Intelligent Image and Video Compression Fan Zhang, David Bull, 2021-04-07 *Intelligent Image and Video Compression: Communicating Pictures, Second Edition* explains the requirements, analysis, design and application of a modern video coding system. It draws on the authors' extensive academic and professional experience in this field to deliver a text that is algorithmically rigorous yet accessible, relevant to modern standards and practical. It builds on a thorough grounding in mathematical foundations and visual perception to demonstrate how modern image and video compression methods can be designed to meet the rate-quality performance levels demanded by today's applications and users, in the context of prevailing network constraints. David Bull and Fan Zhang have written a timely and accessible book on the topic of image and video compression. Compression of visual signals is one of the great technological achievements of modern times, and has made possible the great successes of streaming and social media and digital cinema. Their book, *Intelligent Image and Video Compression* covers all the salient topics ranging over visual perception, information theory, bandpass transform theory, motion estimation and prediction, lossy and lossless compression, and of course the compression standards from MPEG (ranging from H.261 through the most modern H.266, or VVC) and the open standards VP9 and AV-1. The book is replete with clear explanations and figures, including color where appropriate, making it quite accessible and valuable to the advanced student as well as the expert practitioner. The book offers an excellent glossary and as a bonus, a set of tutorial problems. Highly recommended! --Al Bovik An approach that combines algorithmic rigor with practical implementation using numerous worked examples Explains how video compression methods exploit statistical redundancies, natural correlations, and knowledge of human perception to improve performance Uses contemporary video coding standards (AVC, HEVC and VVC) as a vehicle for explaining block-based compression Provides broad coverage of important topics such as visual quality assessment and video streaming

Lea's Chemistry of Cement and Concrete Peter Hewlett, 2003-11-12 *Lea's Chemistry of Cement and Concrete* deals with

the chemical and physical properties of cements and concretes and their relation to the practical problems that arise in manufacture and use. As such it is addressed not only to the chemist and those concerned with the science and technology of silicate materials, but also to those interested in the use of concrete in building and civil engineering construction. Much attention is given to the suitability of materials, to the conditions under which concrete can excel and those where it may deteriorate and to the precautionary or remedial measures that can be adopted. First published in 1935, this is the fourth edition and the first to appear since the death of Sir Frederick Lea, the original author. Over the life of the first three editions, this book has become the authority on its subject. The fourth edition is edited by Professor Peter C. Hewlett, Director of the British Board of Agreement and visiting Industrial Professor in the Department of Civil Engineering at the University of Dundee. Professor Hewlett has brought together a distinguished body of international contributors to produce an edition which is a worthy successor to the previous editions.

The Network Reshapes the Library Lorcan Dempsey, 2014-08-18 Since he began posting in 2003, Dempsey has used his blog to explore nearly every important facet of library technology, from the emergence of Web 2.0 as a concept to open source ILS tools and the push to web-scale library management systems. More than just a commentary on the issue of the moment, the more than 1,800 posts have offered thousands of readers valuable perspective and insight as well as a visionary approach to libraries' future. In a compendium that library planners, administrators, and technology staff will find endlessly stimulating, Varnum offers an expertly curated selection of entries from Dempsey's blog. Showing where libraries have been in the last decade and also where they're heading now, this book covers such keystone topics as Networked resources, Network organization, The research process and libraries' evolving role, featuring the seminal post "In the Flow", Resource discovery, Library systems and tools such as search indices and OpenURL link resolvers, Data and metadata, Publishing and communication, including blogs, social media, and scholarly communication, Libraries, archives, museums, and galleries as "memory institutions". The book concludes with a selection of favorites hand-picked by Dempsey himself. As one university librarian put it, Dempsey's "dual ability to explore an issue and to reveal the higher-order trends is spot-on for understanding our volatile environment." That unique and thoughtful analysis is on full display in this book.

Vocational Rehabilitation Gordon Waddell, Vocational Rehabilitation Task Group, A. Kim Burton, Industrial Injuries Advisory Council, Nicholas Kendall, 2008-07-17 The aim of this review was to provide an evidence base for policy development on vocational rehabilitation - defined as whatever helps someone with a health problem to stay at, return to and remain at work. The focus was on adults of working age, the common health problems that account for two-thirds of long-term sickness (mild/moderate musculoskeletal, mental health and cardio-respiratory conditions) and work outcomes (staying at, returning to and remaining in work). Data from some 450 scientific reviews and reports were included in evidence tables. The review demonstrates that there is a strong scientific evidence base for many aspects of vocational rehabilitation, a good business case for it and more evidence on cost-benefits than for many health and social policy areas. Generic and condition-specific findings are reported, and practical suggestions offered for the differing types of people affected by health problems. Vocational rehabilitation should be a fundamental element of government strategy to improve the health of working age people.
