Managing Children with Developmental Language Disorder James Law,Cristina McKean,Carol-Anne Murphy,Elin Thordardottir,2019-04-09 Although most children learn language relatively quickly, as many as 10 per cent of them are slow to start speaking and are said to have developmental language disorder (DLD). Children with DLD are managed by a variety of different professionals in different countries, are offered different services for different periods of time and are given a variety of different therapeutic treatments. To date, there has been no attempt to evaluate these different practices. Managing Children with Developmental Language Disorder: Theory and Practice Across Europe and Beyond does just this, reporting on the findings of a survey carried out as part of the work of COST Action IS1406, a European research network. Law and colleagues analyse the results of a pan-European survey, looking at how different services are delivered in different countries, at the cultural factors underpinning such services and the theoretical frameworks used to inform practice in different countries. The book also provides a snapshot of international practices in a set of 35 country-specific vignettes, providing a benchmark for future developments but also calling attention to the work of key practitioners and thinkers in each of the countries investigated. This book will be essential reading for practitioners working with children with language impairments, those commissioning services and policy in the field and students of speech and language therapy.

Child poverty, evidence and policy Jones, Nicola A., Sumner, Andy, 2011-02-23 Available Open Access under CC-BY-NC licence. This book is about the opportunities and challenges involved in mainstreaming knowledge about children in international development policy and practice. It focuses on the ideas, networks and institutions that shape the development of evidence about child poverty and wellbeing, and the use of such evidence in development policy debates. It also pays particular attention to the importance of power relations in influencing the extent to which children's voices are heard and acted upon by international development actors. The book weaves together theory, mixed method approaches and case studies spanning a number of policy sectors and diverse developing country contexts in Africa, Asia and Latin America. It therefore provides a useful introduction for students and development professionals who are new to debates on children, knowledge and development, whilst at the same time offering scholars in the field new methodological and empirical insights.

The State of Food Security and Nutrition in the World 2020 Food and Agriculture Organization of the United Nations ,International Fund for Agricultural Development,World Food Programme,World Health Organization,The United Nations Children's Fund,2020-07-01 Updates for many countries have made it possible to estimate hunger in the world with greater accuracy this year. In particular, newly accessible data enabled the revision of the entire series of undernourishment estimates for China back to 2000, resulting in a substantial downward shift of the series of the number of undernourished in the world. Nevertheless, the revision confirms the trend reported in past editions: the number of people affected by hunger globally has been slowly on the rise since 2014. The report also shows that the burden of malnutrition in all its forms continues to be a challenge. There has been some progress for child stunting, low birthweight and exclusive breastfeeding, but at a pace that is still too slow. Childhood overweight is not improving and adult obesity is on the rise in all regions. The report complements the usual assessment of food security and nutrition with projections of what the world may look like in

2030, if trends of the last decade continue. Projections show that the world is not on track to achieve Zero Hunger by 2030 and, despite some progress, most indicators are also not on track to meet global nutrition targets. The food security and nutritional status of the most vulnerable population groups is likely to deteriorate further due to the health and socio economic impacts of the COVID-19 pandemic. The report puts a spotlight on diet quality as a critical link between food security and nutrition. Meeting SDG 2 targets will only be possible if people have enough food to eat and if what they are eating is nutritious and affordable. The report also introduces new analysis of the cost and affordability of healthy diets around the world, by region and in different development contexts. It presents valuations of the health and climate-change costs associated with current food consumption patterns, as well as the potential cost savings if food consumption patterns were to shift towards healthy diets that include sustainability considerations. The report then concludes with a discussion of the policies and strategies to transform food systems to ensure affordable healthy diets, as part of the required efforts to end both hunger and all forms of malnutrition.

