Intergovernmental Panel on Climate Change (IPCC)

WHO guidelines on physical activity and sedentary behaviour ,2020-11-20

Continuous Renal Replacement Therapy John A. Kellum,Rinaldo Bellomo,Claudio Ronco,2016 Continuous Renal Replacement Therapy provides concise, evidence-based, bedside guidance for the management of critically ill patients with acute renal failure, offering quick reference answers to clinicians' questions about treatments and situations encountered in daily practice.

The Ocean and Cryosphere in a Changing Climate Intergovernmental Panel on Climate Change (IPCC),2022-05-19 The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.

The Precariat Guy Standing,2021-07-15 This book presents the new Precariat – the rapidly growing number of people facing lives of insecurity, on zero hours contracts, moving in and out of jobs that give little meaning to their lives. The delivery driver who brings your packages, the uber driver who gets you to work, the security guard at the mall, the carer looking after our elderly...these are The Precariat. Guy Standing investigates this new and growing group, finding a frustrated and angry new underclass who are often ignored by politicians and economists. The rise of zero hours contracts, encouraged by fat cat corporations as risk-free employment, and by silicon valley as a way of outsourcing costs and responsibility, has been exacerbated by the COVID pandemic. At the same time, in its experience of lockdown, the western

world is realizing the true value of these nurses, carers and key workers. The answer? The return of income security and meaningful work - the principles 20th century capitalism was built on. By making the fears and desires of the Precariat central to economic thinking, Standing shows how concepts like Basic Income are not just desirable but inevitable, and plots the way to a better future.

Open Access Peter Suber,2012-07-20 A concise introduction to the basics of open access, describing what it is (and isn't) and showing that it is easy, fast, inexpensive, legal, and beneficial. The Internet lets us share perfect copies of our work with a worldwide audience at virtually no cost. We take advantage of this revolutionary opportunity when we make our work "open access": digital, online, free of charge, and free of most copyright and licensing restrictions. Open access is made possible by the Internet and copyright-holder consent, and many authors, musicians, filmmakers, and other creators who depend on royalties are understandably unwilling to give their consent. But for 350 years, scholars have written peer-reviewed journal articles for impact, not for money, and are free to consent to open access without losing revenue. In this concise introduction, Peter Suber tells us what open access is and isn't, how it benefits authors and readers of research, how we pay for it, how it avoids copyright problems, how it has moved from the periphery to the mainstream, and what its future may hold. Distilling a decade of Suber's influential writing and thinking about open access, this is the indispensable book on the subject for researchers, librarians, administrators, funders, publishers, and policy makers.

THEORY OF THE LEISURE CLASS THORSTEIN. VEBLEN,2018

Good Economics for Hard Times Abhijit V. Banerjee,Esther Duflo,2019-11-12 FROM THE WINNERS OF THE 2019 NOBEL PRIZE IN ECONOMICS 'Wonderfully refreshing . . . A must read' Thomas Piketty In this revolutionary book, prize-winning economists Abhijit V. Banerjee and Esther Duflo show how economics, when done right, can help us solve the thorniest social and political problems of our day. From immigration to inequality, slowing growth to accelerating climate change, we have the resources to address the challenges we face but we are so often blinded by ideology. Original, provocative and urgent, Good Economics for Hard Times offers the new thinking that we need. It builds on cutting-edge research in economics - and years of exploring the most effective solutions to alleviate extreme poverty - to make a persuasive case for an intelligent interventionism and a society built on compassion and respect. A much-needed antidote to polarized discourse, this book shines a light to help us appreciate and understand our precariously balanced world.

National Education Policy (NEP 2020) Vaibhav Edke,2022-01-24 This book deals primarily with the National Education Policy 2020 of India. In the book, an attempt has been made to highlight the provisions of the latest National Education Policy in comparison with some best education systems in the world such as the USA, the UK, and Finland. The comparative analysis with these countries has made this book unique and interesting to read. The examination of elementary as well as secondary education of Japan, and the best practices of Finnish schools and government have opened up a new

door of knowledge to the readers. This book has been written mainly for students, teachers, guardians, and other stakeholders, who are actually going to benefit from the National Education Policy 2020. India's future growth and genuine sustainable development can only be achieved through the proper implementation of the NEP-2020.

