**Expanding Boundaries: Systems Thinking in the Built Environment** Guillaume Habert,Arno Schlueter,2016-08-15 Consuming over 40% of total primary energy, the built environment is in the centre of worldwide strategies and measures towards a more sustainable future. To provide resilient solutions, a simple optimisation of individual technologies will not be sufficient. In contrast, whole system thinking reveals and exploits connections between parts. Each system interacts with others on different scales (materials, components, buildings, cities) and domains (ecology, economy and social). Whole-system designers optimize the performance of such systems by understanding interconnections and identifying synergies. The more complete the design integration, the better the result. In this book, the reader will find the proceedings of the 2016 Sustainable Built Environment (SBE) Regional Conference in Zurich. Papers have been written by academics and practitioners from all continents to bring forth the latest understanding on systems thinking in the built environment.

*Post-Planck Cosmology* Cédric Deffayet,Patrick Peter,Benjamin Wandelt,Matías Zaldarriaga,Leticia F. Cugliandolo,2015 This book gathers the lecture notes of the 100th Les Houches Summer School, which was held in July 2013. These lectures represent a comprehensive pedagogical survey of the frontier of theoretical and observational cosmology just after the release of the first cosmological results of the Planck mission. The Cosmic Microwave Background is discussed as a possible window on the still unknown laws of physics at very high energy and as a backlight for studying the late-time Universe. Other lectures highlight connections of fundamental physics with other areas of cosmology and astrophysics, the successes and fundamental puzzles of the inflationary paradigm of cosmic beginning, the themes of dark energy and dark matter, and the theoretical developments and observational probes that will shed light on these cosmic conundrums in the years to come.

**Intersections in Language Planning and Policy** Jean Fornasiero,Sarah M. A. Reed,Rob Amery,Eric Bouvet,Kayoko Enomoto,Hui Ling Xu,2020-09-28 This volume encompasses the range of issues encountered by language scholars who teach and research in departments of languages and cultures within the higher education system, predominantly in Australia, but touching other universities worldwide. Related studies on language planning, methodology or pedagogy have focused on one

or more of these same issues, but rarely on their totality. Intersections as a metaphor running discreetly through the essays in this volume, connects them all to a lived reality. The field of languages and cultures, as it is practised and reflected upon in Australian universities, is essentially an interdisciplinary and interconnecting space - one in which linguistic and disciplinary diversities meet and join forces, rather than collide or disperse along different pathways. The international and local studies featured here focus on language planning, new pedagogies and language reclamation and link to meeting points and commonalities. They show that language scholars are increasingly finding themselves on common ground as they tackle issues of policy and practice affecting their field, whether within their institutions, within the tertiary system, or within the framework of government policy.

**The Wrong Direction for Today's Schools** Ernest J. Zarra, 2015-07-22 The Wrong Direction for Today's Schools: The Impact of Common Core on American Education is an in-depth analysis of the newest national American education fad, intended to replace the 2002 incarnation of the ESEA, No Child Left Behind. Zarra delves into the "seeds" that produced the Common Core Standards, as well as the groups involved in the political and corporate pressure to completely revamp America's K-16 education system. The author lays out a strong case for political motives involving the advancement for nationalized education, such as those found in select European and Asian nations. Zarra also follows the funding and provides solid documentation and analysis of international and national assessments, and how the funding and assessments proved pivotal in the overhaul of American education. After an analysis of the underpinnings of the Common Core Standards, Zarra critiques the myths and facts of the Common Core, and balances these with the emerging realities impacting average Americans and their families. Zarra's book is a must-read and will prove to be extremely useful to all who are concerned about public, private, and homeschool education in America.

