Snatched Up to Heaven for Kids Arvind Paul,Jemima Paul, PH D,2021-03-09 One morning, Emma wakes up feeling excited about a very special dream. She flies up high through the clouds and comes to a beautiful land called heaven where she has all sorts of adventures. Is this just a dream, or is there something magical about her journey?

Writing and Publishing Scientific Papers Gábor Lövei,2021-05-19 Gábor Lövei's scientific communication course for students and scientists explores the intricacies involved in publishing primary scientific papers, and has been taught in more than twenty countries. Writing and Publishing Scientific Papers is the distillation of Lövei's lecture notes and experience gathered over two decades; it is the coursebook many have been waiting for. The book's three main sections correspond with the three main stages of a paper's journey from idea to print: planning, writing, and publishing. Within the book's chapters, complex questions such as 'How to write the introduction?' or 'How to submit a manuscript?' are broken down into smaller, more manageable problems that are then discussed in a straightforward, conversational manner, providing an easy and enjoyable reading experience. Writing and Publishing Scientific Papers stands out from its field by targeting scientists whose first language is not English. While also touching on matters of style and grammar, the book's main goal is to advise on first principles of communication. This book is an excellent resource for any student or scientist wishing to learn more about the scientific publishing process and scientific communication. It will be especially useful to those coming from outside the English-speaking world and looking for a comprehensive guide for publishing their work in English.

Chemistry for Sustainable Development Minu Gupta Bhowon,Sabina Jhaumeer-Laulloo,Henri Li Kam Wah,Ponnadurai Ramasami,2012-01-08 Chemistry for Sustainable Development is a collection of selected papers by the participants of the International Conference on Pure and Applied Chemistry (ICPAC 2010) on the theme of "Chemistry for Sustainable Development" held in Mauritius in July 2010. In light of the significant progresses and challenges in the development and implementation of green and sustainable chemistry, this volume reviews the recent results generated by a more efficient use of resources to minimize carbon footprints, to foster the eradication or minimisation of solvent use in chemistry, and to deliver processes which lead to increased harmony between chemistry and the environment. Chemistry for Sustainable

Development is written for graduates, postgraduates, researchers in industry and academia who have an interest in the fields ranging from fundamental to applied chemistry.

Iké Udé: Nollywood Portraits, 2016 The cinema of Nigeria, often referred to as Nollywood is a term coined in the mid-1990s to describe Nigeria's vibrant, film industry consists of movies produced in the country but watched all over Africa and largely by Africans in the diaspora. The history and development of the Nigerian motion picture industry is sometimes generally classified in four main eras: the Colonial era, Golden Age, Video film era and the emerging New Nigerian cinema. The book presents a selection of photographic portraits by Iké Udé depicting some of the major Nigerian actors and actress, television presenters, directors and producers: from Genevieve Nnaji, Alexx Ekubo and Kunle Afolayan to Gideon Okeke, Chioma Ude and Osas Ighodaro. With his ongoing photographic self-portraits, Nigerian-born Iké Udé explores a world of dualities: photographer/performance artist, artist/spectator, African/postnationalist, mainstream/ marginal, individual/everyman and fashion/art. As a Nigerian born, New York based artist, conversant with the world of fashion and celebrity, Udé gives conceptual aspects of performance and representation a new vitality, melding his own theatrical selves and multiple personae with his art.

Central Nervous System Metastases Manmeet Ahluwalia,Philippe Metellus,Riccardo Soffietti,2019-11-05 This book provides a comprehensive overview of brain metastases, from the molecular biology aspects to therapeutic management and perspectives. Due to the increasing incidence of these tumors and the urgent need to effectively control brain metastatic diseases in these patients, new therapeutic strategies have emerged in recent years. The volume discusses all these innovative approaches combined with new surgical techniques (fluorescence, functional mapping, integrated navigation), novel radiation therapy techniques (stereotactic radiosurgery) and new systemic treatment approaches such as targeted- and immunotherapy. These combination strategies represent a new therapeutic model in brain metastatic patients in which each medical practitioner (neurosurgeon, neurologist, medical oncologist, radiation oncologist) plays a pivotal role in defining the optimal treatment in a multidisciplinary approach. Written by recognized experts in the field, this book is a valuable tool for neurosurgeons, neuro-oncologists, neuroradiologists, medical oncologists, radiation oncologists, cognitive therapists, basic scientists and students working in the area of brain tumors.

