A Threat Against Europe? J. Peter Burgess,2011 The concept of security has traditionally referred to the status of sovereign states in a closed international system. In this system the state is assumed to be both the object of security and the primary provider of security. Threats to the state's security are understood as threats to its political autonomy in the system. The major international institutions that emerged after the Second World War were built around this idea. When the founders of the United Nations spoke of collective security, they were referring primarily to state security and to the coordinated system that would be necessary in order to avoid the 'scourge of war'. But today, a wide range of security threats, both new and traditional, confront Europe, or at least as some would say.

The Art of Pregnancy Ilianne Walroth,2013-10-01 The Art of Pregnancy is a book every pregnant woman should have. It's a book written in a subtle and pleasant prose, like a friendly conversation from one Mom to another. And, elevating the book to an incomparable artistic level, the text is accompanied with spectacular photographs, fascinating artwork, and an exceptional graphic design. This book will fill the heart of the pregnant woman with love; it will make her feel more beautiful than ever; it will make her fall in love with her pregnancy; it will reinforce her sense of responsibility; it will help her to lose her fear of childbirth; and most importantly, it will help strengthen the bonds of love with her baby in gestation and her partner. The book begins with a grand story titled "Isabella and the Wondrous Group", that will take the pregnant woman through the exciting journey of conception. In addition, the book contains six chapters: Congratulations! Pregnancy has Arrived at Your Door; Keep Your Spirits Up! A Healthy Body for a Healthy Baby; Beautiful! Enjoy your Pregnancy; Be Careful! Three Enemies of Your Pregnancy are Lurking; Extraordinary! Classes to Prepare for Childbirth; and Get Ready! The Birth of Your Baby is Near. The pregnant woman will discover the magic of motherhood has no barriers, and that pregnancy... is altogether an Art.

Marriage by Force? Annie Bunting,Benjamin N. Lawrance,Richard L. Roberts,2016-06-15 With forced marriage, as with

so many human rights issues, the sensationalized hides the mundane, and oversimplified popular discourses miss the range of experiences. In sub-Saharan Africa, the relationship between coercion and consent in marriage is a complex one that has changed over time and place, rendering impossible any single interpretation or explanation. The legal experts, anthropologists, historians, and development workers contributing to *Marriage by Force?* focus on the role that marriage plays in the mobilization of labor, the accumulation of wealth, and domination versus dependency. They also address the crucial slippage between marriages and other forms of gendered violence, bondage, slavery, and servile status. Only by examining variations in practices from a multitude of perspectives can we properly contextualize the problem and its consequences. And while early and forced marriages have been on the human rights agenda for decades, there is today an unprecedented level of international attention to the issue, thus making the coherent, multifaceted approach of *Marriage by Force?* even more necessary.

Thirty Days to Hope & Freedom from Sexual Addiction Milton S. Magness, 2010-12 A concise thirty-day guide to healing from sexual addiction

Disability and Mobile Citizenship in Postsocialist Ukraine Sarah D. Phillips, 2010-11-26 Sarah D. Phillips examines the struggles of disabled persons in Ukraine and the other former Soviet states to secure their rights during the tumultuous political, economic, and social reforms of the last two decades. Through participant observation and interviews with disabled Ukrainians across the social spectrum -- rights activists, politicians, students, workers, entrepreneurs, athletes, and others -- Phillips documents the creative strategies used by people on the margins of postsocialist societies to assert claims to mobile citizenship. She draws on this rich ethnographic material to argue that public storytelling is a powerful means to expand notions of relatedness, kinship, and social responsibility, and which help shape a more tolerant and inclusive society.

International Business Andrew Delios, 2012-12-10 *International Business: An Asia Pacific Perspective (Second Edition)* provides a unique exploration of the topic of international business. It examines decisions relevant to managers in internationalizing and multinational firms operating in the Asia Pacific region. Its uniqueness stems from the cutting-edge conceptual material that underlies the decision-making frameworks in the text and in the numerous Asian company examples and illustrations. Users of this text examine such essential topics as the measurement and analysis of the cultural, political and economic dimensions of the international environment; the formation of internationalization strategies, including entry mode choice and strategic alliances; the analysis of the competitive implications of multinational firms and business groups; multinational, subsidiary and expatriate management; and the management of ethical issues.

