Space Shuttle Missions Summary (NASA/TM-2011-216142) Robert D. Legler,Floyd V. Bennett,2011-09-01 Full color publication. This document has been produced and updated over a 21-year period. It is intended to be a handy reference document, basically one page per flight, and care has been exercised to make it as error-free as possible. This document is basically as flown data and has been compiled from many sources including flight logs, flight rules, flight anomaly logs, mod flight descent summary, post flight analysis of mps propellants, FDRD, FRD, SODB, and the MER shuttle flight data and inflight anomaly list. Orbit distance traveled is taken from the PAO mission statistics.

Arctic Human Development Report Joan Nymand Larsen,Gail Fondahl,2015-02-18 The goals of the second volume of the AHDR - Arctic Human Development Report: Regional Processes and Global Linkages - are to provide an update to the first AHDR (2004) in terms of an assessment of the state of Arctic human development; to highlight the major trends and changes unfolding related to the various issues and thematic areas of human development in the Arctic over the past decade; and, based on this assessment, to identify policy relevant conclusions and key gaps in knowledge, new and emerging Arctic success stories. The production of AHDR-II on the tenth anniversary of the first AHDR makes it possible to move beyond the baseline assessment to make valuable comparisons and contrasts across a decade of persistent and rapid change in the North. It addresses critical issues and emerging challenges in Arctic living conditions, quality of life in the North, global change impacts and adaptation, and Indigenous livelihoods. The assessment contributes to our understanding of the interplay and consequences of physical and social change processes affecting Arctic residents' quality of life, at both the regional and global scales. It shows that the Arctic is not a homogenous region. Impacts of globalization and environmental change differ within and between regions, between Indigenous and non-Indigenous northerners, between genders and along other axes.

Crying Out for Change Deepa Narayan-Parker,2000 A multi-country research initiative to understand poverty from the eyes of the poor, the Voices of the Poor project was undertaken to inform the World Bank's activities and the upcoming World Development Report 2000/01. The research findings are being published in three books: Can Anyone Hear Us? gathers the voices of over 40,000 poor women and men in 50 countries from the World Bank's participatory poverty assessments (Deepa

Narayan, Raj Patel, Kai Schafft, Anne Rademacher, and Sarah Koch-Schulte, authors). *Crying Out for Change* pulls together new field work conducted in 1999 in 23 countries (Deepa Narayan, Robert Chambers, Meera Shah, and Patti Petesch, authors). *From Many Lands* offers regional patterns and country case-studies (Deepa Narayan and Patti Petesch, editors). *Voices of the Poor* marks the first time such an exercise has been undertaken in so many developing countries and transition economies around the world. It provides a unique and detailed picture of the life of the poor and explains the constraints poor people face to escape from poverty in a way that more traditional survey techniques do not capture well. Each of the three volumes demonstrates the importance of voice and power in poor people's definition of poverty. *Voices of the Poor* concludes that we need to expand our conventional views of poverty which focus on income expenditure, education, and health to include measures of voice and empowerment.

The Open Work Umberto Eco, 1989 This book is significant for its concept of openness--the artist's decision to leave arrangements of some constituents of a work to the public or to chance--and for its anticipation of two themes of literary theory: the element of multiplicity and plurality in art, and the insistence on literary response as an interaction between reader and text.

The Rise of China and India in Africa Fantu Cheru, Cyril Obi, 2010-03-11 In recent years, China and India have become the most important economic partners of Africa and their footprints are growing by leaps and bounds, transforming Africa's international relations in a dramatic way. Although the overall impact of China and India's engagement in Africa has been positive in the short-term, partly as a result of higher returns from commodity exports fuelled by excessive demands from both countries, little research exists on the actual impact of China and India's growing involvement on Africa's economic transformation. This book examines in detail the opportunities and challenges posed by the increasing presence of China and India in Africa, and proposes critical interventions that African governments must undertake in order to negotiate with China and India from a stronger and more informed platform.

The Anthropology of Experience Victor Witter Turner, Edward M. Bruner, 1986 Fourteen authors, including many of the best-known scholars in the field, explore how people actually experience their culture and how those experiences are expressed in forms as varied as narrative, literary work, theater, carnival, ritual, reminiscence, and life review. Their studies will be of special interest for anyone working in anthropological theory, symbolic anthropology, and contemporary social and cultural anthropology, and useful as well for other social scientists, folklorists, literary theorists, and philosophers.

