Together Apart Jolanda Jetten, Stephen D. Reicher, S. Alexander Haslam, Tegan Cruwys, 2020-07-13 Written by leading social psychologists with expertise in leadership, health and emergency behaviour – who have also played an important role in advising governments on COVID-19 – this book provides a broad but integrated analysis of the psychology of COVID-19. It explores the response to COVID-19 through the lens of social identity theory, drawing from insights provided by four decades of research. Starting from the premise that an effective response to the pandemic depends upon people coming together and supporting each other as members of a common community, the book helps us to understand emerging processes related to social (dis)connectedness, collective behaviour and the societal effects of COVID-19. In this it shows how psychological theory can help us better understand, and respond to, the events shaping the world in 2020. Considering key topics such as: Leadership, Communication, Risk perception, Social isolation, Mental health, Inequality, Misinformation, Prejudice and racism, Behaviour change, Social Disorder. This book offers the foundation on which future analysis, intervention and policy can be built. We are proud to support the research into Covid-19 and are delighted to offer the finalised eBook for free. All Royalties from this book will be donated to charity.

Global Health Diplomacy Ilona Kickbusch, Graham Lister, Michaela Told, Nick Drager, 2012-12-09 The world's problems are indeed world problems: social and environmental crises, global trade and politics, and major epidemics are making public health a pressing global concern. From this constantly changing scenario, global health diplomacy has evolved, at the intersection of public health, international relations, law, economics, and management—a new discipline with transformative potential. Global Health Diplomacy situates this concept firmly within the human rights dialogue and provides a solid framework for understanding global health issues and their negotiation. This up-to-the-minute guide sets out defining principles and the current agenda of the field, and examines key relationships such as between trade and health diplomacy, and between global health and environmental issues. The processes of global governance are detailed as the UN, WHO, and other multinational actors work to address health inequalities among the world's peoples. And to ensure maximum usefulness, the text includes plentiful examples, discussion questions, reading lists, and a glossary. Featured topics include: The legal basis of global health agreements and negotiations. Global public goods as a foundation for global health diplomacy. Global health: a human security perspective. Health issues and foreign policy at the UN. National strategies for

global health. South-south cooperation and other new models of development. A volume of immediate utility with a potent vision for the future, Global Health Diplomacy is an essential text for public health experts and diplomats as well as schools of public health and international affairs.

African Ideologies and Socio-political Issues Ejikemeuwa J O Ndubisi, Obinna Victor Obiagwu, Anthony Ikechukwu Kanu, 2021-12-10 The year 2021 marks the beginning of a promising decade for Africa. In spite of the Covid-19 pandemic, the continent continues to be home to seven of the world's ten fastest-growing economies. Ours is a continent that has continued to give birth to beautiful and inspirational stories, in spite of difficult circumstances. It is on this basis that the Association for the Promotion of African Studies on 25th May, 2021 had her Annual International Conference on the theme: African Ideologies and Innovative Trends and Advances: Honouring the Past and Shaping the Future. The 2021 International Conference did not only highlight the triumphs of past years but focused on strategies for tackling forthcoming challenges in the African continent. The collective action of the members of the association as scholars in discussing innovative trends and advances within Africa is representative of the shared energy and excitement around Africa's academic potential. This conference was inspired by a retinue of questions that have bothered the inquisitive minds of the members of APAS and beyond. This is, therefore, the proceedings of the effort by the members of APAS who took up the challenge to respond to these questions through research. Scroll up and click on the BUY button

Rogelberg,2015-07-15 This first volume to analyze the science of meetings offers a unique perspective on an integral part of contemporary work life. More than just a tool for improving individual and organizational effectiveness and well-being, meetings provide a window into the very essence of organizations and employees' experiences with the organization. The average employee attends at least three meetings per week and managers spend the majority of their time in meetings. Meetings can raise individuals, teams, and organizations to tremendous levels of achievement. However, they can also undermine effectiveness and well-being. The Cambridge Handbook of Meeting Science assembles leading authors in industrial and organizational psychology, management, marketing, organizational behavior, anthropology, sociology, and communication to explore the meeting itself, including pre-meeting activities and post-meeting activities. It provides a comprehensive overview of research in the field and will serve as an invaluable starting point for scholars who seek to understand and improve meetings.

Legal Guide on Contract Farming Food and Agriculture Organization of the United Nations, 2018-06-26 Contract farming, broadly understood as agricultural production and marketing carried out under a previous agreement between producers and their buyers, supports the production of a wide range of agricultural commodities and its use is growing in many countries. Mindful of the importance of enhancing knowledge and awareness of the legal regime applicable to contract farming operations, the International Institute for the Unification of Private Law (UNIDROIT), the Food and Agriculture Organization of the United Nations (FAO) and the International Fund for Agricultural Development (IFAD) have prepared this UNIDROIT/FAO/IFAD Legal Guide on Contract Farming. The Guide is a useful tool and reference point for a broad range of users involved in contract farming practice, policy design, legal research and capacity building. It can contribute as well to create a favourable, equitable and sustainable environment for contract farming.

Evolutionary Psychology in the Business Sciences Gad Saad, 2011-07-09 All individuals who operate in the business sphere, whether as consumers, employers, employees, entrepreneurs, or financial traders to name a few constituents, share a common biological heritage and are defined by a universal human nature. As such, it is surprising that so few business scholars have incorporated biological and evolutionary-informed theories within their conceptual toolboxes. This edited book addresses this lacuna by culling chapters at the intersection of the evolutionary behavioral sciences and specific business contexts including in marketing, consumer behavior, advertising, innovation and creativity, intertemporal choice, negotiations, competition and cooperation in organizational settings, sex differences in workplace patterns, executive

leadership, business ethics, store design, behavioral decision making, and electronic communication. To reword the famous aphorism of T. G. Dobzhansky, nothing in business makes sense except in the light of evolution.

It reflects the contribution of citizen science to societal development, education, or innovation and provides an overview of the field of actors as well as on tools and guidelines. It serves as an introduction for anyone who wants to get involved in and learn more about the science of citizen science.
