Love and Celebrate You Marilene L. Evans,2019-05-20 When I was a young girl, I wanted to be a dancer. Two months after my retirement, I joined two Zumba classes and, two months later, a ballroom dancing class. I felt free and lighthearted doing what I wanted to do and what I'm passionate about. I also started exploring myself, and while doing so, I looked back at the hardships I had gone through in more than five decades of my life and how I evolved. I'm here more courageous and stronger to continue my life journey. I had written poems before, occasionally, and just recently discovered that I can motivate, encourage, and uplift others through my other passion: writing poetry. Poems that inspire us to rise above circumstances for no matter how hard and how many times we fall, we can get up and keep on going. It does not matter how slow or how long it takes to get back up. It is one's unfaltering spirit, will, and determination that count, giving our all on whatever we do and bringing out the best in us. Everything is within us, within our reach. It is all up to us. Peace, contentment, and happiness are decisions, and it is up to us to decide.

**3D User Interfaces** Doug Bowman,Ernst Kruijff,Joseph J. LaViola Jr.,Ivan P. Poupyrev,2004-07-26 Here's what three pioneers in computer graphics and human-computer interaction have to say about this book: "What a tour de force—everything one would want—comprehensive, encyclopedic, and authoritative." — Jim Foley "At last, a book on this important, emerging area. It will be an indispensable reference for the practitioner, researcher, and student interested in 3D user interfaces." — Andy van Dam "Finally, the book we need to bridge the dream of 3D graphics with the user-centered reality of interface design. A thoughtful and practical guide for researchers and product developers. Thorough review, great

examples.” — Ben Shneiderman As 3D technology becomes available for a wide range of applications, its successful deployment will require well-designed user interfaces (UIs). Specifically, software and hardware developers will need to understand the interaction principles and techniques peculiar to a 3D environment. This understanding, of course, builds on usability experience with 2D UIs. But it also involves new and unique challenges and opportunities. Discussing all relevant aspects of interaction, enhanced by instructive examples and guidelines, 3D User Interfaces comprises a single source for the latest theory and practice of 3D UIs. Many people already have seen 3D UIs in computer-aided design, radiation therapy, surgical simulation, data visualization, and virtual-reality entertainment. The next generation of computer games, mobile devices, and desktop applications also will feature 3D interaction. The authors of this book, each at the forefront of research and development in the young and dynamic field of 3D UIs, show how to produce usable 3D applications that deliver on their enormous promise. Coverage includes: The psychology and human factors of various 3D interaction tasks Different approaches for evaluating 3D UIs Results from empirical studies of 3D interaction techniques Principles for choosing appropriate input and output devices for 3D systems Details and tips on implementing common 3D interaction techniques Guidelines for selecting the most effective interaction techniques for common 3D tasks Case studies of 3D UIs in real-world applications To help you keep pace with this fast-evolving field, the book’s Web site, [www.3dui.org](http://www.3dui.org), will offer information and links to the latest 3D UI research and applications.

The Hindu Kush Himalaya Assessment Philippus Wester, Arabinda Mishra, Aditi Mukherji, Arun Bhakta Shrestha, 2019-01-04 This open access volume is the first comprehensive assessment of the Hindu Kush Himalaya (HKH) region. It comprises important scientific research on the social, economic, and environmental pillars of sustainable mountain development and will serve as a basis for evidence-based decision-making to safeguard the environment and advance people’s well-being. The compiled content is based on the collective knowledge of over 300 leading researchers, experts and policymakers, brought together by the Hindu Kush Himalayan Monitoring and Assessment Programme (HIMAP) under the coordination of the International Centre for Integrated Mountain Development (ICIMOD). This assessment was conducted between 2013 and 2017 as the first of a series of monitoring and assessment reports, under the guidance of the HIMAP Steering Committee: Eklabya Sharma (ICIMOD), Atiq Raman (Bangladesh), Yuba Raj Khatiwada (Nepal), Linxiu Zhang (China), Surendra Pratap Singh (India), Tandong Yao (China) and David Molden (ICIMOD and Chair of the HIMAP SC). This First HKH Assessment Report consists of 16 chapters, which comprehensively assess the current state of knowledge of the HKH region, increase the understanding of various drivers of change and their impacts, address critical data gaps and develop a set of evidence-based and actionable policy solutions and recommendations. These are linked to nine mountain priorities for the mountains and people of the HKH consistent with the Sustainable Development Goals. This book is a must-read for policy makers, academics and students interested in this important region and an essentially important resource for

contributors to global assessments such as the IPCC reports.

