Strategic Communication Management for Development and Social Change Tsietsi Mmutle, Tshepang Bright Molale, Olanrewaju Olugbenga Akinola, Olebogeng Selebi, 2023-12-13 This book is the first of its kind within the African region to combine scholarly perspectives from the fields of Strategic Communication Management and Communication for Development and Social Change. It draws insights from scholars across the African continent by unravelling the complementary nature of scholarship between the two fields, through the lens of prevailing governance and sustainability challenges facing African countries, today. This edited volume covers issues that have adversely affected the achievement of goals related to humanitarian upliftment, development and social change for all African nations. Consequently, citizen participation, which lies at the heart of these challenges when considering the question of sustainable governance and policy development for social change in an African context is addressed. To this end, a reflection is also made on various case studies that exist where local citizens do not inform sustainable development programmes, while the promotion of bottom-up development and social change is largely replaced by top-down instrumental action approaches and hemispheric communication instead of strategic communication. Themes explored include: ● Communication for social change, bottom-up development and social movements in the local government sphere ● Strategic communication in governance, planning and policy reforms ● The role of multi-stakeholder partnerships in achieving development of objectives geared towards good governance in Africa ● Public participation, protests, and resistance from 'below' ● Public sector health communications and development ● Media relations, accountability and contested development narratives with the Fourth Estate ● Social media and eParticipation in government development programs.

The Hindu Kush Himalaya Assessment Philippus Wester,Arabinda Mishra,Aditi Mukherji,Arun Bhakta Shrestha,2019-01-04 This open access volume is the first comprehensive assessment of the Hindu Kush Himalaya (HKH) region. It comprises important scientific research on the social, economic, and environmental pillars of sustainable mountain development and will serve as a basis for evidence-based decision-making to safeguard the environment and advance people's well-being. The compiled content is based on the collective knowledge of over 300 leading researchers, experts and policymakers, brought together by the Hindu Kush Himalayan Monitoring and Assessment Programme (HIMAP) under the coordination of the International Centre for Integrated Mountain Development (ICIMOD). This assessment was conducted between 2013 and 2017 as the first of a series of monitoring and assessment reports, under the guidance of the HIMAP Steering Committee: Eklabya Sharma (ICIMOD), Atiq Raman (Bangladesh), Yuba Raj Khatiwada (Nepal), Linxiu Zhang (China), Surendra Pratap Singh (India), Tandong Yao (China) and David Molden (ICIMOD and Chair of the HIMAP SC). This First HKH Assessment Report consists of 16 chapters, which comprehensively assess the current state of knowledge of the HKH region, increase the understanding of various drivers of change and their impacts, address critical data gaps and develop a set of evidence-based and actionable policy solutions and recommendations. These are linked to nine mountain priorities for the mountains and people of the HKH consistent with the Sustainable Development Goals. This book is a must-read for policy makers, academics and students interested in this important region and an essentially important resource for contributors to global assessments such as the IPCC reports.

Environmental Physiology of Animals Pat Willmer,Graham Stone,Ian Johnston,2009-03-12 The new and updated edition of this accessible text provides a comprehensive overview of the comparative physiology of animals within an environmental context. Includes two brand new chapters on Nerves and Muscles and the Endocrine System. Discusses both comparative systems physiology and environmental physiology. Analyses and integrates problems and adaptations for each kind of environment: marine, seashore and estuary, freshwater, terrestrial and parasitic. Examines mechanisms and responses beyond physiology. Applies an evolutionary perspective to the analysis of environmental adaptation. Provides modern molecular biology insights into the mechanistic basis of adaptation, and takes the level of analysis beyond the cell to the membrane, enzyme and gene. Incorporates more varied material from a wide range of animal types, with less of a focus purely on terrestrial reptiles, birds and mammals and rather more about the spectacularly successful strategies of invertebrates. The Purchasing Chessboard Christian Schuh, Joseph L. Raudabaugh, Robert Kromoser, Michael F. Strohmer, Alenka Triplat, 2011-11-27 The approach used on a given spend item should largely depend on the balance between supply power