Invention of Hysteria Georges Didi-Huberman, 2004-09-17 The first English-language publication of a classic French book on the relationship between the development of photography and of the medical category of hysteria. In this classic of French cultural studies, Georges Didi-Huberman traces the intimate and reciprocal relationship between the disciplines of psychiatry and photography in the late nineteenth century. Focusing on the immense photographic output of the Salpêtrière hospital,

the notorious Parisian asylum for insane and incurable women, Didi-Huberman shows the crucial role played by photography in the invention of the category of hysteria. Under the direction of the medical teacher and clinician Jean-Martin Charcot, the inmates of Salpêtrière identified as hysterics were methodically photographed, providing skeptical colleagues with visual proof of hysteria's specific form. These images, many of which appear in this book, provided the materials for the multivolume album *Iconographie photographique de la Salpêtrière*. As Didi-Huberman shows, these photographs were far from simply objective documentation. The subjects were required to portray their hysterical type—they performed their own hysteria. Bribed by the special status they enjoyed in the purgatory of experimentation and threatened with transfer back to the inferno of the incurables, the women patiently posed for the photographs and submitted to presentations of hysterical attacks before the crowds that gathered for Charcot's Tuesday Lectures. Charcot did not stop at voyeuristic observation. Through techniques such as hypnosis, electroshock therapy, and genital manipulation, he instigated the hysterical symptoms in his patients, eventually giving rise to hatred and resistance on their part. Didi-Huberman follows this path from complicity to antipathy in one of Charcot's favorite cases, that of Augustine, whose image crops up again and again in the *Iconographie*. Augustine's virtuosic performance of hysteria ultimately became one of self-sacrifice, seen in pictures of ecstasy, crucifixion, and silent cries.

Ethnicity, Identity and Public Policy David Bromell, 2008 Should government adopt multiculturalism as public policy? What is the role of the state in managing diversity? Are all cultures of equal value? And is ethnicity the difference that most matters? In *Ethnicity, Identity and Public Policy*, David Bromell evaluates theory developed in other national contexts against challenges for public policy arising from ethno-cultural diversity in New Zealand. He concludes that this is a time to refine - and complicate - our thinking, and that the task of developing normative theory in relation to diversity and public life is still a work in progress. In Bromell's view, New Zealand should endorse neither multiculturalism nor biculturalism as official public policy. Instead, he advocates safeguarding individual rights, which all share equally, and a restrained role for the state in 'managing' diversity. He argues that reducing inequalities ought to be a higher priority than recognising identities. Overall, Bromell urges the cultivation of citizen participation in deliberative democracy and seeks to inform and stimulate debate about big ideas and difficult questions for public policy. This is a challenge for hearts as well as minds.

Echoes of Empire Kalypso Nicolaidis, Berny Sebe, Gabrielle Maas, 2014-12-23 How does our colonial past echo through today's global politics? How have former empire-builders sought vindication or atonement, and formerly colonized states reversal or retribution? This groundbreaking book presents a panoramic view of attitudes to empires past and present, seen not only through the hard politics of international power structures but also through the nuances of memory, historiography

and national and minority cultural identities. Bringing together leading historians, political scientists and international relations scholars from across the globe, *Echoes of Empire* emphasizes Europe's colonial legacy whilst also highlighting the importance of non-European power centres- Ottoman, Russian, Chinese, Japanese- in shaping world politics, then and now. *Echoes of Empire* bridges the divide between disciplines to trace the global routes travelled by objects, ideas and people and forms a radically different notion of the term 'empire' itself. This will be an essential companion to courses on international relations and imperial history as well as a fascinating read for anyone interested in Western hegemony, North-South relations, global power shifts and the *longue duree*.

