The Ocean and Cryosphere in a Changing Climate Intergovernmental Panel on Climate Change (IPCC),2022-05-19
The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.

Engaging Citizens in Policy Making Randma-Liiv, Tiina,Lember, Veiko,2022-02-15 This is an open access title available under the terms of a [CC BY-NC-ND 4.0] License. It is free to read, download and share on Elgaronline.com. Exploring academic and policy thinking on e-participation, this book opens up the organizational and institutional 'black box' and provides new insights into how public administrations in 15 European states have facilitated its implementation.

Judging Research Martyn Rittmann,2020-04-17 The 2019 MPDI Writing Prize invited early stage researchers who are not native English speakers to write on the subject of how research should be evaluated and how researchers should be rewarded. Six prizes were awarded, however there were many more entries. This book collates many of those entries and contains inspiring, thought-provoking and original viewpoints of open science through the eyes of those conducting research on a daily basis.

Volcanism and Tectonism Across the Inner Solar System T. Platz,M. Massironi,P.K. Byrne,H. Hiesinger ,2015-01-05
Volcanism and tectonism are the dominant endogenic means by which planetary surfaces change. This book aims to encompass the broad range in character of volcanism, tectonism, faulting and associated interactions observed on planetary

bodies across the inner solar system - a region that includes Mercury, Venus, Earth, the Moon, Mars and asteroids. The diversity and breadth of landforms produced by volcanic and tectonic processes is enormous, and varies across the inner solar system bodies. As a result, the selection of prevailing landforms and their underlying formational processes that are described and highlighted in this volume are but a primer to the expansive field of planetary volcanism and tectonism. This Special Publication features 22 research articles about volcanic and tectonic processes manifest across the inner solar system.

How to Feed the World Jessica Eise, Kenneth A. Foster, 2018-03-15 By 2050, we will have ten billion mouths to feed in a world profoundly altered by environmental change. How will we meet this challenge? In *How to Feed the World*, a diverse group of experts from Purdue University break down this crucial question by tackling big issues one-by-one. Covering population, water, land, climate change, technology, food systems, trade, food waste and loss, health, social buy-in, communication, and equal access to food, the book reveals a complex web of challenges. Contributors unite from different perspectives and disciplines, ranging from agronomy and hydrology to economics. The resulting collection is an accessible but wide-ranging look at the modern food system.

The World Health Report 2006 World Health Organization, 2006-03-23 The 2006 World Health Report focuses on the chronic shortages of doctors, midwives, nurses and other health care support workers in the poorest countries of the world where they are most needed. This is particularly true in sub-Saharan Africa, which has only four in every hundred global health workers but has a quarter of the global burden of disease, and less than one per cent of the world's financial resources. Poor working conditions, high rates of attrition due to illness and migration, and education systems that are unable to pick up the slack reflect the depth of the challenges in these crisis countries. This report considers the challenges involved and sets out a 10-year action plan designed to tackle the crisis over the next ten years, by which countries can strengthen their health system by building their health workforces and institutional capacity with the support of global partners.

State of the World's Cities 2010/2011, 2010 One billion people worldwide live in slums and that figure is predicted to reach 2 billion by 2030. This new volume from UN-HABITAT unpacks the complex social and economic issues using the novel conceptual framework of the urban divide.

Gene Drives on the Horizon National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Life Sciences, Committee on Gene Drive Research in Non-Human Organisms: Recommendations for Responsible Conduct, 2016-08-28 Research on gene drive systems is rapidly advancing. Many proposed applications of gene drive research aim to solve environmental and public health challenges, including the reduction of poverty and the burden of vector-borne diseases, such as malaria and dengue, which disproportionately impact low and middle income countries.

However, due to their intrinsic qualities of rapid spread and irreversibility, gene drive systems raise many questions with respect to their safety relative to public and environmental health. Because gene drive systems are designed to alter the environments we share in ways that will be hard to anticipate and impossible to completely roll back, questions about the ethics surrounding use of this research are complex and will require very careful exploration. *Gene Drives on the Horizon* outlines the state of knowledge relative to the science, ethics, public engagement, and risk assessment as they pertain to research directions of gene drive systems and governance of the research process. This report offers principles for responsible practices of gene drive research and related applications for use by investigators, their institutions, the research funders, and regulators.

