*Participatory Communication* Thomas Tufte, Paolo Mefalopulos, 2009-07-02 What do we mean when we say participatory communication? What are the practical implications of working with participatory communication strategies in development and social change processes? What experiences exist in practice that documents that participatory communication adds value to a development project or programme? The aim of this user guide on participatory communication is to provide answers to some of these questions. Many communication practitioners and development workers face obstacles and challenges in their practical work. A participatory communication strategy offers a very specific perspective on how to articulate social processes, decision-making processes and any change process for that matter. Participatory approaches are nothing new. However, what is new is the proliferation of institutions, especially governmental but also non-governmental, that seek participatory approaches in their development initiative. This guide seeks to provide perspectives, tools and experiences regarding how to go about it with participatory communication strategies. It is conceived as a guide that hopefully can be of relevance and utility for development workers in the field. It is targeted at both at government and their officials, World Bank staff and at civil society.

*Communication and Human Rights* Aliaa Dakroury, 2009 Communication and Human Rights offers a conceptual scheme for understanding the dynamic interrelationship between communication and human rights. Claims that communication is a basic right, available-for-all, and taken-for-granted by all human beings, as stated in various declarations, incites heated debates and controversies in practice, including hate speech, propaganda, and even claims for publishing criminal diaries and pornography. This book examines the nature and context of these divisive declarations and provides a provisional conceptualization of the concept right. To unpack these debates, this novel book delves into the position of various thinkers, scholars and intellectuals: from Milton, Locke, and Voltaire to Dewey, Habermas, and Schiller; concluding that a possible Right to Communicate would build on a notion of Habermasian validity, where this right is related to a specific type of communication-right-based communication-that is characterized by pureness, truth, and sincerity as well as the existence of a relative relationship between a claim of a right to send and the responsibility toward receivers.

**Cruel but Not Unusual** Ramona Alaggia, Cathy Vine, 2013-05-21 Violence in families and intimate relationships affects a significant proportion of the population—from very young children to the elderly—with far-reaching and often devastating consequences. *Cruel but Not Unusual* draws on the expertise of scholars and practitioners to present readers with the latest research and thinking about the history, conditions, and impact of violence in these contexts. For this new edition, chapters have been updated to reflect changes in data and legislation. New chapters include an examination of trauma from a neurobiological perspective; a critical analysis of the “gender symmetry debate,” a debate that questions the gendered nature of intimate violence; and an essay on the history and evolution of the women’s movement dedicated to addressing violence against women, which advances theoretical developments that remind readers of the breadth of inclusivity that should be at the heart of working in this field.

**Body Evidence** Shamita Das Dasgupta, 2007-04-01 When South Asians immigrated to the United States in great numbers in the 1970s, they were passionately driven to achieve economic stability and socialize the next generation to retain the traditions of their home culture. During these years, the immigrant community went to great lengths to project an impeccable public image by denying the existence of social problems such as domestic violence, sexual assault, child sexual abuse, mental illness, racism, and intergenerational conflict. It was not until recently that activist groups have worked to bring these issues out into the open. In *Body Evidence*, more than twenty scholars and public health professionals uncover the unique challenges faced by victims of violence in intimate spaces . . . within families, communities and trusted relationships in South Asian American communities. Topics include cultural obsession with women's chastity and virginity; the continued silence surrounding intimate violence among women who identify themselves as lesbian, bisexual, or transgender; the consequences of refusing marriage proposals or failing to meet dowry demands; and, ultimately, the ways in which the United States courts often confuse and exacerbate the plights of these women.

*Making Health Services Adolescent Friendly* World Health Organization, 2013 This guidebook sets out the public health rationale for making it easier for adolescents to obtain the health services that they need to protect and improve their health and well-being, including sexual and reproductive health services. It defines 'adolescent-friendly health services' from the perspective of quality, and provides step-by-step guidance on developing quality standards for health service provision to adolescents. Drawing upon international experience, it is also tailored to national epidemiological, social, cultural and economic realities, and provides guidance on identifying what actions need to be taken to assess whether appropriate standards have been achieved.--Introduction, page v.

