Bulls, Bullfighting, and Spanish Identities Carrie B. Douglass 1999-04 The matador flourishes his cape, the bull charges, the crowd cheers: this is the image of Spain best known to the world. But while the bull has long been a symbol of Spanish culture, it carries more meaning than has previously been recognized. In this book, anthropologist Carrie B. Douglass views bulls and bullfighting as a means of discussing fundamental oppositions in Spanish society and explains the political significance of those issues for one of Europe's most regionalized countries. In talking about bulls and bullfighting, observes Douglass, one ends up talking not only about differences in region, class, and politics in Spain but also about that country's ongoing struggle between modernity and tradition. She relates how Spaniards and outsiders see bullfighting as representative of a traditional, irrational Spain contrasted with a more civilized Europe, and she shows how Spaniards' ambivalence about bullfighting is actually a way of expressing ambivalence about the loss of traditional culture in a modern world. To fully explore the symbolism of bulls and bullfighting, Douglass offers an overview of Spain's fiesta cycle, in which the bull is central. She broadly and meticulously details three different fiestas through ethnographic fieldwork conducted over a number of years, delineating the differences in festivals held in different regions. She also shows how a cycle of these fiestas may hold the key to resolving some of Spain's fundamental political contradictions by uniting the different regions of Spain and reconciling opposing political camps--the right, which holds that there is one Spain, and the left, which contends that there are many. Bulls, Bullfighting, and Spanish Identities is an intriguing study of symbolism used to examine the broader anthropological issues of identity and nationhood. Through its focus on the political discourse of bulls and bullfighting, it makes an original contribution to understanding not only Spanish politics but also Spain's place in the modern world.

Victorian Animal Dreams Deborah Denenholz Morse 2017-05-15 The Victorian period witnessed the beginning of a debate on the status of animals that continues today. This volume explicitly acknowledges the way twenty-first-century deliberations about animal rights and the fact of past and prospective animal extinction haunt the discussion of the Victorians' obsession with animals. Combining
close attention to historical detail with a sophisticated analytical framework, the contributors examine the various forms of human dominion over animals, including imaginative possession of animals in the realms of fiction, performance, and the visual arts, as well as physical control as manifest in hunting, killing, vivisection and zookeeping. The diverse range of topics, analyzed from a contemporary perspective, makes the volume a significant contribution to Victorian studies. The conclusion by Harriet Ritvo, the pre-eminent authority in the field of Victorian/animal studies, provides valuable insight into the burgeoning field of animal studies and points toward future studies of animals in the Victorian period.

**Women and Bullfighting** Sarah Pink 2020-07-13 This book investigates the popularity and success of contemporary women performers in bullfighting culture, which has been framed by a discourse of 'traditionalist' masculinity. This examination of the changing situation of women in the bullfighting world is used to explore the ways in which gender is represented, enacted and negotiated in contemporary Spain. The bullfight in the 1990s is in an ambiguous position: it is a 'traditional' performance in a changing consumer society. In order to survive, it needs to adapt itself to a wider social context and, in particular, to international media coverage. It is in this context that the current success of women performers is located. However, women performers are a contested phenomenon in the bullfighting world: there is heated debate over their acceptability, much of which focuses on the body. Moreover, the entry of women into the bullfight questions existing definitions of the sport's ritual structure and of gender relations in Spain. Thoroughly researched and compelling to read, Women and Bullfighting addresses these issues and argues that existing traditionalist approaches to gender, bullfighting and ritual in Spain need to be revised in order to locate women bullfighters in the context of a richly varied culture which is increasingly affected by the media and contemporary patterns of consumption. This provocative book will be of interest to researchers and students of anthropology, gender studies, sociology, cultural studies, media studies and Spanish studies.