From Asian to Global Financial Crisis Andrew Sheng, 2009-09-28 This is a unique insider account of the new world of unfettered finance. The author, an Asian regulator, examines how old mindsets, market fundamentalism, loose monetary policy, carry trade, lax supervision, greed, cronyism, and financial engineering caused both the Asian crisis of the late 1990s and the global crisis of 2008-9. This book shows how the Japanese zero interest rate policy to fight deflation helped create the carry trade that generated bubbles in Asia whose effects brought Asian economies down. The study's main purpose is to demonstrate that global finance is so interlinked and interactive that our current tools and institutional structure to deal with critical episodes are completely outdated. The book explains how current financial policies and regulation failed to deal with a global bubble and makes recommendations on what must change.

India and the Knowledge Economy Carl J. Dahlman, Anuja Utz, 2005-01-01 In the global knowledge economy of the twenty-first century, India's development policy challenges will require it to use knowledge more effectively to raise the productivity of agriculture, industry, and services and reduce poverty. India has made tremendous strides in its economic and social development in the past two decades. Its impressive growth in recent years-8.2 percent in 2003-can be attributed to the far-reaching reforms embarked on in 1991 and to opening the economy to global competition. In addition, India can count on a number of strengths as it strives to transform itself into a knowledge-based economy-availability of skilled human capital, a democratic system, widespread use of English, macroeconomic stability, a dynamic private sector, institutions of a free market economy; a local market that is one of the largest in the world; a well-developed financial sector; and a broad and diversified science and technology infrastructure, and global niches in IT. But India can do more-much more-to leverage its strengths and grasp today's opportunities. *India and the Knowledge Economy* assesses India's progress in becoming a knowledge economy and suggests actions to strengthen the economic and institutional regime, develop educated and skilled workers, create an efficient innovation system, and build a dynamic information infrastructure. It highlights that to get the greatest benefits from the knowledge revolution, India will need to press on with the economic reform agenda that it put into motion a decade ago and continue to implement the various policy and institutional changes needed to accelerate growth. In so doing, it will be able to improve its international competitiveness and join the ranks of countries that are making a successful transition to the knowledge economy.

Higher Education Pathways Ashwin, Paul, Case, Jennifer M., 2018-12-14 In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education to the public good, including inclusive economic development? These

questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public, as well as private, benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues.

Social and Economic Conditions of Student Life in Europe Kristina Hauschildt, Christoph Gwosć, Nicolai Netz, Shweta Mishra, 2015 Abstract: The EUROSTUDENT V - Synopsis of Indicators is the central publication of the EUROSTUDENT project and the result of the collaboration of a European-wide network including researchers, data collectors, representatives of national ministries, and other stakeholders. It comprises data from student surveys conducted in 29 countries in the European Higher Education Area during the fifth round of the EUROSTUDENT project. Adopting a broad, comparative perspective, the EUROSTUDENT V - Synopsis of Indicators provides information on topic areas such as access to higher education, study conditions, as well as international student mobility, assessment of studies, and future plans with the aim of inspiring policy debates and laying the ground for further research

Educability and Group Differences Arthur Robert Jensen, Associate Professor of Speech Communication Arthur Jensen, 2012 Jensen is a controversial figure, largely for his conclusions based on his and other research regarding the causes of race based differences in intelligence and in this book he develops more fully the argument he formulated in his controversial Harvard Education Review article 'How Much Can We Boost IQ and Scholastic Achievement?'. In a wide-ranging survey of the evidence he argues that measured IQ reveals a strong hereditary component and he argues that the system of education which assumes an almost wholly environmentalist view of the causes of group differences capitalizes on a relatively narrow category of human abilities. Since its original publication the controversy surrounding Jensen's ideas has continued as successive generations of psychologists, scientists and policy-makers have grappled with the same issues.

Fundamentals of Tree Ring Research James H. Speer, 2010 This comprehensive text addresses all of the subjects that a reader who is new to the field will need to know and will be a welcome reference for practitioners at all levels. It includes a history of the discipline, biological and ecological background, principles of the field, basic scientific information on the structure and growth of trees, the complete range of dendrochronology methods, and a full description of each of the relevant subdisciplines.