*Health Inequities in Canada* Olena Hankivsky, 2011-05-28 There is a growing recognition that existing theories on, and approaches to, health inequities are limited in their ability to capture how these inequities are produced through changing, co-constituted, and intersecting effects of multiple forms of oppression. Intersectionality responds to this problem by

considering the interactions and combined impacts of social locations and structural processes on the creation and perpetuation of inequities. It offers unique insights into, and possible solutions to, some of Canada's most pressing health disparities. This volume brings together Canadian activists, community-based researchers, and scholars from a range of disciplines to apply interpretations of intersectionality to health and organizational governance cases. By addressing specific health issues, this book advances methodological applications of intersectionality in health research, policy, and practice. Most importantly, it demonstrates that health inequities cannot be understood or addressed without the interrogation of power and diverse social locations and structures that shape lives and experiences of health.

**Event Cognition** Gabriel A. Radvansky, Jeffrey M. Zacks, 2014 We understand events as the things that happen to us, what we do, what we anticipate with pleasure or dread, and what we remember with fondness or regret. In this book, Gabriel A. Radvansky and Jeffrey M. Zacks provide the first integrated account of how people perceive, remember, and think about events. The authors bring together data from a wide range of sources and approach it using lively, accessible language suitable for a multidisciplinary audience.

**Cancer Basics** Julia Eggert, 2010 From the foundations of cancer to issues of survivorship, this book provides all the details and information needed to gain a true understanding of the 'basics' of cancer.

**Out of the Shadows** Josephine Fong, 2010 Abuse of women by their intimate partners is a serious and continuing social problem encountered by a host of agencies. This title contains research findings, practice guidance and anecdotal material relevant to both students and practitioners working with the women who face the life modifying and threatening challenges of abuse.

Management Problems in Africa Ukandi Godwin Damachi, Hans Dieter Seibel, 1986-06-18

*Trade, Finance, and Development* Biswajit Chatterjee, Ajitava Raychaudhuri, 2004 Provides A Snapshot Of Some Emerging Issues Like International Trade, Financial Economics And Development Economics. Divided Into Three Sections With 12 Papers In All. Some Papers Deal With Empirical Treatment Of Issues Relevant To India, The Others Relate To Theoretical Issues Relevant For Developing Nations.

**Extremity Trauma** James P. Kennedy, 1992

*Early Osteoarthritis* Christian Lattermann, Henning Madry, Norimasa Nakamura, Elizaveta Kon, 2021-10-09 Early osteoarthritis is novel topic for orthopedic surgeons and its process begins immediately after joint injury. The mechanical restoration of the joint surface or ligamentous stability is not sufficient to restore the homeostatic environment in the joint, and this leads to osteoarthritis, despite mechanical stability and alignment. This book sheds light on the various mechanisms and systems involved in the gradual decline of the injured joint toward manifest osteoarthritis. Published in collaboration with ISAKOS, this volume appeals to all stakeholders in surgical orthopaedics and sports medicine.

**Chapman's Comprehensive Orthopaedic Surgery** Michael W Chapman,Michelle A James,

**Refugee Rights** David Hollenbach, SJ,2008-04-30 Of the over 33 million refugees and internally displaced people in the world today, a disproportionate percentage are found in Africa. Most have been driven from their homes by armed strife, displacing people into settings that fail to meet standards for even basic human dignity. Protection of the human rights of these people is highly uncertain and unpredictable. Many refugee service agencies agree advocacy on behalf of the displaced is a key aspect of their task. But those working in the field are so pressed by urgent crises that they can rarely analyze the requirements of advocacy systematically. Yet advocacy must go beyond international law to human rights as an ethical standard to prevent displaced people from falling through the cracks of our conflicted world. *Refugee Rights: Ethics, Advocacy, and Africa* draws upon David Hollenbach, SJ's work as founder and director of the Center for Human Rights and International Justice at Boston College to provide an analytical framework for vigorous advocacy on behalf of refugees and internally displaced people. Representing both religious and secular perspectives, the contributors are scholars, practitioners, and refugee advocates—all of whom have spent time on the ground in Africa. The book begins with the poignant narrative of Abebe Feyissa, an Ethiopian refugee who has spent over fifteen years in a refugee camp from hell. Other chapters identify the social and political conditions integral to the plight of refugees and displaced persons. Topics discussed include the fundamental right to freedom of movement, gender roles and the rights of women, the effects of war, and the importance of reconstruction and reintegration following armed conflict. The book concludes with suggestions of how humanitarian groups and international organizations can help mitigate the problem of forced displacement and enforce the belief that all displaced people have the right to be treated as their human dignity demands. *Refugee Rights* offers an important analytical resource for advocates and students of human rights. It will be of particular value to practitioners working in the field.