**Ethics in Public Administration** Patrick J. Sheeran,1993-04-30 Ethics in Public Administration provides public administrators with a theoretical knowledge of ethical principles and a practical framework for applying them. Sheeran reviews the place of ethics in philosophy, links it to political and administrative theory and practice, and analyzes the ethical theories and concepts from which ethical principles are derived. Before delving into ethics as part of philosophy, Sheeran provides the reader with a brief overview of philosophy and its principal subjects, including ontology, epistemology, and psychology. He offers several definitions of ethics, and discusses both the objectivist (absolutist) and interpretivist (situation ethics) perspectives. Sheeran focuses on the subject matter of ethics, human actions, and their morality, exploring Natural Law, man-made law, and conscience as sources for determining the morality of human action. In later chapters, he applies his discussion of ethics to such controversial policy issues as suicide, murder, abortion, sterilization, capital punishment, war, lying, and strikes. Recommended for graduate and upper division undergraduate courses in public administration, public policy, management, and administrative behavior.

**Oil and Insurgency in the Niger Delta** Cyril Obi,Siri Aas Rustad,2011-02-10 The recent escalation in the violent conflict in the Niger Delta has brought the region to the forefront of international energy and security concerns. This book analyses the causes, dynamics and politics underpinning oil-related violence in the Niger Delta region of Nigeria. It focuses on the drivers of the conflict, as well as the ways the crises spawned by the political economy of oil and contradictions within Nigeria's ethnic politics have contributed to the morphing of initially poorly coordinated, largely non-violent protests into a pan-Delta insurgency. Approaching the issue from a number of perspectives, the book offers the most up-to-date and comprehensive analysis available of the varied dimensions of the conflict. Combining empirically-based and analytic chapters, it attempts to explain the causes of the escalation in violence, the various actors, levels and dynamics involved, and the policy challenges faced with regard to conflict management/resolution and the options for peace. It also examines the role of oil as a commodity of global strategic significance, addressing the relationship between oil, energy security and development in the Niger Delta.

**They Just Don't Get It!** Leslie Yerkes,Randy Martin,2005-07-05 They Just Don't Get It! explores an all-too-common dilemma: when people around us just don't get our ideas. Through a charming illustrated fable, it tells the story of Julie Buffet, a hard-charging advertising executive with what she thinks is a fantastic idea for a new campaign. But nobody gets it- not the client, not her boss, and not her coworkers. And Julie can't understand why. We have all found ourselves in this situation at one time or another, and we typically see this problem as a failing on the part of the other party. They Just Don't Get It! shows that when they don't get it, the problem is really with ourselves. And it shows how we can finally really get it. If you've ever wondered why your ideas haven't been received or acted on in the way you expected, this book will reveal your own personal responsibility in helping others understand your intentions. Examining the root source of the problem, it details five keys to getting it-Take Responsibility; Practice Humility; Begin with Questions; Remain Open; and Believe They Can. These five simple steps will enable you to overcome the problem, and prevent it from happening in the future. They Just Don't Get It! will teach you how to communicate your ideas better, and how to motivate others to pull together and achieve your highest goals in any situation.

**Advances in Petroleum Technology** Subrata Borgohain Gogoi,2020-11-25 An impending energy crisis is looming globally, which has led to the use of effluents from paper mills for enhanced oil recovery (EOR), CO2 flooding and wastewater treatment by biosurfactants, and the current market demand for cost-competitive and environment-friendly alternatives to synthetic chemicals. This up-to-date book on petroleum technology provides a comprehensive review of the background and recent advances in the field of petroleum technology and highlights various facets of the fascinating world of upstream, midstream and downstream petroleum technologies. It comprises 25 chapters, each representing the progress, prospects and challenges in petroleum research, and focuses on the tremendous progress made by the scientific community in this research field. The book covers in detail EOR processes, reservoir engineering, production operation and optimisation, pipeline transportation and storage, CO2 capture and sequestration, wastewater management and innovative treatment, refining technologies, environmental chemistry, and biochemistry and biotechnology for the petroleum industry.
