Public Health in Pharmacy Practice Jordan R Covvey,Vibhuti Arya,Natalie A. DiPietro Mager,2020-03-20 Public Health in Pharmacy Practice: A Casebook is a collaboration of over thirty-five experts in public health pharmacy. The twenty-one chapters cover a broad array of topics relevant to pharmacy applications of public health: cross-cultural care, health literacy and disparities, infectious disease, health promotion and disease prevention, medication safety, women's and rural health and more. Each chapter contains learning objectives and an introduction to the topic, followed by a case and questions. The chapter closes with commentary from the authors and patient-oriented considerations for the topic at hand--Publisher's description

Taking Action Against Clinician Burnout National Academies of Sciences, Engineering, and Medicine,National Academy of Medicine,Committee on Systems Approaches to Improve Patient Care by Supporting Clinician Well-Being,2020-01-02 Patient-centered, high-quality health care relies on the well-being, health, and safety of health care clinicians. However, alarmingly high rates of clinician burnout in the United States are detrimental to the quality of care being provided, harmful to individuals in the workforce, and costly. It is important to take a systemic approach to address burnout that focuses on the structure, organization, and culture of health care. Taking Action Against Clinician Burnout: A Systems Approach to Professional Well-Being builds upon two groundbreaking reports from the past twenty years, To Err Is Human: Building a Safer Health System and Crossing the Quality Chasm: A New Health System for the 21st Century, which both called attention to the issues around patient safety and quality of care. This report explores the extent, consequences, and contributing factors of clinician burnout and provides a framework for a systems approach to clinician burnout and professional well-being, a research agenda to advance clinician well-being, and recommendations for the field.

The New Science of Learning Terry Doyle,Todd Zakrajsek,2013 Explains the latest neurological research in the science of learning, stressing the brain's need for sleep, exercise, and focused attention in its processing of new information

and creation of memories.

The Renal Drug Handbook Caroline Ashley,Aileen Dunleavy,2018-05-24 This invaluable guide, endorsed by the UKMi and reflecting the extensive experience of the UK Renal Pharmacy Group, features drug monographs guiding physicians in how to prescribe, prepare, and administer drugs to patients with different levels of kidney function and when undergoing renal replacement therapy. It has been fully updated for this fifth edition to include up to 100 additional drugs, while maintaining the clear structure and format that is easy to use and simple to follow in the busy clinical setting. It continues to offer support and guidance to health care professionals enabling them to prescribe medications to their renal patients appropriately and safely.

The Flipped Classroom Carl Reidsema,Lydia Kavanagh,Roger Hadgraft,Neville Smith,2017-02-27 Teaching and learning within higher education continues to evolve with innovative and new practices such as flipped teaching. This book contributes to the literature by developing a much deeper understanding of the complex phenomenon of flipped classroom approaches within higher education. It also serves as a practical guide to implementing flipped classroom teaching in academic practice across different higher educational institutions and disciplines. Part 1 of this book (Practice) describes the considerations involved in flipped classroom teaching, including the challenges faced in transforming teaching and learning within higher education. Further, it reviews the educational concepts on which the flipped classroom is based, including a selected history of similar innovations in the past. The final sections of Part 1 explore the tools needed for flipping, the design steps, assessment methods and the role of reflective practice within flipped teaching environments. “p>Part 2 of the book (Practices) provides a range of case studies from higher educational institutions in different countries and disciplines to demonstrate the many shapes and sizes of flipped classrooms. Many of the challenges, such as engaging students in their own learning and shifting them from spectators in the learning process to active participants, prove to be universal.