Sustainable Surfing Gregory Borne, Jess Ponting, 2017-03-16 Whilst being an ambiguous and contested concept, sustainability has become one of the twenty-first century's most pervasive ideas, as humanity's increasing impact on the environment, as well as increasing social and economic inequalities, have local and global consequences. Surfing is a globally recognised cultural phenomenon whose unique connection with nature and rapid expansion into a multibillion pound industry offers exciting synergies for exploring various dimensions of sustainability. This book is the first to bring together the world's foremost experts on the themes of sustainability and surfing. Drawing upon cutting edge theory and research, this book offers multidisciplinary perspectives and methodological approaches on the social, environmental and economic components of sustainable surfing. Contributions provide unique discussions that bridge the gap between theory and practice, exploring topics such as sustainable surf tourism, surf-econometrics, surf activism, surfing governance, the surfing industry, and technological advancements. Each chapter produces in-depth insights to provide foundational insights of the relationship between sustainability and surfing. This book will appeal to multiple audiences in different disciplines and sectors. Practitioners will benefit from the insights presented in this volume, while both undergraduate and postgraduate students will find this volume an invaluable companion, including those working in geography, environmental studies, sport sciences, and leisure and tourism studies.

[The Cambridge History of Medicine](#) Roy Porter, 2006-06-05 Against the backdrop of unprecedented concern for the future of health care, 'The Cambridge History of Medicine' surveys the rise of medicine in the West from classical times to the present. Covering both the social and scientific history of medicine, this volume traces the chronology of key developments and events.

One Hundred Years of Chemical Warfare: Research, Deployment, Consequences Bretislav Friedrich,Dieter Hoffmann,Jürgen Renn,Florian Schmaltz,Martin Wolf,2017-11-26 This book is open access under a CC BY-NC 2.5 license. On April 22, 1915, the German military released 150 tons of chlorine gas at Ypres, Belgium. Carried by a long-awaited wind, the chlorine cloud passed within a few minutes through the British and French trenches, leaving behind at least 1,000 dead and 4,000 injured. This chemical attack, which amounted to the first use of a weapon of mass destruction, marks a turning point in world history. The preparation as well as the execution of the gas attack was orchestrated by Fritz Haber, the director of the Kaiser Wilhelm Institute for Physical Chemistry and Electrochemistry in Berlin-Dahlem. During World War I, Haber transformed his research institute into a center for the development of chemical weapons (and of the means of protection against them). Bretislav Friedrich and Martin Wolf (Fritz Haber Institute of the Max Planck Society, the successor institution of Haber's institute) together with Dieter Hoffmann, Jürgen Renn, and Florian Schmaltz (Max Planck Institute for the History of Science) organized an international symposium to commemorate the centenary of the infamous chemical attack. The symposium examined crucial facets of chemical warfare from the first research on and deployment of chemical weapons in WWI to the development and use of chemical warfare during the century hence. The focus was on scientific, ethical, legal, and political issues of chemical weapons research and deployment — including the issue of dual use — as well as the ongoing effort to control the possession of chemical weapons and to ultimately achieve their elimination. The volume consists of papers presented at the symposium and supplemented by additional articles that together cover key aspects of chemical warfare from 22 April 1915 until the summer of 2015.

Made to Break Giles Slade,2009-06-30 Made to Break is a history of twentieth-century technology as seen through the prism of obsolescence. Giles Slade explains how disposability was a necessary condition for America's rejection of tradition and our acceptance of change and impermanence. This book gives us a detailed and harrowing picture of how, by choosing to support ever-shorter product lives, we may well be shortening the future of our way of life as well.

The New Financial Order Robert J. Shiller,2009-02-09 In his best-selling Irrational Exuberance, Robert Shiller cautioned that society's obsession with the stock market was fueling the volatility that has since made a roller coaster of the financial system. Less noted was Shiller's admonition that our infatuation with the stock market distracts us from more durable economic prospects. These lie in the hidden potential of real assets, such as income from our livelihoods and homes. But these "ordinary riches," so fundamental to our well-being, are increasingly exposed to the pervasive risks of a rapidly changing global economy. This compelling and important new book presents a fresh vision for hedging risk and securing our economic future. Shiller describes six fundamental ideas for using modern information technology and advanced financial theory to temper basic risks that have been ignored by risk management institutions--risks to the value of our jobs and our

homes, to the vitality of our communities, and to the very stability of national economies. Informed by a comprehensive risk information database, this new financial order would include global markets for trading risks and exploiting myriad new financial opportunities, from inequality insurance to intergenerational social security. Just as developments in insuring risks to life, health, and catastrophe have given us a quality of life unimaginable a century ago, so Shiller's plan for securing crucial assets promises to substantially enrich our condition. Once again providing an enormous service, Shiller gives us a powerful means to convert our ordinary riches into a level of economic security, equity, and growth never before seen. And once again, what Robert Shiller says should be read and heeded by anyone with a stake in the economy.