Rising to the Challenge National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Comparative National Innovation Policies: Best Practice for the 21st Century, 2012-08-06 America's position as the source of much of the world's global innovation has been the foundation of its economic vitality and military

power in the post-war. No longer is U.S. pre-eminence assured as a place to turn laboratory discoveries into new commercial products, companies, industries, and high-paying jobs. As the pillars of the U.S. innovation system erode through wavering financial and policy support, the rest of the world is racing to improve its capacity to generate new technologies and products, attract and grow existing industries, and build positions in the high technology industries of tomorrow. Rising to the Challenge: U.S. Innovation Policy for Global Economy emphasizes the importance of sustaining global leadership in the commercialization of innovation which is vital to America's security, its role as a world power, and the welfare of its people. The second decade of the 21st century is witnessing the rise of a global competition that is based on innovative advantage. To this end, both advanced as well as emerging nations are developing and pursuing policies and programs that are in many cases less constrained by ideological limitations on the role of government and the concept of free market economics. The rapid transformation of the global innovation landscape presents tremendous challenges as well as important opportunities for the United States. This report argues that far more vigorous attention be paid to capturing the outputs of innovation - the commercial products, the industries, and particularly high-quality jobs to restore full employment. America's economic and national security future depends on our succeeding in this endeavor.

Early Warming Nancy Lord, 2012-01-10 In Shishmaref, Alaska, new seawalls are constructed while residents navigate the many practical and bureaucratic obstacles to moving their entire island village to higher ground. Farther south, inland hunters and fishermen set out to grow more of their own food—and to support the reintroduction of wood bison, an ancient species well suited to expected habitat changes. First Nations people in Canada team with conservationists to protect land for both local use and environmental resilience. In *Early Warming*, Alaskan Writer Laureate, Nancy Lord, takes a cutting-edge look at how communities in the North—where global warming is amplified and climate-change effects are most immediate—are responding with desperation and creativity. This beautifully written and measured narrative takes us deep into regions where the indigenous people who face life-threatening change also demonstrate impressive conservation ethics and adaptive capacities. Underpinned by a long acquaintance with the North and backed with scientific and political sophistication, Lord's vivid account brings the challenges ahead for us all into ice-water clarity.

Boards and Shareholders in European Listed Companies Massimo Belcredi, Guido Ferrarini, 2013-10-10 With contributions by distinguished scholars from legal and financial backgrounds, this collection of essays analyses four main topics in the corporate governance of European listed firms: (i) board structure, composition and functioning and their interaction with ownership structure; (ii) board remuneration; (iii) shareholder activism and (iv) corporate governance disclosure based on the 'comply or explain' approach. The authors provide new comparative evidence and analyse its implications for the policy debate. They challenge the conventional wisdom that corporate governance in European firms was systematically dysfunctional. While proposals aimed at increasing disclosure and accountability are usually well-grounded,

caution is suggested when bringing forward regulatory changes with respect to proposals targeting specific governance arrangements, especially in the fields of board composition and shareholder activism. They argue that the 'comply or explain' principle should be retained and further efforts should be exercised to enhance disclosure.

Multidimensional Peacebuilding Wendy Kroeker, 2021-01-15 Attentive to intersecting issues of colonialism, political marginalization, and ethnic diversity, this book examines the crucial role that local actors play in working towards sustainable peace in Mindanao, Philippines. Interviewees include both those involved in the formal peace process between the Bangsamoro people and the government of the Philippines, as well as those who have worked more broadly in building a local culture of peace through activities such as education, dialogues, awareness-building, or social reconciliation. This book provides provocative insights for multidimensional peacebuilding strategies in conflict-impacted communities, regions, and nations.

