OECD Reviews of Regulatory Reform Risk and Regulatory Policy Improving the Governance of Risk OECD,2010-05-06

This publication presents recent OECD papers on risk and regulatory policy. They offer measures for developing, or improving, coherent risk governance policies.

**Border Management Modernization** Gerard McLinden, Enrique Fanta, David Widdowson, Tom Doyle, 2010-11-30 Border clearance processes by customs and other agencies are among the most important and problematic links in the global supply chain. Delays and costs at the border undermine a country's competitiveness, either by taxing imported inputs with deadweight inefficiencies or by adding costs and reducing the competitiveness of exports. This book provides a practical guide to assist policy makers, administrators, and border management professionals with information and advice on how to improve border management systems, procedures, and institutions.

*Transition and Coherence in Intellectual Property Law* Niklas Bruun, Graeme B. Dinwoodie, Marianne Levin, Ansgar Ohly, 2021-01-07 This volume is for students and scholars of intellectual property law, practitioners seeking creative arguments from across the field, and policymakers searching for solutions to changing social and technological issues. The book explores the tensions between two fundamentally competing demands made of IP law.

*Tattooed Skin and Health* J. Serup, N. Kluger, W. Bäuml, 2015-03-26 With about 10-20% of the adult population in Europe being tattooed, there is a strong demand for publications discussing the various issues related to tattooed skin and health. Until now, only a few scientific studies on tattooing have been published. This book discusses different aspects of the various medical risks associated with tattoos, such as allergic reactions from red tattoos, papulo-nodular reactions from black tattoos as well as technical and psycho-social complications, in addition to bacterial and viral infections. Further sections are dedicated to the composition of tattoo inks, and a case is made for the urgent introduction of national and international regulations. Distinguished authors, all specialists in their particular fields, have contributed to this publication which provides a comprehensive view of the health implications associated with tattooing. The book covers a broad range of topics that will be of interest to clinicians and nursing staff, toxicologists and regulators as well as laser surgeons who often face

the challenge of having to remove tattoos, professional tattooists and producers of tattoo ink.

**Culture Media, Solutions, and Systems in Human ART** Patrick Quinn, 2014-03-27 Detailed discussion of the history, current status and significance of ART media and the culture systems for their use.

Medical Devices and the Public's Health Institute of Medicine, Board on Population Health and Public Health Practice, Committee on the Public Health Effectiveness of the FDA 510(k) Clearance Process, 2011-10-25 Medical devices that are deemed to have a moderate risk to patients generally cannot go on the market until they are cleared through the FDA 510(k) process. In recent years, individuals and organizations have expressed concern that the 510(k) process is neither making safe and effective devices available to patients nor promoting innovation in the medical-device industry. Several high-profile mass-media reports and consumer-protection groups have profiled recognized or potential problems with medical devices cleared through the 510(k) clearance process. The medical-device industry and some patients have asserted that the process has become too burdensome and is delaying or stalling the entry of important new medical devices to the market. At the request of the FDA, the Institute of Medicine (IOM) examined the 510(k) process. Medical Devices and the Public's Health examines the current 510(k) clearance process and whether it optimally protects patients and promotes innovation in support of public health. It also identifies legislative, regulatory, or administrative changes that will achieve the goals of the 510(k) clearance process. Medical Devices and the Public's Health recommends that the U.S. Food and Drug Administration gather the information needed to develop a new regulatory framework to replace the 35-year-old 510(k) clearance process for medical devices. According to the report, the FDA's finite resources are best invested in developing an integrated premarket and postmarket regulatory framework.

*OECD Reviews of Regulatory Reform*, 1999

**Rethinking EU Consumer Law** Geraint Howells, Christian Twigg-Flesner, Thomas Wilhelmsson, 2017-07-28 In Rethinking EU Consumer Law, the authors analyse the development of EU consumer law on the basis of a number of clear themes, which are then traced through specific areas. Recurring themes include the artificiality of the EU's consumer image, the problems created by the drive towards maximum harmonisation, and the unexpected effects EU Consumer Law has had on national law. The book argues that EU Consumer Law has the potential of enhancing the protecting of consumers throughout the EU and could offer a model for consumer law elsewhere in the world, but in order to unlock this potential, there needs to be a rethink with regard to the EU's approach to consumer law and policy.

**Law and the Semantic Web** V. Richard Benjamins, Pompeu Casanovas, Joost Breuker, Aldo Gangemi, 2005-02-09 by Roberto Cencioni At the Lisbon Summit in March 2000, European heads of state and government set a new goal for the European Union — to become the most competitive knowledge-based society in the world by 2010. As part of this objective, ICT (information and communication technologies) services should become available for every citizen, and for all schools,

homes and businesses. The book you have in front of you is about Semantic Web technology and law. Law is something omnipresent; all citizens — at some points in their lives — have to deal with it. In addition, law involves a large group of professionals, and is a multi-billion business world wide. Information technology is important because it that can improve citizens' interaction with law, as well as improve legal professionals' work environment. Legal professionals dedicate a significant amount of their time to finding, reading, analyzing and synthesizing information in order to take decisions, and prepare advice and trials, among other tasks. As part of the "Semantic-Based Knowledge and Content Systems" Strategic Objective, the European Commission is funding projects to construct technology to make the Semantic Web vision come true. 1 The articles in this book are related to two current foci of the Strategic Objective : • Knowledge acquisition and modelling, capturing knowledge from raw information and multimedia content in webs and other distributed repositories to turn poorly structured information into machine-processable knowledge.