*Operative Techniques in Orthopaedic Surgery* Sam W. Wiesel,2015-07-10 Lavishly illustrated, comprehensive in scope, and easy to use, the second edition of *Operative Techniques in Orthopaedic Surgery* guides you to mastery of every surgical procedure you're likely to perform - while also providing a thorough understanding of how to select the best procedure, how to avoid complications, and what outcomes to expect. More than 800 global experts take you step by step through each procedure, and 13,000 full-color intraoperative photographs and drawings clearly demonstrate how to perform the techniques. Extensive use of bulleted points and a highly templated format allow for quick and easy reference across each of the four volumes.

*Periprosthetic Fractures of the Hip and Knee* Frank A. Liporace,Richard S. Yoon,2018-11-26 This up-to-date, comprehensive yet concise guide for orthopedic surgeons covers the salient points of anatomy and operative approaches for the management of periprosthetic fractures of the hip and knee: breaks in bone that occur around the components or

implants of a total joint replacement. The opening chapter focuses on the general considerations and work-up of these injuries, including epidemiology, classification, anatomy, and knowledge of the biomechanics and biology behind the treatments. The subsequent sections then discuss the hip and knee, respectively, and are case-based. These describe management strategies for the particular periprosthetic fracture with either a stable or a loose prosthesis as well as associated complications, including fractures of the acetabulum, the greater trochanter and proximal femur, distal femur, tibia, and interprosthetic and interimplant fractures. Written by experts in the field and replete with plentiful, practical tips and tricks, *Periprosthetic Fractures of the Hip and Knee* is a valuable resource for orthopedic and trauma surgeons, residents and fellows.

*Elements of Scene Perception* Monica S. Castelhana, Carrick C. Williams, 2021-11-11 Visual cognitive processes have traditionally been examined with simplified stimuli, but generalization of these processes to the real-world is not always straightforward. Using images, computer-generated images, and virtual environments, researchers have examined processing of visual information in the real-world. Although referred to as scene perception, this research field encompasses many aspects of scene processing. Beyond the perception of visual features, scene processing is fundamentally influenced and constrained by semantic information as well as spatial layout and spatial associations with objects. In this review, we will present recent advances in how scene processing occurs within a few seconds of exposure, how scene information is retained in the long-term, and how different tasks affect attention in scene processing. By considering the characteristics of real-world scenes, as well as different time windows of processing, we can develop a fuller appreciation for the research that falls under the wider umbrella of scene processing.

*Who is an African?* Jideofor Adibe, 2009-05-30 Who is an African? At face value, the answer seems obvious. Surely, everyone knows who the African is, it would seem. But the answer becomes less obvious once other probing qualifiers are added to the question. How is the African identity constructed in the face of the mosaic of identities that people of African ancestry living within and beyond the continent bear? Do all categorised as Africans or as having an African pedigree perceive themselves as Africans? Are all who perceive themselves as Africans accepted as such? Are there levels of e;Africanness; and are some more African than others? How does African identity interface with other levels of identity and citizenship in Africa? And what are the implications of the contentious nature of African identity and citizenship for the projects of pan-Africanism, the making of the Africa-nation, and Africa's development trajectories? Contributors to the volume, including Ali Mazrui, Kwesi Prah, Gamal Nkrumah, Helmi Sharawy and Marcel Kitissou, address these questions and more. They examine the issues of African identity and citizenship, the politics spurned by the co-existence of peoples of different Africanities in the same country, and the prospects of constructing an Africa-Nation in which Africans of all hues are

as sentimentally attached to, as say, the Europeans are attached to Europe. Though the projects of pan-Africanism and the making of the Africa-nation have not achieved the desired levels of success, some of the contributors found sufficient grounds for optimism: These grounds include the deepening democratic ethos in the continent, which is believed will unleash a love of freedom that will supersede the fissiparous tendencies that underlie the various notions of Africanity; and the rise of new economic powers such as India and China, which are increasingly looking towards Africa as the next big destination. The emergence of Barrack Obama, whose father is Kenyan, as the President of the United States of America, also appears to be unleashing a new wave of can-do attitude. It is argued that for many Africans, Obama is both an African name they can relate to, and a metaphor expressing that anything is possible if you strive hard for it with the 'right attitude.' This 'right attitude' is an attitude that is post-chauvinism, for it is only by being post-racial and a reconciler that a Blackman, with an African Muslim father, who was not born into privilege, could emerge president of the most powerful country in the world. This lesson is not lost on Africans and it is a powerful boost to the African unity project.