Paisanos Chinos Fredy Gonzalez, 2017-05-09 Paisanos Chinos tracks Chinese Mexican transnational political activities in the wake of the anti-Chinese campaigns that crossed Mexico in 1931. Threatened by violence, Chinese Mexicans strengthened their ties to China—both Nationalist and Communist—as a means of safeguarding their presence. Paisanos Chinos illustrates the ways in which transpacific ties helped Chinese Mexicans make a claim to belonging in Mexico and challenge traditional notions of Mexican identity and nationhood. From celebrating the end of World War II alongside their neighbors to carrying out an annual community pilgrimage to the Basílica de Guadalupe, Chinese Mexicans came out of the shadows to refute longstanding caricatures and integrate themselves into Mexican society.

Africa's Information Revolution James T. Murphy, Pádraig R. Carmody, 2015-04-20 Africa's Information Revolution was recently announced as the 2016 prizewinner of the Royal Academy for Overseas Sciences - congratulations to the authors James T. Murphy and Pádraig Carmody! Africa's Information Revolution presents an in-depth examination of the development and economic geographies accompanying the rapid diffusion of new ICTs in Sub-Saharan Africa. Represents the first book-length comparative case study ICT diffusion in Africa of its kind Confronts current information and communication technologies for development (ICT4D) discourse by providing a counter to largely optimistic mainstream perspectives on Africa's prospects for m- and e-development Features comparative research based on more than 200 interviews with firms from a manufacturing and service industry in Tanzania and South Africa Raises key insights regarding the structural challenges facing Africa even in the context of the continent's recent economic growth spurt Combines perspectives from economic and development geography and science and technology studies to demonstrate the power of integrated conceptual-theoretical frameworks Include maps, photos, diagrams and tables to highlight the concepts, field research settings, and key findings

Localizing and Transnationalizing Contentious Politics, 2009-08-16 The Philippines makes an interesting case for

examining direct and collective acts of contention against the neoliberal project of economic globalization. Crippled by foreign debt, indiscriminate liberalization of trade, falling stock markets, and perpetual corruption, the Philippines is also a democratic polity and one of the few countries in Asia with a vibrant and dynamic civil society sector. This collection has chapters on the Freedom from Debt Coalition's campaign on debt relief, the Stop-the-New-Round Coalition's advocacy to change international trade rules and barriers, the global taxation initiative as embodied in Tobin tax advocacy in the country, the Transparency and Accountability Network's anti-corruption effort, and the Philippine Fair Trade Forum's enterprise on fair trade. *Localizing and Transnationalizing Contentious Politics* is the first work of its kind to focus on five global civil society movements in the Philippines and their responses to the inequities of neoliberal globalization. Northern scholars have acknowledged the persistent absence of the South in research on activism around global issues, and this book can help fill this gap. Using political process theory as a framework, the book traces the emergence, development and diffusion of these social movements in the Philippines. Globalization is taken as the environment in which they operate to highlight the role of increased interdependence and internationalization, and the predominance of a particular ideology in the dynamics of contention.

Mississippi River Tragedies Christine A Klein, Sandra B Zellmer, 2017-08-01 Read a free excerpt here! American engineers have done astounding things to bend the Mississippi River to their will: forcing one of its tributaries to flow uphill, transforming over a thousand miles of roiling currents into a placid staircase of water, and wresting the lower half of the river apart from its floodplain. American law has aided and abetted these feats. But despite our best efforts, so-called “natural disasters” continue to strike the Mississippi basin, as raging floodwaters decimate waterfront communities and abandoned towns literally crumble into the Gulf of Mexico. In some places, only the tombstones remain, leaning at odd angles as the underlying soil erodes away. *Mississippi River Tragedies* reveals that it is seductively deceptive—but horribly misleading—to call such catastrophes “natural.” Authors Christine A. Klein and Sandra B. Zellmer present a sympathetic account of the human dreams, pride, and foibles that got us to this point, weaving together engaging historical narratives and accessible law stories drawn from actual courtroom dramas. The authors deftly uncover the larger story of how the law reflects and even amplifies our ambivalent attitude toward nature—simultaneously revering wild rivers and places for what they are, while working feverishly to change them into something else. Despite their sobering revelations, the authors’ final message is one of hope. Although the acknowledgement of human responsibility for unnatural disasters can lead to blame, guilt, and liability, it can also prod us to confront the consequences of our actions, leading to a liberating sense of possibility and to the knowledge necessary to avoid future disasters.