Gender, Violence and the State in Asia Amy Barrow,Joy L. Chia,2016-07-01 While gender-based violence occurs in all societies irrespective of the level of development or cultural setting, whether in conflict or peacetime, the challenges for legal responses to gender-based violence are particularly acute in Asia. This book addresses the lack of academic discourse on gender-based violence in Asia beyond domestic violence, by demonstrating that gendered violence exists within many different contexts and is perpetuated by multiple actors. Bringing together scholars, legal practitioners and human rights advocates, the book examines the intersections between gender, violence and the state in Asian contexts. It considers the

role of state institutions in perpetuating and preventing violence based on gender and identity, and thus contributes to growing scholarship around due diligence standards under international law. Analyzing both physical and structural gender-based violence, it scrutinizes how such violence exists within a landscape shaped by distinct cultural norms, laws and policies, and grapples with how to practically translate international human rights standards about state responsibility into these complex domestic environments. Contributors from diverse backgrounds draw on case studies and empirical research to ground this academic scholarship in lived experiences of individuals and their communities in Asia. By bridging the divide between policy, laws and practice to offer a unique insight into both theoretical and practical responses to how gender-based violence is understood within communities and state institutions in Asian countries, this book will appeal to students and scholars of Asian studies, Gender Studies and Law.

The Art and Culture of Early Greece, 1100-480 B.C. Jeffrey M. Hurwit, 1985 This handsomely illustrated book offers a broad synthesis of Archaic Greek culture. Unlike other books dealing with the art and architecture of the Archaic period, it places these subjects in their historical, social, literary, and intellectual contexts. Origins and originality constitute a central theme, for during this period representational and narrative art, monumental sculpture and architecture, epic, lyric, and dramatic poetry, the city-state (polis), tyranny and early democracy, and natural philosophy were all born.

Comparative etymological Dictionary of classical Indo-European languages: Indo-European - Sanskrit - Greek - Latin Rendich Franco, 2013-12-14 The hitherto unknown history of the formation of ancient Indo-European verb roots and their primary derivatives. From which, with particular phonetic variants described herein, are derived, over thousands of years, the words of Sanskrit, Greek and Latin.

Micah's Meals Amaka Benson, 2017-03-28 Micah's Meals is more than just a cookbook; it is the quintessential guide to your baby's important first years of feeding. With over 180 easy, nutritious and tasty recipes, each with a full nutritional breakdown, it also includes health safety tips and weaning advice. To ensure the information in the cookbook is top-notch, Amaka worked with Rosie Letts, a Nutritional Therapist and the founder of Bump & Beyond Nutrition. From the introduction of solid foods at 6 months, Micah's Meals provides information on taste, texture and what foods to avoid in order to help make the transition to family meals easier for your little one. To make things simpler for parents, Micah's Meals also includes weekly menu plans and tips for cooking in bulk, so you don't have to spend hours every day cooking. With the menu plans as your guide, you can make dishes in batches and store a variety of nutritious, tasty meals. Many of the recipes can be adapted to feed older children and even adults - just serve without pureeing. Likewise, some of the recipes for toddlers can be modified into meals that can be enjoyed by younger babies. Micah's Meals is an invaluable guide that is suitable for both the novice and experienced cook. Containing an exciting and diverse range of recipes, from fruit salad puree to jollof risotto, it is the perfect addition to any parent or carer's kitchen.

The Handbook of Metabonomics and Metabolomics John C. Lindon, Jeremy K. Nicholson, Elaine Holmes, 2011-08-11

Molecular biology operates at three levels – genes, proteins and metabolites. This book is unique in that it provides a comprehensive description of an approach (metabonomics) to characterise the endogenous metabolites in a living system, complementing gene and protein studies (genomics and proteomics). These omics methods form the basis for understanding biology at a systems level. The Handbook of Metabonomics and Metabolomics aims to be the definitive work on the rapidly expanding subjects of metabolic profiling, metabolite and biomarker identification, encompassing the fields of metabonomics and metabolomics. It covers the principles of the subject, the analytical and statistical techniques used and the wide variety of applications. * comprehensive description of an approach (metabonomics) to characterise the endogenous metabolites in a living system, complementing gene and protein studies* aims to be the definitive work on the rapidly expanding subjects of metabolic profiling, metabolite and biomarker identification* covers the principles of the subject, the analytical and statistical techniques used and the wide variety of applications.

