A Decadal Survey of the Social and Behavioral Sciences National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on a Decadal Survey of Social and Behavioral Sciences for Applications to National Security, 2019-07-26
The primary function of the intelligence analyst is to make sense of information about the world, but the way analysts do that work will look profoundly different a decade from now. Technological changes will bring both new advances in conducting analysis and new risks related to technologically based activities and communications around the world. Because these changes are virtually inevitable, the Intelligence Community will need to make sustained collaboration with researchers in the social and behavioral sciences (SBS) a key priority if it is to adapt to these changes in the most productive ways. A Decadal Survey Of The Social and Behavioral Sciences provides guidance for a 10-year research agenda. This report identifies key opportunities in SBS research for strengthening intelligence analysis and offers ideas for integrating the knowledge and perspectives of researchers from these fields into the planning and design of efforts to support intelligence analysis.

The SAGE Encyclopedia of Quality and the Service Economy Su Mi Dahlgaard-Park, 2015-05-29 Society, globally, has entered into what might be called the service economy. Services now constitute the largest share of GDP in most countries and provide the major source of employment in both developed and developing countries. Services permeate all aspects of peoples' lives and are becoming inseparable from most aspects of economic activity. Quality management has been a dominating managerial practice since World War II. With quality management initially associated with manufacturing industries, one might assume the relevance of quality management might decrease with the emergence of the service economy. To the contrary, the emergence of the service economy strengthened the importance of quality issues, which no longer are associated only with manufacturing industries but are increasingly applied in all service sectors, as well. Today,

we talk not only about product or service quality but have even expanded the framework of quality to quality of life and quality of environment. Thus, quality and services have emerged in parallel as closely interrelated fields. The Encyclopedia of Quality and the Service Economy explores such relevant questions as: What are the characteristics, nature, and definitions of quality and services? How do we define quality of products, quality of services, or quality of life? How are services distinguished from goods? How do we measure various aspects of quality and services? How can products and service quality be managed most effectively and efficiently? What is the role of customers in creation of values? These questions and more are explored within the pages of this two-volume, A-to-Z reference work.

Visual Global Politics Roland Bleiker, 2018-02-13 We live in a visual age. Images and visual artefacts shape international events and our understanding of them. Photographs, film and television influence how we view and approach phenomena as diverse as war, diplomacy, financial crises and election campaigns. Other visual fields, from art and cartoons to maps, monuments and videogames, frame how politics is perceived and enacted. Drones, satellites and surveillance cameras watch us around the clock and deliver images that are then put to political use. Add to this that new technologies now allow for a rapid distribution of still and moving images around the world. Digital media platforms, such as Twitter, YouTube, Facebook and Instagram, play an important role across the political spectrum, from terrorist recruitment drives to social justice campaigns. This book offers the first comprehensive engagement with visual global politics. Written by leading experts in numerous scholarly disciplines and presented in accessible and engaging language, Visual Global Politics is a one-stop source for students, scholars and practitioners interested in understanding the crucial and persistent role of images in today's world.

Pediatric Nutrition in Practice B. Koletzko, J. Bhatia, Z.A. Bhutta, P. Cooper, M. Makrides, R. Uauy, W. Wang, 2015-04-17 There is no other time in life when the provision of adequate and balanced nutrition is of greater importance than during infancy and childhood. During this dynamic phase characterized by rapid growth, development and developmental plasticity, a sufficient amount and appropriate composition of nutrients both in health and disease are of key importance for growth, functional outcomes such as cognition and immune response, and the metabolic programming of long-term health and well-being. This compact reference text provides concise information to readers who seek quick guidance on practical issues in the nutrition of infants, children and adolescents. After the success of the first edition, which sold more than 50'000 copies in several languages, the editors prepared this thoroughly revised and updated second edition which focuses again on nutritional challenges in both affluent and poor populations around the world. Serving as a practical reference guide, this book will contribute to further improving the quality of feeding of healthy infants and children, as well as enhancing the standards of nutritional care in sick children.