Study on Challenges in the Development of Local Equality Indicators Klaus Starl, Jennifer Pinno, 2010-12-31

Managing Regional Energy Vulnerabilities in East Asia Daojiong Zha, 2013-08-29 This book examines East Asia’s

inter-state collaborative energy projects to address energy vulnerability. It focuses on projects that have demonstrated effectiveness in addressing vulnerabilities faced by the ten states of the Association of Southeast Asian Nations and China, Japan, and South Korea in Northeast Asia. Including case studies on uncertainties in external sources of oil and gas supply, maritime piracy, continuation of energy poverty, and geographical barriers to cross-border electricity interconnection, expert contributors highlight how collaborative energy projects have been more successful than the traditional state rivalry in energy-related issues. The book develops the framework of energy vulnerability, avoiding usual securitization approaches, instead examining non-traditional security conceptualizations in studying energy policies to examine how issue-specific cooperation efforts between states arise and develop. Using East Asia as a starting point, contributors introduce a framework that advances the study of international energy cooperation. *Managing Regional Energy Vulnerabilities in East Asia* will be of interest to students and scholars of Asian studies, sociology, development studies, and international political economy particularly the political economy of East Asia, energy and development studies, regional and global governance of energy and the environmental economics.

Analysis and Application of Analog Electronic Circuits to Biomedical Instrumentation, Second Edition Robert B. Northrop, 2012-03-02 *Analysis and Application of Analog Electronic Circuits to Biomedical Instrumentation, Second Edition* helps biomedical engineers understand the basic analog electronic circuits used for signal conditioning in biomedical instruments. It explains the function and design of signal conditioning systems using analog ICs—the circuits that enable ECG, EEG, EMG, ERG, tomographic images, biochemical spectrograms, and other crucial medical applications. This book demonstrates how op amps are the keystone of modern analog signal conditioning system design and illustrates how they can be used to build instrumentation amplifiers, active filters, and many other biomedical instrumentation systems and subsystems. It introduces the mathematical tools used to describe noise and its propagation through linear systems, and it looks at how signal-to-noise ratios can be improved by signal averaging and linear filtering. Features Analyzes the properties of photonic sensors and emitters and the circuits that power them Details the design of instrumentation amplifiers and medical isolation amplifiers Considers the modulation and demodulation of biomedical signals Examines analog power amplifiers, including power op amps and class D (switched) PAs Describes wireless patient monitoring, including Wi-Fi and Bluetooth communication protocols Explores RFID, GPS, and ultrasonic tags and the design of fractal antennas Addresses special analog electronic circuits and systems such as phase-sensitive rectifiers, phase detectors, and IC thermometers By explaining the building blocks of biomedical systems, the author illustrates the importance of signal conditioning systems in the devices that gather and monitor patients' critical medical information. Fully revised and updated, this second edition includes new chapters, a glossary, and end-of-chapter problems. What's New in This Edition Updated and revised material throughout the book A chapter on the applications, circuits, and characteristics of power amplifiers A chapter on wireless

patient monitoring using UHF telemetry A chapter on RFID tags, GPS tags, and ultrasonic tags A glossary to help you decode the acronyms and terms used in biomedical electronics, physiology, and biochemistry New end-of-chapter problems and examples

Transboundary Pollution S. Jayakumar, Tommy Koh, Robert Beckman, Hao Duy Phan, 2015-05-29 This important new book provides a comprehensive overview of the international legal principles governing transboundary pollution. Can Microfinance Work? Lesley Sherratt, 2016 Can Microfinance Work? presents a thorough-going and nuanced ethical assessment of the microfinance industry, drawing on the author's expertise in the fields of finance and applied ethics. That comprehensive analysis is then used to ground concrete policy proposals, some quite radical, to improve both microfinance's ethical balance and its overall effectiveness.
