Castle Builders Malcolm James Baillie-Hislop,2016-10-31 In *Castle Builders*, Malcolm Hislop looks at the hugely popular subject of castles from the unusual perspective of design and construction. In this general introduction to the subject, we discover something of the personalities behind their creation - the architects and craftsmen - and, furthermore, the techniques they employed, and how style and technology was disseminated. *Castle Builders* takes both a thematic and a chronological approach to the design and construction of castles, providing the reader with clear lines of development. Themes include earth, timber and stone construction techniques, the evolution of the great tower, the development of military engineering, the progression of domestic accommodation, and the degree to which aesthetics contributed to castle design.

Description

Survey of Medieval Winchester Derek Keene,Alexander R. Rumble,1985 By the fourteenth century Winchester had lost its former eminence, but in trades, manufactures, and population, as well as by virtue of its administrative and ecclesiastical role, the city was still one of the major provincial centres in England. This Survey is based on a reconstruction of the histories of the houses, plots, gardens, and fields in the city and suburbs between c. 1300 and c. 1540, although in many instances both earlier and later periods are also covered. The reconstruction takes the form of a gazetteer (Part ii) of 1,128 histories of properties, together with accounts of 56 parish churches and the international fair of St. Giles, all illustrated by detailed maps. There is also a biographical register (Part iii) concerning more than 8,000 property-holders, most of whom lived in

Winchester. This is the first time that it has been possible to piece together such a precise and detailed picture of both the topography and the inhabitants of a medieval town. Part i of the book contains a full discussion of the significance of this material and, in a manner relevant to an understanding of life in medieval towns in general, describes and defines such matters as the evolution of the physical environment, housing, land-tenure, property values, the parochial structure, the practice and organization of trades, and the ways in which the citizens of Winchester adapted to the declining status of their city.
