*Internal Auditing* Richard Cascarino, 2007-04 Book & CD. This book is designed primarily for undergraduate and postgraduate students intending to pursue a career in internal auditing, as well as those chartered accountants with a specialist interest in governance and control issues. This book covers the basic concepts, philosophy and principles underlying the practice of internal auditing -- the relationships between the internal auditor, management and the external auditor. In addition, the student will gain a knowledge and understanding of the nature of an organisation. Risk management and the role of internal auditing in managing organisational risks in the context of current developments in corporate governance in both the public and private sectors are dealt with. The book is now prescribed for those studying for the Certified Internal Auditor professional qualification since it addresses the syllabus requirements of the Institute of Internal Auditors (IIA) and the Standards for the Professional Practice of Internal Auditing and Competency Framework for Internal Auditors. This book represents a practical integrated approach to the Institute of Internal Auditors' recommended internal audit approach, and may be implemented within an internal audit department in a cost-effective manner. Accordingly, the text may be useful as a reference manual for internal audits in practice.

**Economic Transformation and Job Creation** Kenneth O. Hall, Myrtle Chuck-A-Sang, 2013-08 The question of economic

transformation is an immediate and practical one for the English-speaking Caribbean. In the postindependence period, Caribbean governments seemed blissfully unaware that the inability to transform their economies was leading to serious unemployment problems. The statistics are quite stark. Unemployment rates in the Caribbean range from 6% in the more prosperous states to 23% in the less prosperous ones. This use of economic transformation and job creation continues to be a major challenge in the first decade of the twenty-first Century. This is the subject that is treated with impressive urgency in this volume entitled *Economic Transformation and Job Creation: The Caribbean Experience*.

Sustainable Intensification in Smallholder Agriculture Ingrid Oborn,Bernard Vanlauwe,Michael Phillips,Richard Thomas,Willemien Brooijmans,Kwesi Atta-Krah,2017-02-17 Sustainable intensification has recently been developed and adopted as a key concept and driver for research and policy in sustainable agriculture. It includes ecological, economic and social dimensions, where food and nutrition security, gender and equity are crucial components. This book describes different aspects of systems research in agriculture in its broadest sense, where the focus is moved from farming systems to livelihoods systems and institutional innovation. Much of the work represents outputs of the three CGIAR Research Programs on Integrated Systems for the Humid Tropics, Aquatic Agricultural Systems and Dryland Systems. The chapters are based around four themes: the conceptual underpinnings of systems research; sustainable intensification in practice; integrating nutrition, gender and equity in research for improved livelihoods; and systems and institutional innovation. While most of the case studies are from countries and agro-ecological zones in Africa, there are also some from Latin America, Southeast Asia and the Pacific.