Biodiversity and Health in the Face of Climate Change Melissa R. Marselle, Jutta Stadler, Horst Korn, Katherine N. Irvine, Aletta Bonn, 2019-06-11 This open access book identifies and discusses biodiversity's contribution to physical, mental and spiritual health and wellbeing. Furthermore, the book identifies the implications of this relationship for nature conservation, public health, landscape architecture and urban planning – and considers the opportunities of nature-based solutions for climate change adaptation. This transdisciplinary book will attract a wide audience interested in biodiversity, ecology, resource management, public health, psychology, urban planning, and landscape architecture. The emphasis is on multiple human health benefits from biodiversity – in particular with respect to the increasing challenge of climate change. This makes the book unique to other books that focus either on biodiversity and physical health or natural environments and mental wellbeing. The book is written as a definitive 'go-to' book for those who are new to the field of biodiversity and health.

The Global Benefits of Open Research Martyn Rittman, 2018-11-20 The 2018 MPDI Writing Prize invited early stage researchers who are not native English speakers to write on the subject of the global benefits of open research. Six prizes were awarded, however there were many more entries. This book collates many of those entries and contains inspiring, thought-provoking and original viewpoints of open science through the eyes of those conducting research on a daily basis

Age-Period-Cohort Analysis Yang Yang, Kenneth C. Land, 2016-04-19 This book explores the ways in which statistical models, methods, and research designs can be used to open new possibilities for APC analysis. Within a single, consistent HAPC-GLMM statistical modeling framework, the authors synthesize APC models and methods for three research designs: age-by-time period tables of population rates or proportions, repeated cross-section sample surveys, and accelerated longitudinal panel studies. They show how the empirical application of the models to various problems leads to many fascinating findings on how outcome variables develop along the age, period, and cohort dimensions.

Sustainable Commodity Use Maximilian Eduard Oehl, 2021-12-07 This open access book examines the governance and legal landscape of the global commodity sector. For that purpose, the author conceptualises both Global Commodity Governance (GCG) as well as Transnational Commodity Law (TCL). He defines the key terms of Global Commodity

Governance, delineates the underlying legal framework of Transnational Commodity Law, and assesses the effectiveness of Transnational Commodity Law in fostering a functional commodity sector. “Sustainable Commodity Use” is based on a comprehensive analysis of over 250 international agreements, standards, and guiding documents. The author distills the main findings into a conceptualisation of Transnational Commodity Law and provides the reader with a succinct overview of its normative configurations as well as regulatory gaps. Moreover, he elaborates a taxonomy of International Commodity Agreements. In addition, an outline of the normative substance of Transnational Commodity Law features in an appendix to the main text. The author concludes by making concrete suggestions on how rules regulating commodity activities *de lege ferenda* could and should be designed to improve the effectiveness of law regulating transnational commodity activity. In doing so, he demonstrates the application of the sustainable use principle as the overall objective and purpose of Transnational Commodity Law and discusses International Commodity Agreements as future regulatory instruments. This book may assist lawmakers, practitioners, civil society advocates, and academics worldwide in developing a legal framework for sustainable global commodity activity.

Dictionary of Arabic Loanwords in the Languages of Central and East Africa Sergio Baldi, 2020-11-30 Dictionary of Arabic Loanwords in the Languages of Central and East Africa analyzes around 3000 Arabic loanwords in more than 50 languages in the area, and completes the work started in a previous similar work on West Africa.

Patterns of Change in Earth Evolution H.D. Holland, A.F. Trendall, 2011-12-07 3 of the experience of the last few generations. The group of happily unexperienced events includes large bolide impacts with the Earth. The evidence for the occurrence of such impacts at intervals of some tens of millions of years is quite convincing, and Lyell stands admonished by Hamlet: There are more things in heaven and earth, Horatio, than are dreamt of in your philosophy. The role of bolide impacts on the history of life during other portions of the Phanerozoic Eon is less clear (see Raup and Fischer, both this volume), and catastrophic changes unrelated to extraterrestrial processes may have been important (see Holser, this volume). Changes in the later Precambrian biota are still difficult to interpret, in part because the preservation of soft-bodied animals from this period of Earth history is so unusual (see Seilacher, this volume). During the past billion years or so, bolide impacts have exerted a significant effect on the Earth's surface and its inhabitants, but not on its interior. The 3800 Ma rocks at Isua in West Greenland are the oldest terrestrial rocks that are currently available for inspection (see Dymek, this volume). They contain abundant evidence for the operation of chemical and physical processes that are similar to those of the present day. This situation could not have prevailed during the entire 700 Ma preceding the formation of the Isua rocks.