**Computational Physiology** Kimberly J. McCabe, 2023-03-01 This open access volume compiles student reports from the 2022 Simula Summer School in Computational Physiology. The reports provide an overview of some tools available to model physiology in excitable tissues across scales and scientific questions. In 2022, Simula held the eighth annual Summer School in Computational Physiology in collaboration with the University of Oslo (UiO) and the University of California, San Diego (UCSD). Each year, the course focuses on modeling excitable tissues, with a special interest in cardiac physiology and neuroscience. Group research projects conducted by graduate students from around the world result in reports addressing problems of physiological importance. Reports may not necessarily represent new scientific results; rather, they can reproduce or supplement earlier studies. Reports from seven of the summer projects are included as separate chapters. The topics represented include multiscale mechanics, electrophysiology, pharmacology, and machine learning.

**Renewable Energy in East Asia** Christopher M. Dent, 2014-11-27 Energy is crucial to the functioning of any human society and central to understanding East Asia's 'economic miracle'. The region's rapid development over the last few decades has been inherently energy-intensive and the impact on global energy security, climate change and the twenty-first-century global system generally is now very significant and will become more so over foreseeable years and decades to come. The region is already the world's largest energy consumer and greenhouse gas emitter, so establishing cleaner energy systems in East Asia is both a regional and global challenge, and renewable energy has a critically important part to play in meeting it. This book presents a comprehensive study of renewable energy development in East Asia. It begins by examining renewable energy development in global and historic contexts, and situates East Asia's position in the recent worldwide expansion of renewables. This same approach is applied on sector-specific chapter studies on wind, solar, hydropower, geothermal, ocean (wave and tidal) and bioenergy, and to general trends in renewable energy policy. Governments play a critical role in promoting renewables and their contribution to tackling climate change and other environmental challenges. Christopher M. Dent argues this is particularly relevant to East Asia, where state capacity practice has been increasingly allied to ecological modernisation thinking to form what he calls 'new developmentalism', the principal foundation on which renewables have developed in the region as well as how East Asia's low carbon development is being generally promoted. *Renewable Energy in East Asia* will be of huge interest to students and scholars of Asian studies, economics, political economy, energy studies, business, development, international relations and environmental studies. It will also appeal to researchers working on the subject matter in government, business, international organisations, think tanks and civil society organisations.

**Privacy and Identity Management. Data for Better Living: AI and Privacy** Michael Friedewald, Melek Önen, Eva Lievens, Stephan Krenn, Samuel Fricker, 2020-03-10 This book contains selected papers presented at the 14th IFIP WG 9.2, 9.6/11.7, 11.6/SIG 9.2.2 International Summer School on Privacy and Identity Management, held in Windisch, Switzerland, in August 2019. The 22 full papers included in this volume were carefully reviewed and selected from 31 submissions. Also included are reviewed papers summarizing the results of workshops and tutorials that were held at the Summer School as well as papers contributed by several of the invited speakers. The papers combine interdisciplinary approaches to bring together a host of perspectives, which are reflected in the topical sections: language and privacy; law, ethics and AI; biometrics and privacy; tools supporting data protection compliance; privacy classification and security assessment; privacy enhancing technologies in specific contexts. The chapters *What Does Your Gaze Reveal About You? On the Privacy Implications of Eye Tracking* and *Privacy Implications of Voice and Speech Analysis - Information Disclosure by Inference* are open access under a CC BY 4.0 license at [link.springer.com](https://link.springer.com).

*Modular Forms* L J P Kilford, 2015-03-12 *Modular Forms* is a graduate student-level introduction to the classical theory of

modular forms and computations involving modular forms, including modular functions and the theory of Hecke operators. It also includes applications of modular forms to various subjects, such as the theory of quadratic forms, the proof of Fermat's Last Theorem and the approximation of  $\pi$ . The text gives a balanced overview of both the theoretical and computational sides of its subject, allowing a variety of courses to be taught from it. This second edition has been revised and updated. New material on the future of modular forms as well as a chapter about longer-form projects for students has also been added.

**Research Handbook on the Sociology of Education** Rolf Becker, 2019 Presenting original contributions from the key experts in the field, the Research Handbook on the Sociology of Education explores the major theoretical, methodological, empirical and political challenges and pressing social questions facing education in current times.

