Alan Branch, Martin Stopford

Reducing Underage Drinking Institute of Medicine, National Research Council, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Developing a Strategy to Reduce and Prevent Underage Drinking, 2004-03-26 Alcohol use by young people is extremely dangerous - both to themselves and society at large. Underage alcohol use is associated with traffic fatalities, violence, unsafe sex, suicide, educational failure, and other problem behaviors that diminish the prospects of future success, as well as health risks - and the earlier teens start drinking, the greater the danger. Despite these serious concerns, the media continues to make drinking look attractive to youth, and it remains possible and even easy for teenagers to get access to alcohol. Why is this dangerous behavior so pervasive? What can be done to prevent it? What will work and who is responsible for making sure it happens? *Reducing Underage Drinking* addresses these questions and proposes a new way to combat underage alcohol use. It explores the ways in which may different individuals and groups contribute to the problem and how they can be enlisted to prevent it. *Reducing Underage Drinking* will serve as both a game plan and a call to arms for anyone with an investment in youth health and safety.

Textbook of Plastic and Reconstructive Surgery Deepak K. Kalaskar, Peter E M Butler, Shadi Ghali, 2016-08-02

Written by experts from London's renowned Royal Free Hospital, *Textbook of Plastic and Reconstructive Surgery* offers a comprehensive overview of the vast topic of reconstructive plastic surgery and its various subspecialties for introductory

plastic surgery and surgical science courses. The book comprises five sections covering the fundamental principles of plastic surgery, cancer, burns and trauma, paediatric plastic surgery and aesthetic surgery, and covers the breadth of knowledge that students need to further their career in this exciting field. Additional coverage of areas in which reconstructive surgery techniques are called upon includes abdominal wall reconstruction, ear reconstruction and genital reconstruction. A chapter on aesthetic surgery includes facial aesthetic surgery and blepharoplasty, aesthetic breast surgery, body contouring and the evolution of hair transplantation. The broad scope of this volume and attention to often neglected specialisms such as military plastic surgery make this a unique contribution to the field. Heavily illustrated throughout, Textbook of Plastic and Reconstructive Surgery is essential reading for anyone interested in furthering their knowledge of this exciting field. This book was produced as part of JISC's Institution as e-Textbook Publisher project. Find out more at <https://www.jisc.ac.uk/rd/projects/institution-as-e-textbook-publisher>

Transparency in Nuclear Warheads and Materials Nicholas Zarimpas, 2003 These studies address the technical means and procedures for establishing transparency in nuclear warheads and materials in the nuclear weapons states.

Science Policy Under Thatcher Jon Agar, 2019-06-03 Margaret Thatcher was prime minister from 1979 to 1990, during which time her Conservative administration transformed the political landscape of Britain. Science Policy under Thatcher is the first book to examine systematically the interplay of science and government under her leadership. Thatcher was a working scientist before she became a professional politician, and she maintained a close watch on science matters as prime minister. Scientific knowledge and advice were important to many urgent issues of the 1980s, from late Cold War questions of defence to emerging environmental problems such as acid rain and climate change. Drawing on newly released primary sources, Jon Agar explores how Thatcher worked with and occasionally against the structures of scientific advice, as the scientific aspects of such issues were balanced or conflicted with other demands and values. To what extent, for example, was the freedom of the individual scientist to choose research projects balanced against the desire to secure more commercial applications? What was Thatcher's stance towards European scientific collaboration and commitments? How did cuts in public expenditure affect the publicly funded research and teaching of universities? In weaving together numerous topics, including AIDS and bioethics, the nuclear industry and strategic defence, Agar adds to the picture we have of Thatcher and her radically Conservative agenda, and argues that the science policy devised under her leadership, not least in relation to industrial strategy, had a prolonged influence on the culture of British science.

Critical Needs and Gaps in Understanding Prevention, Amelioration, and Resolution of Lyme and Other Tick-Borne Diseases Institute of Medicine, Board on Population Health and Public Health Practice, Committee on Lyme Disease and Other Tick-Borne Diseases: The State of the Science, 2011-07-01 A single tick bite can have debilitating consequences. Lyme disease is the most common disease carried by ticks in the United States, and the number of those afflicted is growing

steadily. If left untreated, the diseases carried by ticks-known as tick-borne diseases-can cause severe pain, fatigue, neurological problems, and other serious health problems. The Institute of Medicine held a workshop October 11-12, 2010, to examine the state of the science in Lyme disease and other tick-borne diseases.

