Pearce. *She of the Sea* is a lyrical exploration of the call of the sea and the depth of our connection to it, rooted in the author's personal experience living on the coast of the Celtic Sea, in Ireland. This book spans from coastal plants to the colour blue, pebbles to prayer, via shapeshifting and suicidal ideation, erosion and immersion, cold water swimming and water birth, seaweed and cyanotypes, from Japanese freedivers and Celtic sea goddesses, selkies to surfing, and mermaids to Mary. *She of the Sea* is a strange and wonderful deep dive into the inner sea and the Feminine, exploring where the real and the magical, the salty and the sacred meet, within and without, and what implications this has for us as both individuals...and a species in these tumultuous times. Dreamlike, meditative, poetic, *She of the Sea* is a love song. To the ocean. To becoming. To magic. To freedom. With contributions from thirty sea-loving artists, musicians, cold water swimmers, mothers, environmental educators, witches, mermaids, priestesses and writers from around the world, who share their love for the stretch of sea they call home, from the Irish Sea to the Caribbean, via the Mediterranean and the North Sea, the Pacific and the Atlantic.

British Museum Expedition to Middle Egypt, 1929-1931 Guy Brunton, 1948

Weapons of Mass Instruction John Taylor Gatto, 2010-04-01 The transformation of schooling from a twelve-year jail sentence to freedom to learn. John Taylor Gatto's *Weapons of Mass Instruction* , now available in paperback, focuses on

mechanisms of traditional education which cripple imagination, discourage critical thinking, and create a false view of learning as a byproduct of rote-memorization drills. Gatto's earlier book, *Dumbing Us Down*, introduced the now-famous expression of the title into the common vernacular. *Weapons of Mass Instruction* adds another chilling metaphor to the brief against conventional schooling. Gatto demonstrates that the harm school inflicts is rational and deliberate. The real function of pedagogy, he argues, is to render the common population manageable. To that end, young people must be conditioned to rely upon experts, to remain divided from natural alliances and to accept disconnections from their own lived experiences. They must at all costs be discouraged from developing self-reliance and independence. Escaping this trap requires a strategy Gatto calls open source learning which imposes no artificial divisions between learning and life. Through this alternative approach our children can avoid being indoctrinated-only then can they achieve self-knowledge, good judgment, and courage.

Theories and Practices of Development Katie Willis, 2005 Throughout the twentieth century, governments sought to achieve 'development' not only in their own countries, but also in other regions of the world; particularly in Africa, Asia, Latin America and the Caribbean. This focus on 'development' as a goal has continued into the twenty-first century, for example through the United Nations Millennium Development Targets. While development is often viewed as something very positive, it is also very important to consider the possible detrimental effects it may have on the natural environment, different social groups and on the cohesion and stability of societies. In this important book, Katie Willis investigates and places in a historical context, the development theories behind contemporary debates such as globalization and transnationalism. The main definitions of 'development' and 'development theory' are outlined with a description and explanation of how approaches have changed over time. The differing explanations of inequalities in development, both spatially and socially, and the reasoning behind different development policies are also considered. By drawing on pre-twentieth century European development theories and examining current policies in Europe and the USA, the book not only stresses commonalities in

development theorizing over time and space, but also the importance of context in theory construction. This topical book provides an ideal introduction to development theories for students in geography, development studies, area studies, anthropology and sociology. It contains student-friendly features, including boxed case studies with examples, definitions, summary sections, suggestions for further reading, discussion questions and website information.

The Grace Year Kim Liggett, 2020-02-06 'An incredibly important and empowering read' Natasha Ngan, author of *Girls of Paper and Fire* A New York Times bestselling dark speculative feminist thriller, perfect for fans of *The Power* and *The Handmaid's Tale*. _____ THE RESISTANCE STARTS HERE. No one speaks of the grace year. It's forbidden. We're told we have the power to lure grown men from their beds, make boys lose their minds, and drive the wives mad with jealousy. That's why we're banished for our sixteenth year, to release our magic into the wild before we're allowed to return to civilisation. But I don't feel powerful. I don't feel magical. Tierney James lives in an isolated village where girls are banished at sixteen to the northern forest to brave the wilderness - and each other - for a year. They must rid themselves of their dangerous magic before returning purified and ready to marry - if they're lucky. It is forbidden to speak of the grace year, but even so every girl knows that the coming year will change them - if they survive it... A critically acclaimed page-turning feminist dystopia about a young woman trapped in an oppressive society, fighting to take control of her own life.

Conditional Cash Transfers Ariel Fiszbein, Norbert R. Schady, 2009-02-09 Conditional Cash Transfer (CCT) programs aim to reduce poverty by making welfare programs conditional upon the receivers' actions. That is, the government only transfers the money to persons who meet certain criteria. These criteria may include enrolling children into public schools, getting regular check-ups at the doctor's office, receiving vaccinations, or the like. They have been hailed as a way of reducing inequality and helping households break out of a vicious cycle whereby poverty is transmitted from one generation to

another. Do these and other claims make sense? Are they supported by the available empirical evidence? This volume seeks to answer these and other related questions. Specifically, it lays out a conceptual framework for thinking about the economic rationale for CCTs; it reviews the very rich evidence that has accumulated on CCTs; it discusses how the conceptual framework and the evidence on impacts should inform the design of CCT programs in practice; and it discusses how CCTs fit in the context of broader social policies. The authors show that there is considerable evidence that CCTs have improved the lives of poor people and argue that conditional cash transfers have been an effective way of redistributing income to the poor. They also recognize that even the best-designed and managed CCT cannot fulfill all of the needs of a comprehensive social protection system. They therefore need to be complemented with other interventions, such as workfare or employment programs, and social pensions.

This report synthesizes the global evidence on the role of the arts in improving health and well-being, with a specific focus on the WHO European Region. Results from over 3000 studies identified a major role for the arts in the prevention of ill health, promotion of health, and management and treatment of illness across the lifespan. The reviewed evidence included study designs such as uncontrolled pilot studies, case studies, small-scale cross-sectional surveys, nationally representative longitudinal cohort studies, community-wide ethnographies and randomized controlled trials from diverse disciplines. The beneficial impact of the arts could be furthered through acknowledging and acting on the growing evidence base; promoting arts engagement at the individual, local and national levels; and supporting cross-sectoral collaboration.
