**Social Sciences** Kath Woodward, 2021-12-30 Fully revised and updated, the fourth edition of Social Sciences: The Big Issues explores key debates about how we live our personal, domestic and emotional lives at a time of enormous, previously unimaginable change and disruption, including a pandemic that locked down households and economies. Since the third edition, everyone's life has changed. The pandemic - at least temporarily - stopped social life as we knew it and virtually forced governments to close down their economies. This is where this edition of The Big Issues starts. Staying at home posed a radical departure from routine life, but reactions to Covid-19 have exposed the endurance of particular social relations - especially inequalities - which characterize societies worldwide. A few of the new big issues covered in this edition include: Changing selves and personal lives in light of racism and sexual and identity politics in a pandemic Changing patterns of consumption in relation to market production and what it means for climate change Changing intersections of citizenship, migration and globalization in the context of the virus crossing borders, and both the opportunities and sources of inequality involved Changing ideas about power, politics and populism in the aftermath of Brexit Building on the strong foundation of this well-loved text, this fully revised fourth edition explores how big issues and social forces intersect to create both change and evidence of continuity, especially of social inequalities. It provides a clear, accessible introduction to the ideas and approaches of the social sciences across a range of disciplines, including sociology, psychology and politics.

Contemporary Society John A Perry, Erna K Perry, 2016-04-14 This best-selling text emphasizes why social and cultural changes are the pervasive realities of our time. A key theme of Contemporary Society is that the transition from an industrial to a post-industrial order in today's world is fraught with difficulties, as was the transition from an agricultural to an industrial order in an earlier era. Within this framework, we can observe the increasing fragmentation of the social order today, which tends to lead people away from community and a common purpose, more often bringing conflict and disunity. Still, countervailing social forces are also at work, providing some stability--some shelter in a sea of change. Ever more,

societies are faced with the rapid and transformative power of information technology, which helps propel separate groups of people into a global entity. This introduction to the social sciences shows what the authors have learned from such disciplines as anthropology, geography, history, sociology, psychology, political science, and economics--and how to apply social science approaches to an ever-faster tempo of change. The authors cover family life, interaction with others, racial and ethnic diversity, education, religion, population, environment, and many other topics analyzed in a student-friendly approach. New to this Edition The integration and flow of the text has been improved for better student comprehension. Expanded selection of Web Links to many more sites for student research, many relevant to their interests and entertainment choices Enriched focus on applying social science knowledge to current events (transcending a complete reliance on assumptions from the media) New/expanded coverage on topics throughout the book, including New findings from global warming research and its implications for social life and policy New developments in race relations in an integrated approach throughout many chapters Deepening inequality and the implications that threaten family, education, and student futures—nationally and globally Gender, including new developments in legal gay marriage and transgender Expanded coverage of genetics and the medical potential of human genome sequencing New developments in astrophysics and their potential implications for society Updated Statistics throughout

Power and Society Thomas R. Dye,2002 Designed as a basic text for an introductory, interdisciplinary social science course. This text introduces students to central concepts in anthropology, sociology, economics, psychology, political science, and history. The text focuses these perspectives on a central integrative theme and interdisciplinary viewpoint—the nature and uses of power in society. POWER AND SOCIETY introduces students to some of the central challenges facing American society; for example, ideological conflict, racism and sexism, poverty and powerlessness, crime and violence, community problems, and international relations. Focusing on controversy stimulates students' interest and appreciation for social sciences.

**Power & Society** Thomas R. Dye,1996 Through six successful editions of *Power and Society*, Thomas R. Dye has encouraged readers to pursue their interests in the social sciences by illustrating how important these disciplines are to understanding many conditions of our lives. As Dye introduces readers to the central concepts of sociology, anthropology, economics, political science, history, and psychology, he links elements of these disciplines through a dynamic and unifying theme: the manifestation of power in society. With this idea in mind, readers gain a real sense of social scientists' interests as they explore power in the context of social problems such as racism, sexism, poverty, crime, violence, urban decay, and international and ideological conflict. Dye's presentation includes analyses of social science research studies and the

contributions of masters of social thought such as Bertrand Russell, Karl Marx, Sigmund Freud, and Martin Luther King, Jr. Evocative discussions are enhanced with case studies and cross-national perspectives to highlight critical ideas, including the power and society theme. The approach of learning to understand power as an integral part of our social world continues with great impact in this seventh edition. Among the new topics readers will find how men and women view their relations today; evolutionary psychology: the mating game; the burdens of government debt; Native Americans: an historical overview; social scientists look at sex in America; treating mental illness; a brief history of the cold war; the long history of women's protests; sexual harassment and the law; and should we limit the terms of Congress members?--BOOK JACKET.Title

**The Dialectics of Inquiry Across the Historical Social Sciences** David Baronov,2013-11-07 This book turns conventional global-historical analysis on its head, demonstrating, first, that local events cannot be derived — logically or historically — from large-scale, global-historical structures and processes and, second, that it is these structures and processes that, in fact, emerge from our analysis of local events. This is made evident via an analysis of three disparate events: the New York City Draft Riots, AIDS in Mozambique, and a 2007 flood in central Uruguay. In each case, Baronov chronicles how expressions of human agency at the level of those caught up in each event give form and substance to various abstract global-historical concepts — such as slavery in the Americas, global capitalist production, and colonial/postcolonial Africa. Underlying this repositioning of the local and the ephemeral is an immanent, phenomenological analysis that illustrates how mere transient events are the progenitors of otherwise abstract, global-historical concepts. Traversing the intersections of human agency and structural determinism, Baronov deftly retains the nuance and serendipity of everyday life, while deploying this nuance and serendipity to further embellish our understanding of those enduring global-historical structures and processes that shape large-scale, long-term, historical accounts of social and cultural change across the historical social sciences.