Sleep Disorders and Sleep Deprivation Institute of Medicine,Board on Health Sciences Policy,Committee on Sleep Medicine and Research,2006-10-13 Clinical practice related to sleep problems and sleep disorders has been expanding rapidly in the last few years, but scientific research is not keeping pace. Sleep apnea, insomnia, and restless legs syndrome are three examples of very common disorders for which we have little biological information. This new book cuts across a variety of medical disciplines such as neurology, pulmonology, pediatrics, internal medicine, psychiatry, psychology, otolaryngology, and nursing, as well as other medical practices with an interest in the management of sleep pathology. This area of research is not limited to very young and old patients–sleep disorders reach across all ages and ethnicities. Sleep Disorders and Sleep Deprivation presents a structured analysis that explores the following: Improving awareness among the general public and health care professionals. Increasing investment in interdisciplinary somnology and sleep medicine research training and mentoring activities. Validating and developing new and existing technologies for diagnosis and

treatment. This book will be of interest to those looking to learn more about the enormous public health burden of sleep disorders and sleep deprivation and the strikingly limited capacity of the health care enterprise to identify and treat the majority of individuals suffering from sleep problems.

Effective Personal Tutoring in Higher Education Dave Lochtie, Emily McIntosh, Andrew Stork, Ben Walker, 2018-10-08
This is an important new text for all academic and professional staff within higher education (HE) who have a personal tutoring, student support or advising role. It examines key topics in relation to tutoring including definitions, coaching, core values and skills, boundaries, monitoring students, undertaking group and individual tutorials and the need to measure impact. Throughout, the text encourages reflection and the need to think critically about the role of the personal tutor. A scholarly and practical text, it comprehensively brings together relevant academic literature to inform tutoring practice as well as contextualising the role within the HE policy and quality assurance landscape.

How Tobacco Smoke Causes Disease, 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

WHO Guidelines on Hand Hygiene in Health Care World Health Organization,2009 The WHO Guidelines on Hand Hygiene in Health Care provide health-care workers (HCWs), hospital administrators and health authorities with a thorough review of evidence on hand hygiene in health care and specific recommendations to improve practices and reduce transmission of pathogenic microorganisms to patients and HCWs. The present Guidelines are intended to be implemented in any situation in which health care is delivered either to a patient or to a specific group in a population. Therefore, this concept applies to all settings where health care is permanently or occasionally performed, such as home care by birth attendants. Definitions of health-care settings are proposed in Appendix 1. These Guidelines and the associated WHO Multimodal Hand Hygiene Improvement Strategy and an Implementation Toolkit (<http://www.who.int/gpsc/en/>) are designed to offer health-care facilities in Member States a conceptual framework and practical tools for the application of recommendations in practice at the bedside. While ensuring consistency with the Guidelines recommendations, individual adaptation according to local regulations, settings, needs, and resources is desirable. This extensive review includes in one document sufficient technical information to support training materials and help plan implementation strategies. The document comprises six parts.

Early Rheumatoid Arthritis Paul Emery,2005 This issue covers the latest developments in the understanding of rheumatoid arthritis at the early stage. Treatments such as with newer biologic agents and conventional disease-modifying antirheumatic drugs are reviewed. Also included are articles on imaging modalities as a means of identifying those in the early stages and monitoring response to treatment.

Flip Your Classroom Jonathan Bergmann,Aaron Sams,2012-06-21 Learn what a flipped classroom is and why it works, and get the information you need to flip a classroom. You'll also learn the flipped mastery model, where students learn at their own pace, furthering opportunities for personalized education. This simple concept is easily replicable in any classroom, doesn't cost much to implement, and helps foster self-directed learning. Once you flip, you won't want to go back!

Creating Significant Learning Experiences L. Dee Fink,2003-06-17 Dee Fink poses a fundamental question for all teachers: How can I create courses that will provide significant learning experiences for my students? In the process of addressing this question, he urges teachers to shift from a content-centered approach to a learning-centered approach that

asks What kinds of learning will be significant for students, and how can I create a course that will result in that kind of learning? Fink provides several conceptual and procedural tools that will be invaluable for all teachers when designing instruction. He takes important existing ideas in the literature on college teaching (active learning, educative assessment), adds some new ideas (a taxonomy of significant learning, the concept of a teaching strategy), and shows how to systematically combine these in a way that results in powerful learning experiences for students. Acquiring a deeper understanding of the design process will empower teachers to creatively design courses for significant learning in a variety of situations.