Inequality in Education Donald B. Holsinger, W. James Jacob, 2009-05-29 Inequality in Education: Comparative and International Perspectives is a compilation of conceptual chapters and national case studies that includes a series of methods for measuring education inequalities. The book provides up-to-date scholarly research on global trends in the distribution of formal schooling in national populations. It also offers a strategic comparative and international education policy statement on recent shifts in education inequality, and new approaches to explore, develop and improve comparative education and policy research globally. Contributing authors examine how education as a process interacts with government finance policy to form patterns of access to education services. In addition to case perspectives from 18 countries across six geographic regions, the volume includes six conceptual chapters on topics that influence education inequality, such as gender, disability, language and economics, and a summary chapter that presents new evidence on the pernicious consequences of inequality in the distribution of education. The book offers (1) a better and more holistic understanding of ways to measure education inequalities; and (2) strategies for facing the challenge of inequality in education in the processes of policy formation, planning and implementation at the local, regional, national and global levels.

Investing in Young Children Sophie Naudeau, Naoko Kataoka, Alexandria Valerio, Michelle J. Neuman, Leslie Kennedy Elder, 2012-07-03 La Banque mondiale a rédigé ce guide du développement de la petite enfance (DPE) pour répondre à la demande croissante de conseil et d'appui des responsables de programmes en matière de dialogue politique sur le thème du DPE, et pour aider les clients à prendre et à mettre en oeuvre des décisions pertinentes sur la meilleure manière d'investir dans le DPE dans le cadre de leur économie et de leurs priorités nationales. Policies to Address Poverty in America Melissa Kearney, Benjamin Harris, 2014-06-19 One-in-seven adults and one-in-five children in the United States live in poverty. Individuals and families living in poverty not only lack basic, material necessities, but they are also disproportionately afflicted by many social and economic challenges. Some of these challenges include the increased possibility of an unstable home situation, inadequate education opportunities at all levels, and a high chance of crime and victimization. Given this growing social, economic, and political concern, The Hamilton Project at

Brookings asked academic experts to develop policy proposals confronting the various challenges of America's poorest citizens, and to introduce innovative approaches to addressing poverty. When combined, the scope and impact of these proposals has the potential to vastly improve the lives of the poor. The resulting 14 policy memos are included in The Hamilton Project's Policies to Address Poverty in America. The main areas of focus include promoting early childhood development, supporting disadvantaged youth, building worker skills, and improving safety net and work support.

The Diabetes Textbook Joel Rodriguez-Saldana, 2019-06-27 Diabetes has become a worldwide health problem, the global estimated prevalence approaches ten percent and the burden of this disease in terms of morbidity and mortality is unprecedented. The advances acquired through the knowledge of the mechanisms of the disease and the variety of therapeutic approaches contrast with the inability of private and public health systems in underdeveloped and even developed countries to achieve the goals of treatment. This paradox has been described in many sources: the surge of

scientific advances contrast with an unprecedented amount of human suffering. Thus, a patient centered and an evidence based approach with the capacity to produce measurable clinical and economic outcomes is required. The purpose of this textbook is multiple: to offer a comprehensive resource covering all aspects of outpatient management; to address diabetes as a health problem from an epidemiological, economic and clinical perspective; to discuss the role of social determinants of health on the worldwide increase in diabetes; to highlight the challenges and obstacles in providing adequate care; and to outline a multidisciplinary approach to management in which medical visits retain their importance as part of a team comprising the patient, his or her family and a multidisciplinary group of health professionals who are able to move beyond the traditional approach of diabetes as a disease and greatly improve outcomes.

The Psychosocial Development of Minority Group Children Gloria J. Powell, 1983

No Small Matter Harold Alderman, 2011 Education is often seen as a fundamental means to improve economic prospects for individuals from low income settings. However, even with increased emphasis on basic education for all, many individuals fail to achieve basic skills to succeed in life. The book presents evidence that one core reason is that by the time a child is old enough to attend school, there is already a wide disparity in cognitive skills and in emotional and behavioral development among children from households of different socioeconomic backgrounds. Low levels of cognitive development in early childhood strongly correlate with low socio-economic status (as measured by wealth and parental education) as well as malnutrition. These disadvantages are often exacerbated by economic crises. Fortunately, however, as documented in this volume, there are programs that have proven effective in promoting a child's development through caregiver-child interaction and stimulation, and with well designed preschool programs. While preschool programs currently cover a modest share of low income children, expansion of such services to at risk populations is a cost-effective means of improving overall educational achievement. Thus, focused preschool programs can serve as a key investment in a strategy to reduce the transmission of poverty from poor parents to their children.