*Antimicrobial Stewardship* Céline Pulcini, Onder Ergonul, Füsun Can, Bojana Beović, 2017-04-05 Antimicrobial Stewardship (AMS), Volume Two includes the experience of ESGAP workshops and courses on antibiotic stewardship since 2012. It combines clinical and laboratory information about AMS, with a focus on human medicine. The ESCMID study group on antibiotic policies (ESGAP) is one of the most productive groups in the field, organizing courses and workshops. This book is an ideal tool for the participants of these workshops. With short chapters (around 1500 words) written on different topics, the authors insisted on the following points: A 'hands on', practical approach, tips to increase success, a description of the most common mistakes, a global picture (out- and inpatient settings, all countries) and a short list of 10-20 landmark references. Focuses on the most recent antimicrobial stewardship strategies Provides a detailed description of laboratory support Offers a balanced synthesis of basic and clinical sciences for each individual case, presenting clinical courses of the cases in parallel with the pathogenesis and detailed microbiological information for each infection Describes the prevalence and incidence of the global issues and current therapeutic approaches Presents the measures for infection control

Forensic DNA Evidence Interpretation John S. Buckleton, Jo-Anne Bright, Duncan Taylor, 2016-04-21 Now in its second edition, Forensic DNA Evidence Interpretation is the most comprehensive resource for DNA casework available today. Written by leaders in the fields of biology and statistics, including a contribution from Peter Gill, the father of DNA analysis, the book emphasizes the interpretation of test results and provides the necessary formulae in an easily accessible manner. This latest edition is fully updated and includes current and emerging techniques in this fast-moving field. The book begins by reviewing all pertinent biology, and then provides information on every aspect of DNA analysis. This includes modern interpretation methods and contemporary population genetic models available for estimating DNA frequencies or likelihood ratios. Following a chapter on procedures for validating databases, the text presents overviews and performance assessments of both modern sampling uncertainty methods and current paternity testing techniques, including new guidelines on paternity testing in alignment with the International Society for Forensic Genetics. Later chapters discuss the latest methods

for mixture analysis, LCN (ultra trace) analysis and non-autosomal (mito, X, and Y) DNA analysis. The text concludes with an overview of procedures for disaster victim identification and information on DNA intelligence databases. Highlights of the second edition include: New information about PCR processes, heterozygote balance and back and forward stuttering New information on the interpretation of low template DNA, drop models and continuous models Additional coverage of lineage marker subpopulation effects, mixtures and combinations with autosomal markers This authoritative book provides a link among the biological, forensic, and interpretative domains of the DNA profiling field. It continues to serve as an invaluable resource that allows forensic scientists, technicians, molecular biologists and attorneys to use forensic DNA evidence to its greatest potential.

**Multicampus University Systems** Ishmael I. Munene, 2014-08-27 In the face of increasing social demand and cutbacks in state budgetary support, universities in African countries are now turning towards a multicampus system strategy. As African governments have adopted neoliberal education policies that place premium on entrepreneurialism, profit making, privatization, and markets as drivers of university development, a reshaping of the academic work and organizational framework have taken place. However, little is known about the impact of this paradigm shift on access, quality and

governance in higher education. This book fills the void in research and academic knowledge about the impact of the emerging university configurations in Africa. It analyzes the paradox surrounding the performance of multicampus university systems as avenues of broadening university access but whose structural success may be qualitatively contested. This book offers a refreshing examination of the African multicampus university system from both an African and global perspective. It makes use of empirical data from Kenya collected during extensive fieldwork along with substantive library and documentary resources on the rest of the continents to fortify arguments and demonstrate important conclusions. This allows for a comparative analysis of policies and strategies used in the establishment of campuses, both within and beyond national boundaries in the continent, and will be a welcome contribution to the existing repertoire on African universities.