Raffaello Borghini's Il Riposo Raffaello Borghini, 2007-01-01 Raffaello Borghini's *Il Riposo* (1584) is the most widely known Florentine document on the subject of the Counter-Reformation content of religious paintings. Despite its reputation as an art-historical text, this is the first English-language translation of *Il Riposo* to be published. A distillation of the art gossip that was a feature of the Medici Grand Ducal court, Borghini's treatise puts forth simple criteria for judging the quality of a work of art. Published sixteen years after the second edition of Giorgio Vasari's *Vite*, the text that set the standard for art-historical writing during the period, *Il Riposo* focuses on important issues that Vasari avoided, ignored, or was oblivious to. Picking up where Vasari left off, Borghini deals with artists who came after Michaelangelo and provides more comprehensive descriptions of artists who Vasari only touched upon such as Tintoretto, Veronese, Barocci, and the artists of Francesco I's Studiolo. This text is also invaluable as a description of the mid-sixteenth century reaction against the style of the 'maniera,' which stressed the representation of self-consciously convoluted figures in complicated works of art. The first art treatise specifically directed toward non-practitioners, *Il Riposo* gives unique insight into the early stages of art history as a discipline, late Renaissance art and theory, and the Counter-Reformation in Italy.

Ugly Constance Briscoe, 2008-11-13 'I handed my school photograph to my mother. She stared from the photograph to me. Lord, sweet Lord, how come she so ugly. Ugly. Ugly.' These cruel words are just the beginning. Constance's mother systematically abused her daughter, both physically and emotionally, throughout her childhood. Regularly beaten and starved, the child was so desperate she took herself off to Social Services and tried to get taken into care. When Constance was thirteen, her mother simply moved out, leaving her daughter to fend for herself: there was no gas, no electricity and no

food. But somehow Constance found the courage to survive her terrible start in life. This is her heartbreaking - and ultimately triumphant story.

Metabolic Profiling Georgios A. Theodoridis, Helen G. Gika, Ian D. Wilson, 2019-04-30 This volume explores the different approaches and techniques used by researchers to study the recent challenges and developments in metabolic profiling. This book is divided into IV parts. Part I contains chapters that highlight basic concepts, such as experimental design, data treatment, metabolite identification, and harmonization. Part II describes experimental protocols for both targeted and untargeted metabolomics covering the basic analytical technologies: LC-MS, GC-MS, NMR and CE-MS. In addition the protocols describe methods for the study of tissues, feces, blood and other types of biological samples as well as the application of chemical derivatization for GC-MS. Parts III and IV present the use of metabolomics in the study of food, plants and the life sciences, with examples from the quest for the discovery of disease biomarkers, physical exercise omics and metabolic profiling of food, fruit and wine. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and thorough, *Metabolic Profiling: Methods and Protocols* is a valuable resource for researchers who are interested in expanding their knowledge of this rapidly developing field.

Death in Florence Marco Vichi, 2013 Florence, October 1966. The rain is never-ending. When a young boy vanishes on his way home from school the police fear the worst, and Inspector Bordelli begins an increasingly desperate investigation. Then the flood hits. During the night of 4th November the swollen River Arno, already lapping the arches of the Ponte Vecchio, breaks its banks and overwhelms the city.

Metabolic Phenotyping in Personalized and Public Healthcare Jeremy Nicholson, Ara Darzi, Elaine Holmes, John C. Lindon, 2016-02-11 *Metabolic Phenotyping in Personalized and Public Healthcare* provides information on the widespread recognition that a personalized or stratified approach to patient treatment may offer a more efficient and effective healthcare solution than phenotype-led approaches. In order to achieve that objective, a deep personal description is required at the level of the genome, proteome, metabolome, or preferably a combination of these aided by technology. This book, edited and written by the outstanding luminaries of this evolving field, evaluates metabolic profiling and its uses across personalized and population healthcare, while also covering the advent of new technology fields, such as surgical metabolomics. In addition, the text presents specific examples of where this technology has been used clinically and with efficacy, pointing towards a framework and protocol for usage as it hits the clinical mainstream. Translates the conjunction of new surgical tools for intraoperative, real-time, metabolite evaluation and direct analysis of biofluid samples into novel options for augmented clinical decision-making Discusses longitudinal sampling from individual patients for stratified medicine Covers high

resolution analytical spectroscopy and sophisticated computational modelling for prediction of adverse reactions in critical care scenarios, prognostic evaluation of cancer from biofluidism, and prognostic prediction of metabolism or response of patients to pharmaceutical interventions Encapsulates recent technology options for broader population profiling considerations, in particular, the metabolome-wide association studies (MWAS) that aid the translational researcher in identifying metabolic patterns associated with disease Foreword written by Professor Dame Sally Davies who is the Chief Medical Officer for England