The european higher education area in 2012: Bologna process implantation report ,2012 The report describes the state of implementation of the Bologna Process in 2012 from various perspectives and with data ranging from 2010 to 2011 as well as with earlier trends data for some statistical figures. --Ed.

*Standing Up for Your Right(s) in Europe* Mariolina Eliantonio,Chr Backes,C. H. van Rhee,Taru Spronken,Anna Berlee,2013 The aim of this study is to provide an in-depth and objective comparative analysis of legal provisions, doctrine and case-law on locus standi before civil, criminal and administrative courts of selected legal systems, and before the EU courts. This analysis serves as the basis for several recommendations in this area--Editor.

*Global Risk Governance* Ortwin Renn,Katherine D. Walker,2008-12-18 The establishment of the International Risk Governance Council (IRGC) was the direct result of widespread concern that the complexity and interdependence of health, environmental, and technological risks facing the world was making the development and implementation of adequate risk governance strategies ever more difficult. This volume details the IRGC developed and proposed framework for risk governance and covers how it was peer reviewed as well as tested

**Restoring Tropical Forests** Stephen D. Elliott,David Blakesley,Kate Hardwick,2013 Restoring Tropical Forests is a user-friendly guide to restoring forests throughout the tropics. Based on the concepts, knowledge and innovative techniques developed at Chiang Mai University's Forest Restoration Research Unit, this book will enable improvements in existing forest restoration projects and provide a key resource for new ones. The book presents three aspects of the restoration of tropical forest ecosystems: the concepts of tropical forest dynamics and regeneration that are relevant to tropical forest restoration, proven restoration techniques and case studies of their successful application, and research methods to refine such

techniques and adapt them to local ecological and socio-economic conditions.

*Human Systems Engineering and Design III* Waldemar Karwowski, Tareq Ahram, Darko Etinger, Nikola Tanković, Redha Taiar, 2020-08-29 This book focuses on novel design and systems engineering approaches, including theories and best practices, for promoting a better integration of people and engineering systems. It covers a range of innovative topics related to: development of human-centered systems; interface design and human-computer interaction; usability and user experience; innovative materials in design and manufacturing; biomechanics and physical rehabilitation, as well as safety engineering and systems complexity. The book, which gathers selected papers presented at the 3rd International Conference on Human Systems Engineering and Design: Future Trends and Applications (IHSED 2020), held on September 22-24, 2020, at Juraj Dobrila University of Pula, in Pula, Croatia, provides researchers and practitioners with a snapshot of the state-of-the-art and current challenges in the field of human systems engineering and design.

*Knowledge Production and Contradictory Functions in African Higher Education* Nico Cloete, Peter Maassen, 2015-03-01 The dominant global discourse in higher education now focuses on world-class universities inevitably located predominantly in North America, Europe and, increasingly, East Asia. The rest of the world, including Africa, is left to play catch-up. But that discourse should focus rather on the tensions, even contradictions, between excellence and engagement with which all universities must grapple. Here the African experience has much to offer the high-participation and generously resourced systems of the so-called developed world. This book offers a critical review of that experience, and so makes a major contribution to our understanding of higher education.

*Trends and Issues in Global Tourism 2010* Roland Conrady, Martin Buck, 2010-02-04 This book offers insights into important trends and future scenarios in the global tourism and travel industry and analyses current challenges in the aviation and hospitality industry, destination management and general travel behaviour. Well-known notabilities share their points of view. For example, Norbert Walter, chief economist of the Deutsche Bank, writes about the financial crisis and its impact on the tourism industry. Top executives of international operating airlines like C. Karlitekin (Turkish Airlines), J. Hunold (Air Berlin) and E. Sims (Air New Zealand) have much to say about the future of airlines and aviation management. Corporate Social Responsibility is one of the top themes to-be and therefore a focus of this book, offering the perspective of the UN Foundation and the social inclusion concept of RUHR.2010, European Capital of Culture. The articles are based on presentations and panel discussions presented at the world's largest tourism congress, the ITB Berlin Convention.

**Renewable Energy and Sustainable Buildings** Ali Sayigh, 2019-08-30 This book contains selected papers presented during the World Renewable Energy Network's 28th anniversary congress at the University of Kingston in London. The forum highlighted the integration of renewables and sustainable buildings as the best means to combat climate change. In-depth chapters written by the world's leading experts highlight the most current research and technological breakthroughs and

discuss policy, renewable energy technologies and applications in all sectors – for heating and cooling, agricultural applications, water, desalination, industrial applications and for the transport sectors. Presents cutting-edge research in green building and renewable energy from all over the world; Covers the most up-to-date research developments, government policies, business models, best practices and innovations; Contains case studies and examples to enhance practical application of the technologies.

**Free Movement of Persons in the Enlarged European Union** Nicola Rogers, Rick Scannell, John Walsh, 2012 This work provides a detailed analysis of each provision of European Law that bears on free movement of persons and shows how the provisions have been interpreted by the European Court of Justice.