Creating Interdisciplinarity Lisa R. Lattuca, 2001 Interdisciplinarity, a favorite buzzword of faculty and administrators, has been appropriated to describe so many academic pursuits that it is virtually meaningless. With a writing style that is accessible, fluid, and engaging, Lisa Lattuca remedies this confusion with an original conceptualization of interdisciplinarity based on interviews with faculty who are engaged in its practice. Whether exploring the connections between apparently related disciplines, such as English and women's studies, or such seemingly disparate fields as economics and theology, Lattuca moves away from previous definitions based on the degrees of integration across disciplines and instead focuses on the nature of the inquiry behind the work. She organizes her findings around the processes through which faculty pursue interdisciplinarity, the contexts (institutional, departmental, and disciplinary) in which faculty are working, and the ways in which those contexts relate to and affect the interdisciplinary work. Her findings result in useful suggestions for individuals concerned with the meaning of faculty work, the role and impact of disciplines in academe today, and the kinds of issues that should guide the evaluation of faculty scholarship.

Proceedings of the 5th International Symposium on Asphalt Pavements & Environment (APE) Marco Pasetto, Manfred N. Partl, Gabriele Tebaldi, 2019-08-29 This volume highlights the latest advances, innovations, and applications in the field of asphalt pavement technology, as presented by leading international researchers and engineers at the 5th International Symposium on Asphalt Pavements & Environment (ISAP 2019 APE Symposium), held in Padua, Italy on September 11-13, 2019. It covers a diverse range of topics concerning materials and technologies for asphalt pavements, designed for sustainability and environmental compatibility: sustainable pavement materials, marginal materials for asphalt pavements, pavement structures, testing methods and performance, maintenance and management methods, urban heat island mitigation, energy harvesting, and Life Cycle Assessment. The contributions, which were selected by means of a rigorous international peer-review process, present a wealth of exciting ideas that will open novel research directions and foster multidisciplinary collaboration among different specialists.

Stress Echocardiography Eugenio Picano, 2023-10-19 This is the seventh edition of a long-selling book (first edition 1991) that was translated into Italian, French, Chinese, Portuguese, Spanish, English. In the last ten years, stress echocardiography has exploded in its breadth and variety of applications. From a one-fits-all approach (wall motion by 2D-echo in the patient with known or suspected coronary artery disease), the field has progressed to an omnivorous, next-

generation laboratory employing a variety of technologies (from M-Mode to 2D, from pulsed, continuous, color and tissue Doppler to lung ultrasound) on patients covering the entire spectrum of severity (from elite athletes to patients with end-stage heart failure) and ages (from children with congenital heart disease to the elderly with aortic stenosis). This new edition is enriched with over 300 figures, 150 tables and video-clips. In a societal and economic climate of increasing pressure for appropriate, justified and optimized imaging, stress echocardiography offers the great advantages of being radiation-free, relatively low cost, with minimal environmental impact, and with a staggering versatility: we can get more (information) with less (cost and risk). The volume will be a tremendous aid to current best practices for all health operators who intend to use stress echocardiography and ultrasound for diagnosis and guidance of optimal management in their patients.

Routledge Handbook of Tourism Cities Alastair M. Morrison, J. Andres Coca-Stefaniak, 2020-08-27 The Routledge Handbook of Tourism Cities presents an up-to-date, critical and comprehensive overview of established and emerging themes in urban tourism and tourist cities. Offering socio-cultural perspectives and multidisciplinary insights from leading scholars, the book explores contemporary issues, challenges and trends. Organised into four parts, the handbook begins with an introductory section that explores contemporary issues, challenges and trends that tourism cities face today. A range of topics are explored, including sustainable urban tourism, overtourism and urbanisation, the impact of terrorism, visitor-host interactions, as well as reflections on present and future challenges for tourism cities. In Part II the marketing, branding and markets for tourism cities are considered, exploring topics such as destination marketing and branding, business travellers and exhibition hosting. This section combines academic scholarship with real-life practice and case studies from cities. Part III discusses product and technology developments for tourism cities, examining their supply and impact on different travellers, from open-air markets to creative waterfronts, from social media to smart cities. The final Part offers examples of how urban tourism is developing in different parts of the world and how worldwide tourism cities are adapting to the challenges ahead. It also explores emerging forms of specialist tourism, including geology and ecology-based tourism, socialist heritage and post-communist destination tourism. This handbook fills a notable gap by offering a critical and detailed understanding of the diverse elements of the tourist experience today. It contains useful suggestions for practitioners, as well as examples for theoretical frameworks to students in the fields of urban tourism and tourism cities. The handbook will be of interest to scholars and students working in urban tourism, heritage studies, human geography, urban studies and urban planning, sociology, psychology and business studies.