Aptamers for Medical Applications Yiyang Dong, 2021-03-25 This book outlines comprehensively the main medical uses of aptamers, from diagnosis to therapeutics in fourteen chapters. Pioneering topics covered include aptamer pharmaceuticals, aptamers for malign tumors, aptamers for personalized therapeutics and aptamers for point-of-care testing.

The book offers an essential guide for medical scientists interested in developing aptamer-based schemes for better theranostics. It is therefore of interest for not only academic researchers, but also practitioners and medical researchers in various fields of medical science, medical research and bio-analytical chemistry.

Skilled Labor Mobility and Migration Elisabetta Gentile, 2019 One of the primary objectives of the ASEAN Economic Community (AEC), established in 2015, was to boost skilled labor mobility within the region. This insightful book takes stock of the existing trends and patterns of skilled labor migration in the ASEAN. It endeavors to identify the likely winners and losers from the free movement of natural persons within the region through counterfactual policy simulations. Finally, it discusses existing issues and obstacles through case studies, as well as other sectoral examples.

Recovery of Gray Wolves in the Great Lakes Region of the United States Adrian P. Wydeven, Timothy R. van Deelen, Edward Heske, 2009-02-27 In this book, we document and evaluate the recovery of gray wolves (*Canis lupus*) in the Great Lakes region of the United States. The Great Lakes region is unique in that it was the only portion of the lower 48 states where wolves were never completely extirpated. This region also contains the area where many of the first modern concepts of wolf conservation and research were developed. Early proponents of wolf conservation such as Aldo Leopold, Sigurd Olson, and Durward Allen lived and worked in the region. The longest ongoing research on wolf-prey relations (see Vucetich and Peterson, Chap. 3) and the first use of radio telemetry for studying wolves (see Mech, Chap. 2) occurred in the Great Lakes region. The Great Lakes region is the first place in the United States where “Endangered” wolf populations recovered. All three states (Minnesota, Wisconsin, and Michigan) developed ecologically and socially sound wolf conservation plans, and the federal government delisted the population of wolves in these states from the United States list of endangered and threatened species on March 12, 2007 (see Refsnider, Chap. 21). Wolf management reverted to the individual states at that time. Although this delisting has since been challenged, we believe that biological recovery of wolves has occurred and anticipate the delisting will be restored. This will be the first case of wolf conservation reverting from the federal government to the state conservation agencies in the United States.

China's Grain for Green Program Claudio O. Delang, Zhen Yuan, 2016-08-23 This book provides a comprehensive review of Grain for Green, China's nationwide program which pays farmers to revert sloping or marginal farm land to trees or grass. The program aims to improve the ecological conditions of much of China, and the socioeconomic circumstances of hundreds of millions of people. GfG is the largest reforestation, ecological restoration, and rural development initiative in history, combining the biggest investment, the greatest involvement, and the broadest degree of public participation ever. The book is organized in three sections. Part One reviews the history of land management in China from 1949 to 1998, exploring the

conditions that led to the introduction of GfG, and comparing it to other reforestation programs. Part Two offers an overview of GfG, describing the timeline of the program, compensation paid to farmers, the rules concerning land and plant selection, the extent to which these rules were followed, the attitudes of farmers towards the program, and the way in which the program is organized and implemented by various state actors. Part Three discusses the impact of the GfG, from both ecological and socio-economic standpoints, looking at the economic benefits that result from participating in the GfG, the impact of the GfG across local economies, the redistribution of the labor force and the sustainability of the program, in particular the question of what will happen to the converted land when payments to farmers end.

Internet and Smartphone Use-Related Addiction Health Problems Olatz Lopez-Fernandez, 2021-08-31 This Special Issue presents some of the main emerging research on technological topics of health and education approaches to Internet use-related problems, before and during the beginning of coronavirus disease 2019 (COVID-19). The objective is to provide an overview to facilitate a comprehensive and practical approach to these new trends to promote research, interventions, education, and prevention. It contains 40 papers, four reviews and thirty-five empirical papers and an editorial introducing everything in a rapid review format. Overall, the empirical ones are of a relational type, associating specific behavioral addictive problems with individual factors, and a few with contextual factors, generally in adult populations. Many have adapted scales to measure these problems, and a few cover experiments and mixed methods studies. The reviews tend to be about the concepts and measures of these problems, intervention options, and prevention. In summary, it seems that these are a global culture trend impacting health and educational domains. Internet use-related addiction problems have emerged in almost all societies, and strategies to cope with them are under development to offer solutions to these contemporary challenges, especially during the pandemic situation that has highlighted the global health problems that we have, and how to holistically tackle them.