Unequal Treatment Institute of Medicine,Board on Health Sciences Policy,Committee on Understanding and Eliminating Racial and Ethnic Disparities in Health Care,2009-02-06 Racial and ethnic disparities in health care are known to reflect access to care and other issues that arise from differing socioeconomic conditions. There is, however, increasing evidence that even after such differences are accounted for, race and ethnicity remain significant predictors of the quality of health care received. In *Unequal Treatment*, a panel of experts documents this evidence and explores how persons of color experience the health care environment. The book examines how disparities in treatment may arise in health care systems and looks at aspects of the clinical encounter that may contribute to such disparities. Patients' and providers' attitudes, expectations, and behavior are analyzed. How to intervene? *Unequal Treatment* offers recommendations for improvements in medical care financing, allocation of care, availability of language translation, community-based care, and other arenas. The committee highlights the potential of cross-cultural education to improve provider-patient communication and offers a detailed look at how to integrate cross-cultural learning within the health professions. The book concludes with recommendations for data collection and research initiatives. *Unequal Treatment* will be vitally important to health care policymakers, administrators, providers, educators, and students as well as advocates for people of color.

Deep Carbon Beth N. Orcutt,Isabelle Daniel,Rajdeep Dasgupta,2019-10-17 A comprehensive guide to carbon inside Earth - its quantities, movements, forms, origins, changes over time and impact on planetary processes. This title is also available as Open Access on Cambridge Core.

Molecular Epidemiology Paul A. Schulte,Frederica P. Perera,2012-12-02 This book will serve as a primer for both laboratory and field scientists who are shaping the emerging field of molecular epidemiology. Molecular epidemiology utilizes the same paradigm as traditional epidemiology but uses biological markers to identify exposure, disease or susceptibility. Schulte and Perera present the epidemiologic methods pertinent to biological markers. The book is also designed to enumerate the considerations necessary for valid field research and provide a resource on the salient and subtle features of biological indicators.

World Intellectual Property Indicators 2019 World Intellectual Property Organization, 2019-10-15 This authoritative report analyzes IP activity around the globe. Drawing on 2018 filing, registration and renewals statistics from national and regional IP offices and WIPO, it covers patents, utility models, trademarks, industrial designs, microorganisms, plant variety protection and geographical indications. The report also draws on survey data and industry sources to give a picture of activity in the publishing industry.

News, Business and Public Information Arthur der Weduwen, Andrew Pettegree, 2020 The history of newspaper advertising began in the seventeenth-century Low Countries. The newspaper publishers of the Dutch Republic were the first to embrace advertisements, decades before their peers in other news markets in Europe. In this survey, Arthur der Weduwen and Andrew Pettegree have brought together the first 6,000 advertisements placed in Dutch and Flemish newspapers between 1620 and 1675. Provided here in an English translation, and accompanied by seven indices, this work provides for the first time a complete overview of the development of newspaper advertising and its impact on the Dutch book trade, economy and society. In these evocative announcements, ranging from advertisement for library auctions, the publication of new books, pamphlets and maps to notices of crime, postal schedules or missing pets, the seventeenth century is brought to life. This survey offers a unique perspective on daily life, personal relationships and societal change in the Dutch Golden Age.

World History as the History of Foundations, 3000 BCE to 1500 CE Michael Borgolte, 2019-10-29 In *World History as the History of Foundations, 3000 BCE to 1500 CE*, Michael Borgolte investigates the origins and development of foundations from Antiquity to the end of the Middle Ages. In his survey foundations emerge not as mere legal institutions, but rather as “total social phenomena” which touch upon manifold aspects, including politics, the economy, art and religion of the cultures in which they emerged. Cross-cultural in its approach and the result of decades of research, this work represents by far the most comprehensive account of the history of foundations that has hitherto been published.