An Assessment of the Prospects for Inertial Fusion Energy National Research Council, Division on Engineering and

Physical Sciences, Board on Energy and Environmental Systems, Board on Physics and Astronomy, Committee on the Prospects for Inertial Confinement Fusion Energy Systems, 2013-07-05 The potential for using fusion energy to produce commercial electric power was first explored in the 1950s. Harnessing fusion energy offers the prospect of a nearly carbon-free energy source with a virtually unlimited supply of fuel. Unlike nuclear fission plants, appropriately designed fusion power plants would not produce the large amounts of high-level nuclear waste that requires long-term disposal. Due to these prospects, many nations have initiated research and development (R&D) programs aimed at developing fusion as an energy source. Two R&D approaches are being explored: magnetic fusion energy (MFE) and inertial fusion energy (IFE). An Assessment of the Prospects for Inertial Fusion Energy describes and assesses the current status of IFE research in the United States; compares the various technical approaches to IFE; and identifies the scientific and engineering challenges associated with developing inertial confinement fusion (ICF) in particular as an energy source. It also provides guidance on an R&D roadmap at the conceptual level for a national program focusing on the design and construction of an inertial fusion energy demonstration plant.

Rio 2016 Andrew Zimbalist, 2017-09-12 A clear-eyed, critical examination of the social, political, and economic costs of hosting the 2016 summer Olympics The selection of Rio de Janeiro as the site of the summer 2016 Olympic Games set off jubilant celebrations in Brazil—and created enormous expectations for economic development and the advancement of Brazil as a major player on the world stage. Although the games were held without major incident, the economic, environmental, political, and social outcomes for Brazil ranged from disappointing to devastating. Corruption scandals trimmed the fat profits that many local real estate developers had envisioned, and the local government was driven into bankruptcy. At the other end of the economic spectrum, some 77,000 residents of Rio's poorest neighborhoods—the favelas—were evicted and forced to move, in many cases as far as 20 or 30 miles to the west. Hosting the games ultimately cost Brazil \$20 billion, with little positive to show for the investment. Rio 2016 assembles the views of leading experts on Brazil and the Olympics into a clear-eyed assessment of the impact of the games on Brazil in general and on the lives of Cariocas, as Rio's residents are known. Edited by sports economist Andrew Zimbalist, the other contributors include Juliana Barbassa, Jules Boykoff, Jamil Chade, Stephen Essex, Renata Latuf, and Theresa Williamson.

Mobile Mapping Clancy Wilmott,2020 This book argues for a theory of mobile mapping, a situated and spatial approach towards researching how everyday digital mobile media practices are bound up in global systems of knowledge and power. Drawing from literature in media studies and geography -- and the work of Michel Foucault and Doreen Massey -- it examines how geographical and historical material, social, and cultural conditions are embedded in the way in which contemporary (digital) cartographies are read, deployed, and engaged. This is explored through seventeen walking interviews in Hong Kong and Sydney, as potent discourses like cartographic reason continue to transform and weave through the world in ways that haunt mobile mapping and bring old conflicts into new media. In doing so, Mobile Mapping offers an interdisciplinary rethinking about how multiple translations of spatial knowledges between rational digital epistemologies and tacit ways of understanding space and experience might be conceptualized and researched.

Handbook of Novel Psychoactive Substances Ornella Corazza,Andres Roman-Urrestarazu,2018-10-10 Handbook of Novel Psychoactive Substances (NPS) provides a comprehensive overview of the challenges that clinicians face when dealing with NPS and discusses how the profile of patients and their socio-demographic characteristics frame the serious public health concern that NPS pose. It presents various clinical cases, as well as detailed accounts of symptoms, psychopathology, toxicity, and overall clinical management that NPS require. This handbook brings together a unique collection of chapters written by leading experts in the field, who have felt the need to share their knowledge and experience to improve the clinical practice on NPS and the wellbeing of their patients.

Lets delve into the realm of popular books, exploring the fascinating narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover "It Ends with Us" This heartfelt tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. 1279 Sbs Admission List For 2018 2019 Session : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters

transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. 1279 Sbs Admission List For 2018 2019 Session : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and gripping novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
