Transforming Education Unesco,2011 Este informe cita ejemplos de utilización de las TIC en diferentes regiones del mundo - África, la región árabe, Asia y América Latina - y proporciona un buen ejemplo de los cambios que las TIC aportan a los sistemas y políticas de educación. La gran diversidad que ofrecen los países seleccionados - Jordania, Namibia, Rwanda, Singapur y Uruguay - en términos de desarrollo económico y educativo, sugiere que lo que está en juego no se limitan a un determinado grupo de países privilegiados.

The 11th International Conference on European Transnational Educational (ICEUTE 2020) Álvaro Herrero,Carlos Cambra,Daniel Urda,Javier Sedano,Héctor Quintián,Emilio Corchado,2020-08-14 This book contains accepted papers presented at ICEUTE 2020 held in the beautiful and historic city of Burgos (Spain), in September 2020. The 11th International Conference on European Transnational Education (ICEUTE 2020) has been a meeting point for people working on transnational education within Europe. It has provided a stimulating and fruitful forum for presenting and discussing the latest works and advances on transnational education within European countries. After a thorough peer-review process, the ICEUTE 2020 International Program Committee selected 44 papers which are published in these conference proceedings

achieving an acceptance rate of 41%. Due to the COVID-19 outbreak, the ICEUTE 2020 edition was blended, combining on-site and on-line participation. In this relevant edition, a special emphasis was put on the organization of five special sessions related to relevant topics as Role of English in Transnational Education and Teacher Training, Personalization and ICT: a Path to Educational Inclusion, Innovation and Research Findings in Engineering Higher Education, Practical Implementations of Novel Initiatives, and Innovation in Computer Science Higher Education. The selection of papers was extremely rigorous in order to maintain the high quality of the conference, and we would like to thank the members of the Program Committees for their hard work in the reviewing process. This is a crucial process to the creation of a high standard conference, and the ICEUTE conference would not exist without their help.

Food Biochemistry Charles Alais, 2012-12-06 What I have said will go to prove that true science is the, one which teaches us to increase our satisfaction by drawing out the best from nature's productions. M. Henri Braconnot Nancy, 4th April 1830 (Extract from the Note on Casein and Milk, *Annales de Chimie et de Physique* (1830) 43, 351.) The main objective of this work is to provide a biochemical approach for students of food science and technology. It may also be useful to biologists generally and to biochemists in particular in providing a source of reference to help resolve some of their problems. Finally, professionals in the food industry will find here detailed information on aspects of biotechnology. With the continuing development of teaching in this field in the mainstream courses of Instituts Universitaires de Technologie, Universities and Grandes Ecoles: in France, the need for an Abn?ge (Essential Guide) has become urgent. Students have to refer to various specialist works, which are considerable in number, expensive and often out of date. The authors were faced with the task of selecting material and presenting it in such a way that the finished book would be reduced to a size in keeping with the spirit of the Abrege collection.

Antarctic Resolution Giulia Foscari, UNLESS, 2021-05-25 In the era of the Anthropocene, it's urgent to shift our collective attention southward. Antarctica, a continent that accounts for 10% of Planet Earth and 70% of the world's fresh water, represents at once the repository of planetary data essential to produce reliable climate change projections, and the biggest threat to all coastal sites. On the 200th anniversary of the discovery of Antarctica, 'Antarctic Resolution' offers a high-resolution image of the hyper-surveilled yet neglected continent and instigates a decisive resolution towards a supra-national governance model. Advocating for true trans-national and cross-disciplinary collaboration, 'Antarctic Resolution' brings together, for the first time in Antarctic bibliography, international experts and practitioners in the fields of science, architecture, engineering, history, political science, law, anthropology, literature, art and technology. The holistic agenda of Antarctic Resolution, which includes dedicated chapters on the role of science and politics in the continent, culminates in the first 'Declassified Archive of Antarctic Architecture.' Revealing the unique evolution of inhabitation models and architectural typologies in the extreme (from the first Antarctic hut to advanced contemporary structures), the Archive questions the motives that led to an unexpected architectural redundancy on the continent. Developed by UNLESS, a not-for-profit organization which mobilizes architecture as an agency for territorial investigation, Antarctic Resolution juxtaposes academic content with highly visual information. Alongside archival and contemporary photography, the book is dense with drawings, diagrams and cartographies produced by the global network of the Polar Lab. Resisting the temptation of imposing a conclusive narrative, the publication structure offers knowledge in the form of fragments ? flashes that shed light in a continent that lies in the dark for six months each year.

Pharmaceutical Market Access in Developed Markets Güvenç Koçkaya, Albert Wertheimer, 2018-01-22 Market access is the process by which a pharmaceutical company gets its product available on the market after having obtained a marketing authorization from a regulatory agency and by which the product becomes available for all patients for whom it is indicated as per its marketing authorization. It covers a group of activities intended to provide access to the appropriate medicine for the appropriate group of patients at the appropriate price (in most countries). Market Access may also be seen as activities that support the management of potential barriers, such as non-optimal price and reimbursement levels, the restriction of the scope of prescribing for the drug or complicated prescription writing or funding procedures. Since there are cultural differences among countries, any Market Access strategy needs to be culturally sensitive. Pharmaceutical Market Access in emerging markets has been extensively discussed in our previous book, published in 2016. The present book focuses on

developed markets with the goal of helping students, academics, industry personnel, government workers, and decision makers understand the environment in developed markets.