For Good Measure Joseph E. Stiglitz, 2019-11-19 Today's leading economists weigh in with a new dashboard of metrics for measuring our economic and social health What we measure affects what we do. If we focus only on material well-

being—on, say, the production of goods, rather than on health, education, and the environment—we become distorted in the same way that these measures are distorted. —Joseph E. Stiglitz A consensus has emerged among key experts that our conventional economic measures are out of sync with how most people live their lives. GDP, they argue, is a poor and outmoded measure of our well-being. The global movement to move beyond GDP has attracted some of the world's leading economists, statisticians, and social thinkers who have worked collectively to articulate new approaches to measuring economic well-being and social progress. In the decade since the 2008 economic crisis, these experts have come together to determine what indicators can actually tell us about people's lives. In the first book of its kind, leading economists from around the world, including Thomas Piketty, Emmanuel Saez, Elizabeth Beasley, Jacob Hacker, François Bourguignon, Nora Lustig, Alan B. Krueger, and Joseph E. Stiglitz, describe a range of fascinating metrics—from economic insecurity and environmental sustainability to inequality of opportunity and levels of trust and resilience—that can be used to supplement the simplistic measure of gross domestic product, providing a far more nuanced and accurate account of societal health and well-being. This groundbreaking volume is sure to provide a major source of ideas and inspiration for one of the most important intellectual movements of our time.

Design and Implementation of Health Information Systems World Health Organization Staff, World Health Organization, 2000 This book provides a practical guide to the design and implementation of health information systems in developing countries. Noting that most existing systems fail to deliver timely, reliable, and relevant information, the book responds to the urgent need to restructure systems and make them work as both a resource for routine decisions and a powerful tool for improving health services. With this need in mind, the authors draw on their extensive personal experiences to map out strategies, pinpoint common pitfalls, and guide readers through a host of conceptual and technical options. Information needs at all levels - from patient care to management of the national health system - are considered in this comprehensive guide. Recommended lines of action are specific to conditions seen in government-managed health systems in the developing world. In view of common constraints on time and resources, the book concentrates on strategies that do not require large resources, highly trained staff, or complex equipment. Throughout the book, case studies and numerous practical examples are used to explore problems and illustrate solutions. Details range from a list of weaknesses that plague most existing systems, through advice on when to introduce computers and how to choose appropriate software and hardware, to the hotly debated question of whether patient records should be kept by the patient or filed at the health unit. The book has fourteen chapters presented in four parts. Chapters in the first part, on information for decision-making, explain the potential role of health information as a managerial tool, consider the reasons why this potential is rarely realized, and propose general approaches for reform which have proved successful in several developing countries. Presentation of a six-step procedure for restructuring information systems, closely linked to an organizational model of health

services, is followed by a practical discussion of the decision-making process. Reasons for the failure of most health information to influence decisions are also critically assessed. Against this background, the second and most extensive part provides a step-by-step guide to the restructuring of information systems aimed at improving the quality and relevance of data and ensuring their better use in planning and management. Steps covered include the identification of information needs and indicators, assessment of the existing system, and the collection of both routine and non-routine data using recommended procedures and instruments. Chapters also offer advice on procedures for data transmission and processing, and discuss the requirements of systems designed to collect population-based community information. Resource needs and technical tools are addressed in part three. A comprehensive overview of the resource base - from staff and training to the purchase and maintenance of equipment - is followed by chapters offering advice on the introduction of computerized systems in developing countries, and explaining the many applications of geographic information systems. Practical advice on how to restructure a health information system is provided in the final part, which considers how different interest groups can influence the design and implementation of a new system, and proposes various design options for overcoming specific problems. Experiences from several developing countries are used to illustrate strategies and designs in terms of those almost certain to fail and those that have the greatest chances of success

Engineering Unesco,2010-01-01 This report reviews engineering's importance to human, economic, social and cultural development and in addressing the UN Millennium Development Goals. Engineering tends to be viewed as a national issue, but engineering knowledge, companies, conferences and journals, all demonstrate that it is as international as science. The report reviews the role of engineering in development, and covers issues including poverty reduction, sustainable development, climate change mitigation and adaptation. It presents the various fields of engineering around the world and is intended to identify issues and challenges facing engineering, promote better understanding of engineering and its role, and highlight ways of making engineering more attractive to young people, especially women.--Publisher's description.