and demand power. That is the logic behind the bestselling Purchasing Chessboard®, used by hundreds of corporations worldwide to reduce costs and increase value with suppliers. The 64 squares in the Purchasing Chessboard provide a rich reservoir of methods that can be applied either individually or combined. And because many of these methods are not customarily used by procurement, the Purchasing Chessboard is also the perfect tool for helping buyers to think and act outside the box and find new solutions. A well-proven concept that works across all industries and all categories in any given situation, it is little wonder that business leaders and procurement professionals alike are excited by, and enjoy strategizing around, the Purchasing Chessboard. This second edition of The Purchasing Chessboard addresses the new realities of a highly volatile economic environment and describes the many—sometimes surprising—ways in which the Purchasing Chessboard is being used in today's business world. Yet despite all of the great achievements of procurement executives and their teams, they do not always receive the recognition they deserve. In response, the authors have developed and outlined within the book an unequivocal approach to measure procurement's impact on a company's performance—Return on Supply Management Assets (ROSMA®).

Shipping and Ports in the Twenty-first Century David Pinder, Brian Slack, 2004-05-20 The rapid change of pace in the global economy and the importance of understanding the roles played by port and shipping systems in both enabling and responding to this economic dynamism provides the rationale for this new book.

Oil and Insurgency in the Niger Delta Cyril Obi,Siri Aas Rustad,2011-02-10 The recent escalation in the violent conflict in the Niger Delta has brought the region to the forefront of international energy and security concerns. This book analyses the causes, dynamics and politics underpinning oil-related violence in the Niger Delta region of Nigeria. It focuses on the drivers of the conflict, as well as the ways the crises spawned by the political economy of oil and contradictions within Nigeria's ethnic politics have contributed to the morphing of initially poorly coordinated, largely non-violent protests into a pan-Delta insurgency. Approaching the issue from a number of perspectives, the book offers the most up-to-date and comprehensive analysis available of the varied dimensions of the conflict. Combining empirically-based and analytic chapters, it attempts to explain the causes of the escalation in violence, the various actors, levels and dynamics involved, and the policy challenges faced with regard to conflict management/resolution and the options for peace. It also examines the role of oil as a commodity of global strategic significance, addressing the relationship between oil, energy security and development in the Niger Delta.

EXTREMOPHILES - Volume I Nicolas Glansdorff,2009-11-05 Extremophiles is a component of Encyclopedia of Biological, Physiological and Health Sciences in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. The extremophiles represent some of the most fascinating organisms on Earth for the simple reason that they inhabit extreme environments characterized by physical and (or) chemical properties which render them totally inhospitable for most of the other organisms. The work has been sub-divided into 6 main topics related to the above mentioned environmental conditions. These topics consist of a general introduction and of several more specialized chapters that have been written by scientists prominent in the field. The chapters cover the description of the biotopes and inhabiting species, their specific characteristics as well as what we know about the molecular mechanisms which constitute the fundamentals of the resistance and adaptation of extremophiles to extreme conditions. The theme

“Extremophiles” is headed by two chapters introducing the subject for non-specialists in the field, one covering the basic concepts and the other one giving an overview of the biotopes. These three volumes are aimed at the following five major target audiences: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers and NGOs.

Legumes for Soil Health and Sustainable Management Ram Swaroop Meena, Anup Das, Gulab Singh Yadav, Rattan Lal, 2018-07-06 Sustainable management of soils is an important global issue of the 21st century. Feeding roughly 8 billion people with an environmentally sustainable production system is a major challenge, especially considering the fact that 10% of the world’s population at risk of hunger and 25% at risk of malnutrition. Accordingly, the 68th United Nations (UN) general assembly declared 2016 the “International Year of Pulses” to raise awareness and to celebrate the role of pulses in human nutrition and welfare. Likewise, the assembly declared the year 2015 as the “International Year of Soils” to promote awareness of the role of “healthy soils for a healthy life” and the International Union of Soil Science (IUSS) has declared 2015-2024 as the International Decade of Soils. Including legumes in cropping systems is an important toward advancing soil sustainability, food and nutritional security without compromising soil quality or its production potential. Several textbooks and edited volumes are currently available on general soil fertility or on legumes but, to date, none have been dedicated to the study of “Legumes for Soil Health and Sustainable Management”. This is important aspect, as the soil, the epidermis of the Earth (geoderma), is the major component of the terrestrial biosphere. This book explores the impacts of legumes on soil health and sustainability, structure and functioning of agro-ecosystems, agronomic productivity and food security, BNF, microbial transformation of soil N and P, plant-growth-promoting rhizobacteria, biofertilizers, etc. With the advent of fertilizers, legumes have been sidelined since World War II, which has produced serious consequences for soils and the environment alike. Therefore, legume-based rational cropping/soil management practices must support environmentally and economically sustainable agroecosystems based on (sequential) rotation and intercropping considerations to restore soil health and sustainability. All chapters are amply illustrated with appropriately placed data, tables, figures, and photographs, and supported with extensive and cutting-edge references. The editors have provided a roadmap for the sustainable development of legumes for food and nutritional security and soil sustainability in agricultural systems, offering a unique resource for teachers, researchers, and policymakers, as well as undergraduate and graduate students of soil science, agronomy, ecology, and the environmental sciences.

