theory, and social network theory to develop her own theories of information poverty, life in the round, and normative behavior. Other theories that contributed to this research were social capital theory and ecological theory, as well as ethnographic, social construction, and sociolinguistics approaches. Researchers also studied various commu-

EMERGENT STRATEGY - GSA Network

Emergence is one of the best concepts I have learned for discussing this. It is another way of speaking about the connective tissue of all that exists—the way, the Tao, the force, change, God/dess, life. Birds flocking, cells splitting, fungi whispering.

Models of 12 Assessment - SAGE Publications Inc

Assessment is a core activity of social work practices, using professional theories and with normative concepts of need in mind. Spicker (2012) offers the following: The idea of need refers to: the kinds of problem which people experience; requirements for some particular kind of response; and a relationship between problems and the responses available. A need is a claim for service.

CONSTRUCTIVISM IN THEORY AND PRACTICE: TOWARD A BETTER ...

successively more complex skill, understanding, and ultimately independent competence. The fundamental nature of social constructivism is collaborative social interaction in contrast to individual investigation of cognitive constructivism. Through the cognitive give and take of social interactions, one constructs personal knowledge. In addition,