Ending the Tobacco Problem Institute of Medicine,Board on Population Health and Public Health Practice,Committee on Reducing Tobacco Use: Strategies, Barriers, and Consequences,2007-10-27 The nation has made tremendous progress in reducing tobacco use during the past 40 years. Despite extensive knowledge about successful interventions, however, approximately one-quarter of American adults still smoke. Tobacco-related illnesses and death place a huge burden on our society. Ending the Tobacco Problem generates a blueprint for the nation in the struggle to reduce tobacco use. The report reviews effective prevention and treatment interventions and considers a set of new tobacco control policies for adoption by federal and state governments. Carefully constructed with two distinct parts, the book first provides background information on the history and nature of tobacco use, developing the context for the policy blueprint proposed in the second half of the report. The report documents the extraordinary growth of tobacco use during the first half of the 20th century as well as its

subsequent reversal in the mid-1960s (in the wake of findings from the Surgeon General). It also reviews the addictive properties of nicotine, delving into the factors that make it so difficult for people to quit and examines recent trends in tobacco use. In addition, an overview of the development of governmental and nongovernmental tobacco control efforts is provided. After reviewing the ethical grounding of tobacco control, the second half of the book sets forth to present a blueprint for ending the tobacco problem. The book offers broad-reaching recommendations targeting federal, state, local, nonprofit and for-profit entities. This book also identifies the benefits to society when fully implementing effective tobacco control interventions and policies.

Sustainability in a Digital World Thomas Osburg, Christiane Lohrmann, 2017-05-17 This book offers a comprehensive introduction to the different emerging concepts in the innovative area of sustainability and digital technology. More than 20 leading thinkers from the fields of digitalization, strategic management, sustainability and organizational development share clearly structured insights on the latest developments, advances and remaining challenges concerning the role of sustainability in an increasingly digital world. The authors not only introduce a profound and unique analysis on the state-of-the-art of sustainability and digital transformation, but also provide business leaders with practical advice on how to apply the latest management thinking to their daily business decisions. Further, a number of significant case studies exemplify the issues discussed and serve as valuable blueprints for decision makers.

Originality, Imitation, and Plagiarism Caroline Eisner, Martha Vicinus, 2008-03-10 At long last, a discussion of plagiarism that doesn't stop at 'Don't do it or else,' but does full justice to the intellectual interest of the topic! ---Gerald Graff, author of *Clueless in Academe* and 2008 President, Modern Language Association This collection is a timely intervention in national debates about what constitutes original or plagiarized writing in the digital age. Somewhat ironically, the Internet makes it both easier to copy and easier to detect copying. The essays in this volume explore the complex issues of originality, imitation, and plagiarism, particularly as they concern students, scholars, professional writers, and readers, while also addressing a range of related issues, including copyright conventions and the ownership of original work, the appropriate dissemination of innovative ideas, and the authority and role of the writer/author. Throughout these essays, the contributors grapple with their desire to encourage and maintain free access to copyrighted material for noncommercial purposes while also respecting the reasonable desires of authors to maintain control over their own work. Both novice and experienced teachers of writing will learn from the contributors' practical suggestions about how to fashion unique assignments, teach about proper attribution, and increase students' involvement in their own writing. This is an anthology for anyone interested in how scholars and students can navigate the sea of intellectual information that characterizes the digital/information age. Eisner and Vicinus have put together an impressive cast of contributors who cut through the war on plagiarism to examine key specificities that often get blurred by the rhetoric of slogans. It will be required reading not only for those concerned

with plagiarism, but for the many more who think about what it means to be an author, a student, a scientist, or anyone who negotiates and renegotiates the meaning of originality and imitation in collaborative and information-intensive settings. --- Mario Biagioli, Professor of the History of Science, Harvard University, and coeditor of *Scientific Authorship: Credit and Intellectual Property in Science* This is an important collection that addresses issues of great significance to teachers, to students, and to scholars across several disciplines. . . . These essays tackle their topics head-on in ways that are both accessible and provocative. ---Andrea Lunsford, Louise Hewlett Nixon Professor of English, Claude and Louise Rosenberg Jr. Fellow, and Director of the Program in Writing and Rhetoric at Stanford University and coauthor of *Singular Texts/Plural Authors: Perspectives on Collaborative Writing* digitalculturebooks is an imprint of the University of Michigan Press and the Scholarly Publishing Office of the University of Michigan Library dedicated to publishing innovative and accessible work exploring new media and their impact on society, culture, and scholarly communication.
