Invitation to the Life Span Kathleen Stassen Berger, 2013-03-01 Edition after edition, Kathleen Stassen Berger's bestselling textbooks connect all kinds of students to current state of developmental psychology, in an engaging, accessible, culturally inclusive way. Berger's *Invitation to the Life Span* does this in just 15 concise chapters, in a presentation that meets the challenges of exploring the breadth of the life span in a single term. The new edition of *Invitation to the Life Span* incorporates a wide range of new research, especially in fast-moving areas such as brain development and psychopathology, while taking advantage of innovative new tools for media-centered teaching and learning. But throughout, as always, the signature voice of Kathleen Berger ties it all together, with relatable explanations of scientific content, wide ranging cultural examples, and skill-building tools for sharper observation and critical thinking.

Giardia and Cryptosporidium Guadalupe Ortega-Pierres,2009 Giardia and Cryptosporidium are both parasites of considerable global interest due to the gastrointestinal problems these organisms can cause in humans as well as domestic and wild animals. Despite its long history as the causative agent of giardiasis, the clinical and zoonotic significance of Giardia infections in humans and animals is only beginning to emerge with the application of molecular tools. Less is known about Cryptosporidium and studies seek to understand the impact of infection in livestock and other animals, its epidemiology and zoonotic significance. Presenting a comprehensive overview of recent research this book draws on the experience of experts in all fields of Giardia and Cryptosporidium research.

The Whispering Trees Abubakar Adam Ibrahim,2012-03-02 The Whispering Trees, award winning writer Abubakar Adam Ibrahim's debut collection of short stories, employs nuance, subtle drama and deadpan humour to capture colourful Nigerian lives. There's Kyakkyawa, who sparks forbidden thoughts in her father and has a bit of angels and witches in her; there's the mysterious butterfly girl who just might be an incarnation of Ohikwo's long dead mother; there's also a flummoxed white woman caught between two Nigerian brothers and an unfolding scandal, and, of course, the two medicine men of Mazade who battle against their egos, an epidemic and an enigmatic witch.

Archiving Caribbean Identity John Aarons,Jeannette A. Bastian,Stanley Hazley Griffin,2022 Archiving Caribbean Identity highlights the 'caribbeanization' of archives in the region, considering what those archives could include in the future and exploring the potential for new records in new formats. Interpreting records in the broadest sense, the 15 essays in this volume explore a wide variety of records that represent new archival interpretations. The book is split into two parts, with the first section focusing on record forms that are not generally considered 'archival' in traditional Western practice. The second section explores more 'traditional' archival collections and demonstrates how these collections are analyzed and

presented from the perspective of Caribbean peoples. As a whole, the volume suggests how colonial records can be repurposed to surface Caribbean narratives. Reflecting on the unique challenges faced by developing countries as they approach their archives, the volume considers how to identify and archive records in the forms and formats that reflect the post-colonial and decolonized Caribbean; how to build an archive of the people that documents contemporary society and reflects Caribbean memory; and how to repurpose the colonial archives so that they assist the Caribbean in reclaiming its history. Archiving Caribbean Identity demonstrates how non-textual cultural traces function as archival records and how folk-centered perspectives disrupt conventional understandings of records. The book should thus be of interest to academics and students engaged in the study of archives, memory, culture, history, sociology, and the colonial and post-colonial experience--

The Biology of Parasites Richard Lucius,Brigitte Loos-Frank,Richard P. Lane,Robert Poulin,Craig Roberts,Richard K. Grensis,2017-04-10 This heavily illustrated text teaches parasitology from a biological perspective. It combines classical descriptive biology of parasites with modern cell and molecular biology approaches, and also addresses parasite evolution and ecology. Parasites found in mammals, non-mammalian vertebrates, and invertebrates are systematically treated, incorporating the latest knowledge about their cell and molecular biology. In doing so, it greatly extends classical parasitology textbooks and prepares the reader for a career in basic and applied parasitology.

Forensic Autopsy Cristoforo Pomara,Steven B. Karch,Vittorio Fineschi,2010-02-18 All too often, forensic pathologists perform autopsies that are limited only to the body parts that are suspect, leading to biased and inaccurate results. A correct diagnosis for cause of death can only be reached by a strict and systematic examination of the whole body. Providing a step-by-step, photo-assisted guide to complete autopsy procedures,

Biology and Ecology of Pharmaceutical Marine Tunicates Ramasamy Santhanam,Santhanam Ramesh,2019-10-10 The ocean is a source of unique natural products, mainly accumulated in living organisms. The c.4000 species of tunicates or sea squirts (Phylum, Chordata; Subphylum, Urochordata) are a high-potential yet under-studied source of bioactive compounds for pharmaceuticals. The secondary metabolites such as alkaloids isolated from these organisms have led to the discovery of an approved anti-tumor drug, anti-cancer drugs Yondelis® and Aplidin®, as well as many others in clinical trial. There is an urgent need for more research on the bioactive compounds of marine tunicates and better knowledge about the identification and biology of these species. This is the first focused book to meet this need. The taxonomy, common name, global distribution, habitat, diagnostic features and pharmaceutical compounds (along with their activities) of 165 key species of tunicates are given, with high-quality illustrations. Contributed by scientists of both Marine Biology and Pharmacy disciplines, this book will serve as a standard reference for researchers, teachers and students of Fisheries Science, Marine

Biology, Life Sciences, Biotechnology, Natural Products, and Pharmacy, and as a valuable guide for pharmaceutical companies involved in the development of new drugs from marine organisms.

The Management of Health Care William J. Abernathy, Alan Sheldon, C. K. Prahalad, 1974 The essential purpose of this book is to draw attention to the problems of managing the creation and use of technology in health care, whether that means a new blood pressure machine or a new way of doing something, whether directly involved in the medical treatment process, e.g., The nurse practitioner, or in the management of that process, e.g., A management information system. The first section deals with research and development. The second section deals with the problems of introducing and diffusing new technology in the health care system. The third deals with the impact and consequences of technology in health organization, and the final section with the problems of evaluation and values as these affect critical decision choices.

Comparative Federalism and Covid-19 Nico Steytler, 2021-10-27 This comprehensive scholarly book on comparative federalism and the Covid-19 pandemic is written by some of the world's leading federal scholars and national experts. The Covid-19 pandemic presented an unprecedented emergency for countries worldwide, including all those with a federal or hybrid-federal system of government, which account for more than 40 per cent of the world's population. With case studies from 19 federal countries, this book explores the core elements of federalism that came to the fore in combatting the pandemic: the division of responsibilities (disaster management, health care, social welfare, and education), the need for centralisation, and intergovernmental relations and cooperation. As the pandemic struck federal countries at roughly the same time, it provided a unique opportunity for comparative research on the question of how the various federal systems responded. The authors adopt a multidisciplinary approach to question whether federalism has been a help or a hindrance in tackling the pandemic. The value of the book lies in understanding how the Covid-19 pandemic affected federal dynamics and how it may have changed them, as well as providing useful lessons for how to combat such pandemics in federal countries in the future. This book will be of great interest to students and scholars of politics and international relations, comparative federalism, health care, and disaster management.
