher education to the African continent. While the Europeans have indeed influenced African education in recent times, there is some vital information that most history books leave out: for centuries before the arrival of the Europeans, the vast and advanced native African civilizations already had sophisticated universities and other institutions of higher education to boast about. This book is an attempt to fill the chasm in today's literature regarding this topic. It will be of interest to those researching the accurate, non-Euro-biased history of Africa.

**All at Sea** Andrew Daddo, 2010 When Skoz wakes up and finds himself in the middle of the ocean in a boat, he has no idea how he got there. More importantly, how is he going to get back to dry land? And what about the shark? Ages 7+.

The Water Goddess in Igbo Cosmology Sabine Jell-Bahlsen, 2008 This evocative study of a water Goddess among the Igbo of Lake Oguta in southeastern Nigeria, thoroughly explores the rituals, beliefs and social organization associated with rituals of women's power ... the analysis of this powerful Goddess, based on many years of research, is a notable contribution to African female ritual studies, long neglected by scholars.--Publisher's website.

Rāja-vidyā A. C. Bhaktivedanta Swami Prabhupāda, 1973 In this little jewel of a book, based on the Bhagavad-gita, Srila

Prabhupada explains that the king of knowledge is knowledge of God, his creation, and ourselves -- and the relationships between these. He explains that the way to attain this knowledge is through bhakti-yoga, devotional service to the Lord, beginning with the chanting of the maha-mantra, Hare Krsna, Hare Krsna, Krsna Krsna, Hare Hare/ Hare Rama, Hare Rama, Rama Rama, Hare Hare.
