God is Dead Andy McGrath, 2022-03-10 • SHORTLISTED FOR THE WILLIAM HILL SPORTS BOOK OF THE YEAR AWARD 2022 • A SPORTS BOOK OF THE YEAR BY THE TIMES AND THE GUARDIAN • The remarkable untold story of the mercurial cycling prodigy Frank Vandenbroucke, written by William Hill award-winning author Andy McGrath. They called him God. For his grace on a bicycle, for his divine talent, for his heavenly looks. Frank Vandenbroucke had it all, and in the late Nineties he raced with dazzling speed and lived even faster. The Belgian won several of cycling's most illustrious races, including Liège-Bastogne-Liège, Paris-Nice and Ghent-Wevelgem. He was a mix of poise and panache who enthralled a generation of cycling fans. Off the bike, he only had one enemy - himself. Vandenbroucke dabbled in nocturnal party sessions mixing sleeping pills and alcohol and regularly fell out with team managers. By 1999 his team had suspended him and this proved to be the start of a long, eventful fall from grace. Depression, a drug ban, addiction, car crashes, divorce and countless court appearances subsumed his life. He threatened his wife with a gun. He tried to commit suicide twice. And when police found performance-enhancing drugs at his house, Vandenbroucke said they were for his dog. It seemed he had finally learned from his mistakes. Then, on 12 October 2009, aged just 34, Vandenbroucke was found dead in a hotel room in Senegal. Guided by exclusive contributions from his family, friends and team-mates, William Hill award-winning author Andy McGrath lays bare Vandenbroucke's chaotic, complicated life and times. *God is Dead* is the remarkable biography of this mercurial cycling prodigy.

Sustainable Smart Cities Marta Peris-Ortiz, Dag R. Bennett, Diana Pérez-Bustamante Yábar, 2016-10-05 This volume provides the most current research on smart cities. Specifically, it focuses on the economic development and sustainability of smart cities and examines how to transform older industrial cities into sustainable smart cities. It aims to identify the role of the following elements in the creation and management of smart cities: • Citizen participation and empowerment • Value creation mechanisms • Public administration • Quality of life and sustainability • Democracy • ICT • Private initiatives and

entrepreneurship Regardless of their size, all cities are ultimately agglomerations of people and institutions. Agglomeration economies make it possible to attain minimum efficiencies of scale in the organization and delivery of services. However, the economic benefits do not constitute the main advantage of a city. A city's status rests on three dimensions: (1) political impetus, which is the result of citizens' participation and the public administration's agenda; (2) applications derived from technological advances (especially in ICT); and (3) cooperation between public and private initiatives in business development and entrepreneurship. These three dimensions determine which resources are necessary to create smart cities. But a smart city, ideal in the way it channels and resolves technological, social and economic-growth issues, requires many additional elements to function at a high-performance level, such as culture (an environment that empowers and engages citizens) and physical infrastructure designed to foster competition and collaboration, encourage new ideas and actions, and set the stage for new business creation. Featuring contributions with models, tools and cases from around the world, this book will be a valuable resource for researchers, students, academics, professionals and policymakers interested in smart cities.

111 Places in Berlin that You Shouldn't Miss Lucia Jay von Seldeneck, 2019 - The ultimate insider's guide to Berlin, revised and updated for 2019- Features interesting and unusual places not found in traditional travel guides In Berlin, the city divided after World War II, everybody knows about the Brandenburg Gate, Hitler's bunker, Kennedy's speech, red and green beer, splendidly broad boulevards, and numerous lakes. But this metropolis, once again the capital of Germany, encompasses many clandestine niches characteristic of a heterogeneous city without a beginning and without an end between its famous backyards, nature parks, and bridges. It is often these miniscule witnesses that tell authentic history. Besides the larger attractions, this unusual guide presents Berlin's other side - such as a tower so ugly that no-one wants to open a restaurant in it; a library offering its books in the trunks of living trees; the monument for the inventor of the currywurst; a residential settlement in a former East German prison; the place where the Nazis concealed the so-called degenerate art which they had confiscated; the house where David Bowie lived; an automat out of which maggots can be pulled; a museum for things used for purposes for which they were not created; the reception camp for refugees from East Germany - and, in a completely unexpected spot, the most romantic place in Berlin.

