The Ocean and Cryosphere in a Changing Climate Intergovernmental Panel on Climate Change (IPCC), 2022-05-19
The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.

Global Study on Homicide 2013 United Nations, 2014-06-15 The Global Study on Homicide 2013 is based on comprehensive data from more than 200 countries/territories, and examines and analyses patterns and trends in homicide at the global, regional, national and sub-national levels. Such analysis is fundamental to understanding the various factors and dynamics that drive homicide, so that measures can be developed to reduce violent crime. The Study provides a typology of homicide, including homicide related to crime, coexistence-related homicide, and socio-political homicide. The nature of crime in several countries emerging from conflict, the role of various mechanisms in killing, and the response of the criminal justice system to homicide are also analyzed. A further chapter examines homicide at the sub-national level, and includes analysis at the city-level for selected global cities.

The UNESCO Universal Declaration on Bioethics and Human Rights H. ten Have, Michèle Jean, 2009-01-01 In October 2005, UNESCO Member States adopted by acclamation the Universal Declaration on Bioethics and Human Rights. For the first time in the history of bioethics, some 190 countries committed themselves and the international community to respect and apply fundamental ethical principles related to medicine, the life sciences and associated technologies. This publication provides a new impetus to the dissemination of the Declaration, and is part of the organisation's continuous effort to contribute to the understanding of its principles worldwide. The authors, who were almost all involved in the elaboration of the text of the Declaration, were asked to respond on each article: Why was it included? What does it mean? How can it be applied? Their responses shed light on the historical background of the text and its evolution throughout the drafting process. They also provide a reflection on its relevance to previous declarations and bioethical literature, and its potential interpretation and application in challenging and complex bioethical debates.

World Heritage Sites and Indigenous Peoples' Rights Stefan Disko, Helen Tugendhat, 2014 This book includes twenty case studies of World Heritage sites from around the world that explore, from a human rights perspective, indigenous peoples' experiences with World Heritage sites and with the processes of the World Heritage Convention. The book will serve as a resource for indigenous peoples, World Heritage site managers, and UNESCO, as well as academics, and it will contribute to discussions about what changes or actions are needed to ensure that World Heritage sites can play a consistently positive role for indigenous peoples, in line with the spirit of the United Nations Declaration on the Rights of Indigenous Peoples.

Global Economic Prospects 2005, 2004 This annual publication analyses the global and national dimensions of the investment climate for developing countries, in terms of the policy and institutional environment. This edition examines the growth of regional trade agreements, which have risen eight-fold in two decades with currently, as much as 40 percent of global trade taking place among countries that have some form of reciprocal regional trade agreement. Issues discussed include: regional trading trends; effects of regional agreements on trade creation, trade facilitation and services, investment, intellectual property rights, and labour mobility; whether the proliferation of agreements poses risks for multilateral trading system, and if so, options for managing them. The report finds that agreements leading to open regionalism (that is, deeper integration of trade as a result of low external tariffs, increased services competition, and efforts to reduce cross-border and customs delays costs) are effective as part of a larger trade strategy to promote growth. Although regional agreements can prove beneficial to member countries, they can have adverse effects on excluded countries, and the lowering of border barriers around the world is crucial to minimising these effects. The completion of the Doha Development Agenda by all WTO countries will reduce the risk of trade diversion associated with regional agreements and will decrease trade losses of countries excluded from agreements.

Privatization in Latin America Alberto Chong, Florencio Lopez de Silanes, 2005-03-15 Privatization is under attack. Beginning in the 1980s, thousands of failing state-owned enterprises worldwide have been turned over to the private sector. But public opinion has turned against privatization. A large political backlash has been brewing for some time, infused by accusations of corruption, abuse of market power, and neglect of the poor. What is the real record of privatization and are the criticisms justified? 'Privatization in Latin America' evaluates the empirical evidence on privatization in a region that has witnessed an extensive decline in the state's share of production over the past 20 years. The book is a compilation of recent studies that provide a comprehensive analysis of the record of and accusations against privatization, with important recommendations for the future. Seven countries are investigated: Argentina, Bolivia, Brazil, Chile, Colombia, Mexico, and Peru. This book will be vital to anyone interested in the privatization debate but especially to those involved in civil service reform, corporate governance, economic policy, finance, and anticorruption efforts. 'Privatization is important but controversial. While economists typically favor it, others are skeptical. This book provides strong scientific evidence that privatization has been beneficial for many Latin American countries, although some privatizations failed and some groups in society lost out. As usual, the devil is in the details: how privatization is carried out and what reforms accompany it are crucial to its success. The book is definitely an invaluable contribution to the privatization debate.' --Oliver Hart, Andrew E. Furer Professor of Economics, Harvard University