Religion in Contemporary Nigeria Y.A. Quadri, 2016-04-30 The dynamism of religion all over the world presupposes that discourse on it generally is a continuous exercise. As religion influences the environment of its operation so also is the influence of the environment on the practice of religion. Nigeria, a multi-religious nation has experienced and is still experiencing the positive as well the negative aspects of religious practices in her socio-political, economic and cultural

spheres. There is no doubt that religion is manipulated by some people, which portray it in bad light and makes it vulnerable to criticisms despite the unanimity about its potential to be a force for good in the society. Recent developments in Nigeria indicate that religion has a role in the survival or otherwise of the country. Such include the re-introduction of Sharicah penal code in some states in the northern part of the country, the emergence of Islamic banks, proliferation of private faith-based tertiary institutions, emergence of different factions and sects in religions and the challenge of insurgency using religion as camouflage in the name of the Boko Haram. This book addresses contemporary issues in the use of religion in Nigeria. Its uniqueness lies in the calibre of notable scholars who contributed to it from various ethno-religious and geographical backgrounds. It contains the views of eminent scholars from Islam and Christianity and is jointly edited by experienced professors in the two faiths. The overall aim is to enhance better understanding of religion and to promote peaceful co-existence between and among adherents of the two religions.

Antimicrobials in Pharmaceutical and Medicinal Research Arti Gupta, RAM PRASAD, 2023-04-03 The need for state-of-the-art antimicrobial agents is greater than ever because of the development of multidrug resistance in communal pathogens, the rapid rise of new infections, and the potential for use of multidrug-resistant agents in biological protection. Although the need for novel antimicrobials is increasing, the development of such agents faces significant obstacles. Pharmaceutical research and development costs are estimated to be \$400–\$800 million per approved agent. The most important natural antimicrobial compounds derived from various plant sources containing a wide variety of secondary metabolites. With collected contributions from international subject experts, this volume focuses primarily on antimicrobials. This book deliberates recent developments in microbial science in combating infectious diseases and explores advances in antimicrobial constituents and their applications in the fight against bacteria. In addition, it also provides a variety of photographs, diagrams, and tables to help illustrate the material. The novel strategies to combat antimicrobial resistance are also described, emphasizing collaborative measures of control. We describe the concerted efforts undertaken by global communities to combat antimicrobial resistance in detail. The most efficient strategy could be a behavioural change towards indiscriminate consumption, usage, and prescription of antibiotics. Students, research scientists, academicians and policy makers can benefit from Antimicrobials in Pharmaceutical and Medicinal Research as a resource that addresses biotechnology, applied microbiology, healthcare/pharmaceutical products, medicinal plant products, and all disciplines related to antimicrobial research. Features of the book: Covers development in plant-based antimicrobials for sepsis management and progress Describes modern approaches for phyto-nanoconjugates in combating multidrug resistance in biomedicine Details methods to improve antimicrobial properties to have a longer service life in combating infection Describe bacteriocins and plant metabolites as biotechnological tools in food, pharmaceuticals and therapeutics applications Highlights natural antimicrobial therapeutic peptides Offers current and future applications of emerging antimicrobial
