The Social Life of Coffee Brian Cowan,2008-10-01 What induced the British to adopt foreign coffee-drinking customs in the seventeenth century? Why did an entirely new social institution, the coffeehouse, emerge as the primary place for consumption of this new drink? In this lively book, Brian Cowan locates the answers to these questions in the particularly British combination of curiosity, commerce, and civil society. Cowan provides the definitive account of the origins of coffee drinking and coffeehouse society, and in so doing he reshapes our understanding of the commercial and consumer revolutions in Britain during the long Stuart century. Britain's virtuosi, gentlemanly patrons of the arts and sciences, were profoundly interested in things strange and exotic. Cowan explores how such virtuosi spurred initial consumer interest in coffee and invented the social template for the first coffeehouses. As the coffeehouse evolved, rising to take a central role in British commercial and civil society, the virtuosi were also transformed by their own invention.

Poets, Patrons, and Printers Cynthia J. Brown,2019-03-15 Cynthia J. Brown explains why the advent of print in the late medieval period brought about changes in relationships among poets, patrons, and printers which led to a new conception of authorship. Examining such paratextual elements of manuscripts as title pages, colophons, and illustrations as well as such literary strategies as experimentation with narrative voice, Brown traces authors' attempts to underscore their narrative presence in their works and to displace patrons from their role as sponsors and protectors of the book. Her accounts of the struggles of poets, including Jean Lemaire, Jean Bouchet, Jean Molinet, and Pierre Gringore, over the design, printing, and sale of their books demonstrate how authors secured the status of literary proprietor during the transition from the culture of script and courtly patronage to that of print capitalism.

The French Revolution: From its origins to 1793 Georges Lefebvre,1962

Revolutionary Paris and the Market for Netherlandish Art Darius A. Spieth,2017-11-06 Seventeenth-century Dutch and Flemish paintings were aesthetic, intellectual, and economic touchstones in the Parisian art world of the Revolutionary era, but their importance within this framework, while frequently acknowledged, never attracted much subsequent attention. Darius A. Spieth's inquiry into Revolutionary Paris and the Market for Netherlandish Art reveals the dominance of "Golden Age" pictures in the artistic discourse and sales transactions before, during, and after the French Revolution. A broadly based statistical investigation, undertaken as part of this study, shows that the upheaval reduced prices for Netherlandish paintings by about 55% compared to the Old Regime, and that it took until after the July Revolution of 1830 for art prices to return where they stood before 1789.

The New Urban Frontier Neil Smith,2005-10-26 Why have so many central and inner cities in Europe, North America and Australia been so radically revamped in the last three decades, converting urban decay into new chic? Will the process continue in the twenty-first century or has it ended? What does this mean for the people who live there? Can they do anything about it? This book challenges conventional wisdom, which holds gentrification to be the simple outcome of new middle-class tastes and a demand for urban living. It reveals gentrification as part of a much larger shift in the political economy and culture of the late twentieth century. Documenting in gritty detail the conflicts that gentrification brings to the new urban 'frontiers', the author explores the interconnections of urban policy, patterns of investment, eviction, and homelessness. The failure of liberal urban policy and the end of the 1980s financial boom have made the end-of-the-century city a darker and more dangerous place. Public policy and the private market are conspiring against minorities, working people, the poor, and the homeless as never before. In the emerging revanchist city, gentrification has become part of this policy of revenge.

Slavery and the British Country House Madge Dresser,Andrew Hann,2013 The British country house has long been regarded as the jewel in the nation's heritage crown. But the country house is also an expression of wealth and power, and as scholars reconsider the nation's colonial past, new questions are being posed about these great houses and their links to Atlantic slavery.This book, authored by a range of academics and heritage professionals, grew out of a 2009 conference on

'Slavery and the British Country house: mapping the current research' organised by English Heritage in partnership with the University of the West of England, the National Trust and the Economic History Society. It asks what links might be established between the wealth derived from slavery and the British country house and what implications such links should have for the way such properties are represented to the public today. Lavishly illustrated and based on the latest scholarship, this wide-ranging and innovative volume provides in-depth examinations of individual houses, regional studies and critical reconsiderations of existing heritage sites, including two studies specially commissioned by English Heritage and one sponsored by the National Trust.

Commentaries on the Laws of England William Blackstone, 1809

William Sheppard, Cromwell's Law Reformer Nancy L. Matthews, 2004-07-08 This study presents a full account of Sheppard's employment under Oliver Cromwell's Protectorate as well as an examination of his family background and education, his religious commitment to John Owen's party of Independents and his legal philosophy. An appraisal of all Sheppard's legal works, including those written during the Civil War and the Restoration period, illustrates the overlapping concerns with law reform, religion and politics in his generation. Sheppard had impressively consistent goals for the reform of English law and his prescient proposals anticipate the reforms ultimately adopted in the nineteenth century, culminating in the Judicature Acts of 1875-8. Dr Matthews examines the relative importance of Sheppard's books to his generation and to legal literature in general. The study provides a full bibliography of Sheppard's legal and religious works and an appendix of the sources Sheppard used in the composition of his books on the law.

The Coming of the French Revolution Georges Lefebvre, 2019-12-31 The Coming of the French Revolution remains essential reading for anyone interested in the origins of this great turning point in the formation of the modern world. First published in 1939, on the eve of the Second World War, and suppressed by the Vichy government, this classic work explains what happened in France in 1789, the first year of the French Revolution. Georges Lefebvre wrote history from below—a Marxist approach. Here, he places the peasantry at the center of his analysis, emphasizing the class struggles in France and the significant role they played in the coming of the revolution. Eloquenty translated by the historian R. R. Palmer and featuring an introduction by Timothy Tackett that provides a concise intellectual biography of Lefebvre and a critical appraisal of the book, this Princeton Classics edition continues to offer fresh insights into democracy, dictatorship, and insurrection.

University, City and State Michael S. Moss, J. Forbes Munro, Richard Hughes Trainor, 2000 With the proceeds of selling its city centre site to a railway, Glasgow university exchanged its original and increasingly overcrowded site for a magnificent neo-gothic building at the greenfield location of Gilmourehill in 1870. The history of the university on its new site then develops in conjunction with that of Glasgow as the second city of the Empire before suffering the privation of two world wars and the long dislocation of its local economy in the 1930s. After World War II, the University is ever more powerfully shaped by the State as it expands threefold in size. The current flowering of links with industry and the economy through research funding, innovation and technology transfer emphasize the recognition of the importance of the University's

economic, cultural and social role in the life of the City as its story enters the 21st century.

For each drawing, the authors provide a discussion of the work's style, dating, iconography, and relationship to other works, as well as provenance and a complete bibliography.