The Cambridge Handbook of Immunities and International Law Tom Ruys, Nicolas Angelet, Luca Ferro, 2019-04-30 Few topics of international law speak to the imagination as much as international immunities. Questions pertaining to immunity from jurisdiction or execution under international law surface on a frequent basis before national courts, including at the highest levels of the judicial branch and before international courts or tribunals. Nevertheless, international immunity law is and remains a challenging field for practitioners and scholars alike. Challenges stem in part from the uncertainty pertaining to the customary content of some immunity regimes said to be in a 'state of flux', the divergent – and at times directly conflicting – approaches to immunity in different national and international jurisdictions, or the increasing intolerance towards impunity that has accompanied the advance of international criminal law and human rights law. Composed of thirty-four expertly written contributions, the present volume uniquely provides a comprehensive tour d'horizon of international immunity law, traversing a wealth of national and international practice.

Asia Rising Hal Hill, Maria Socorro Gochoco-Bautista, 2013-01-01 'This book provides a coherent and current account of how India, Indonesia, Malaysia, Thailand, the Philippines and the People's Republic of China coped with the Asian financial crisis of the 1990s and the recent global economic recession, and how they may address future challenges in maintaining growth in difficult times. It features a valuable overview of issues from a regional perspective, five chapters on general elements and obstacles in development, and individual chapters on the experience of each of the six countries. Every chapter is replete with relevant institutional and statistical data. The volume fills a void in the literature and is highly recommended for graduate students and for economists concerned with contemporary Asia.' – Peter Drake, The University of New England and Australian Catholic University, Australia 'To understand what makes Asia tick in the face of continuing global uncertainty and instability one has to go beyond numbers into the region's psyche and idiosyncrasies. This volume provides an interestingly intrusive and refreshingly insightful analysis of a highly complex phenomenon that defies generalizations as shown by the diversity of individual country experiences.' – Mohamed Ariff, International Centre for Education in Islamic Finance (INCEIF), Malaysia The center of global economic activity is shifting rapidly towards Asia, driven by a combination of the economic dynamism of the People's Republic of China, India, and other middle-income Asian countries, and sluggish growth in the OECD economies. The rapid growth and rising global prominence have raised a range of major challenges for

Asia and for the rest of the world. This comprehensive, forward-looking book examines these issues through in-depth studies of major Asian economies and an analysis of the key development policy options. The contributors, leading international authorities in their field, explore cross-cutting thematic issues with special reference to developing Asia. They address a broad range of subjects including: investment and productivity, savings and the savings-investment relationship, financial development, the provision of infrastructure, and governance and institutions. Detailed country studies focusing on the People's Republic of China, India, Indonesia, Malaysia, the Philippines, and Thailand not only provide an analytical narrative for each case study, but also draw attention to the similarities and diversity within the region. This challenging and thought-provoking book will prove an important point of reference for scholars, researchers, and students in the fields of economics, development economics, and Asian studies.

Communicating Science Toss Gascoigne, Bernard Schiele, Joan Leach, Michelle Riedlinger, Luisa Massarani, Bruce V. Lewenstein, Peter Broks, 2020-09-14 Modern science communication has emerged in the twentieth century as a field of study, a body of practice and a profession—and it is a practice with deep historical roots. We have seen the birth of interactive science centres, the first university actions in teaching and conducting research, and a sharp growth in employment of science communicators. This collection charts the emergence of modern science communication across the world. This is the first volume to map investment around the globe in science centres, university courses and research, publications and conferences as well as tell the national stories of science communication. How did it all begin? How has development varied from one country to another? What motivated governments, institutions and people to see science communication as an answer to questions of the social place of science? **Communicating Science** describes the pathways followed by 39 different countries. All continents and many cultures are represented. For some countries, this is the first time that their science communication story has been told.
