Great Britain. National Audit Office

Healthcare Across the UK Great Britain. National Audit Office,2012 This report highlights key trends and variations in the delivery of healthcare across the four nations of the UK. Life expectancy varies significantly across the UK - from 75.9 in Scotland to 78.6 in England for men, and from 80.4 in Scotland to 82.6 in England for women. Spending on health services in the UK more than doubled in cash terms in the last decade. In 2010-11, despite devoting a higher proportion of total public spending to health, England spent the least on health per person. NHS staff has also increased over the last decade. Scotland has the most GPs per person (80 per 100,000 people in 2009 compared with 70 in England and 65 per 100,000 in both Wales and Northern Ireland). Scotland also has the most medical hospital staff and nursing, midwifery and health visiting staff per person. Comparable data on the efficiency and quality of healthcare are patchy. In 2008-09, average hospital lengths of stay varied from 4.3 days in England to 6.3 days in Wales. Hospital waiting times have fallen in all four nations in recent years, although there are notable variations in how long patients wait for common procedures. In 2009-10 waiting times tended to be lower in England and Wales. There have been significant improvements in levels of healthcare associated infections with rates of MRSA infection dropping by a third or more in all nations. The NAO considers that there would be value in the health departments in the four nations carrying out further work to investigate the variations in performance and identify how they can learn from each other

The Fingerprint U. S. Department Justice,2014-08-02 The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

Compasito Nancy Flowers,Maria Emília Brederode Santos,Zsuzsanna Szelényi,2007-01-01 Living among other people, in their families and communities, children become aware from a very early age of questions related to justice, and they search for the meaning of the world. By fostering an understanding of human rights, shaping opinion and developing attitudes, human rights education strongly supports this natural interest and learning process. This is what human rights education is about and this is what 'Compasito manual on human rights education for children' is for.'Compasito' is a starting point for educators, teachers and trainers who are ready to deal with human rights education with children of 7-13 years. The book covers the key concepts of human rights and children's rights, and provides substantial theoretical background to 13 key human rights issues, such as democracy, citizenship, gender equality, environment, media, poverty, and violence.The 42 practical activities serve to engage and motivate children to recognise human rights issues in their own environment. They help children to develop critical thinking, responsibility and a sense of justice, and help them learn how to take action to contribute to the betterment of their school or community. The manual also gives practical tips on how it can be used in various formal and non-formal educational settings.

The World Health Report 2006 World Health Organization,2006-03-23 The 2006 World Health Report focuses on the chronic shortages of doctors, midwives, nurses and other health care support workers in the poorest countries of the world where they are most needed. This is particularly true in sub-Saharan Africa, which has only four in every hundred global health workers but has a quarter of the global burden of disease, and less than one per cent of the world's financial resources. Poor working conditions, high rates of attrition due to illness and migration, and education systems that are unable to pick up the slack reflect the depth of the challenges in these crisis countries. This report considers the challenges involved and sets out a 10-year action plan designed to tackle the crisis over the next ten years, by which countries can strengthen their health system by building their health workforces and institutional capacity with the support of global partners.