The Rough Guide to Berlin (Travel Guide eBook) Rough Guides, 2017-03-01 Thoroughly researched and updated, the eleventh edition of The Rough Guide to Berlin is the ultimate travel guide to one of Europe's most dynamic, restless and ever-changing cities. Blending stunning photography with full-colour maps and more listings and information than ever before, The Rough Guide to Berlin offers practical advice on all the best things to see and do in Berlin - from iconic sights such as the Reichstag, Brandenburg Gate and the world-class museums of Museum Island to expanded coverage of the latest places to go in up-and-coming neighbourhoods like Neukölln and Wedding. With comprehensive, reliable reviews of all the best hotels, bars, clubs, shops, galleries and restaurants for all budgets, plus itineraries and Top 5s and a wealth of background information, The Rough Guide to Berlin is all you need - whether planning or on the ground - to make the most of your trip.

The Economics of Ecosystems and Biodiversity: Ecological and Economic Foundations Pushpam Kumar, 2012-12-20 Human well-being relies critically on ecosystem services provided by nature. Examples include water and air quality regulation, nutrient cycling and decomposition, plant pollination and flood control, all of which are dependent on biodiversity. They are predominantly public goods with limited or no markets and do not command any price in the conventional economic

system, so their loss is often not detected and continues unaddressed and unabated. This in turn not only impacts human well-being, but also seriously undermines the sustainability of the economic system. It is against this background that TEEB: The Economics of Ecosystems and Biodiversity project was set up in 2007 and led by the United Nations Environment Programme to provide a comprehensive global assessment of economic aspects of these issues. This book, written by a team of international experts, represents the scientific state of the art, providing a comprehensive assessment of the fundamental ecological and economic principles of measuring and valuing ecosystem services and biodiversity, and showing how these can be mainstreamed into public policies. This volume and subsequent TEEB outputs will provide the authoritative knowledge and guidance to drive forward the biodiversity conservation agenda for the next decade.

Disciplining Interdisciplinarity Gabriele Bammer, 2013-01-01 This book provides collaborative research teams with a systematic approach for addressing complex real-world problems like widespread poverty, global climate change, organised crime, and escalating health care costs. The three core domains are Synthesising disciplinary and stakeholder knowledge, Understanding and managing diverse unknowns, and Providing integrated research support for policy and practice change. Each of these three domains is organised around five questions For what and for whom? Which knowledge, unknowns and aspects of policy or practice? How? Context? Outcome? This simple framework lays the foundations for developing compilations of concepts, methods and case studies about applying systems thinking, scoping and boundary setting, framing, dealing with values, harnessing and managing differences, undertaking dialogue, building models, applying common metrics, accepting unknowns, advocacy, end-user engagement, understanding authorisation, dealing with organisational facilitators and barriers, and much more. The book makes a case for a new research style—integrative applied research—and a new discipline of Integration and Implementation Sciences or I2S. It advocates for progressing these through an I2S Development Drive. It builds on theory and practice-based research in multi-, inter- and transdisciplinarity, post-normal science, systemic intervention, integrated assessment, sustainability science, team science, mode 2, action research and other approaches. The book concludes with 24 commentaries by Simon Bronitt; L. David Brown; Marcel Bursztyn and Maria Beatriz Maury; Lawrence Cram; Ian Elsum; Holly J. Falk-Krzesinski; Fasihuddin; Howard Gadlin and L. Michelle Bennett; Budi Haryanto; Julie Thompson Klein; Ted Lefroy; Catherine Lyall; M. Duane Nellis; Linda Neuhauser; Deborah O'Connell with Damien Farine, Michael O'Connor and Michael Dunlop; Michael O'Rourke; Christian Pohl; Merritt

Polk; Alison Ritter; Alice Roughley; Michael Smithson; Daniel Walker; Michael Wesley; and Glenn Withers. These begin a process of appraisal, discussion and debate across diverse networks.

A Moral Political Economy Federica Carugati, Margaret Levi,2021-06-24 Economies - and the government institutions that support them - reflect a moral and political choice, a choice we can make and remake. Since the dawn of industrialization and democratization in the late eighteenth century, there has been a succession of political economic

frameworks, reflecting changes in technology, knowledge, trade, global connections, political power, and the expansion of citizenship. The challenges of today reveal the need for a new moral political economy that recognizes the politics in political economy. It also requires the redesign of our social, economic, and governing institutions based on assumptions about humans as social beings rather than narrow self-serving individualists. This Element makes some progress toward building a new moral political economy by offering both a theory of change and some principles for institutional (re)design.
