Handbook of Life Course Health Development Neal Halfon, Christopher B. Forrest, Richard M. Lerner, Elaine M. Faustman, 2017-11-20 This book is open access under a CC BY 4.0 license. This handbook synthesizes and analyzes the growing knowledge base on life course health development (LCHD) from the prenatal period through emerging adulthood, with implications for clinical practice and public health. It presents LCHD as an innovative field with a sound theoretical framework for understanding wellness and disease from a lifespan perspective, replacing previous medical, biopsychosocial, and early genomic models of health. Interdisciplinary chapters discuss major health concerns (diabetes, obesity), important less-studied conditions (hearing, kidney health), and large-scale issues (nutrition, adversity) from a lifespan viewpoint. In addition, chapters address methodological approaches and challenges by analyzing existing measures, studies, and surveys. The book concludes with the editors' research agenda that proposes priorities for future LCHD research and its application to health care practice and health policy. Topics featured in the Handbook include: The prenatal period and its effect on child obesity and metabolic outcomes. Pregnancy complications and their effect on women's cardiovascular health. A multi-level approach for obesity prevention in children. Application of the LCHD framework to autism spectrum disorder. Socioeconomic disadvantage and its influence on health development across the lifespan. The importance of nutrition to optimal health development across the lifespan. The Handbook of Life Course Health Development is a must-have resource for researchers, clinicians/professionals, and graduate students in developmental psychology/science; maternal and child health; social work; health economics; educational policy and politics; and medical law as well as many interrelated subdisciplines in psychology, medicine, public health, mental health, education, social welfare, economics, sociology, and law.

Afrobeat! Sola Olorunyomi,2013-04-03 IN AFROBEAT! A POPULAR ARTIST, a counter-hegemonic activist of the hardest grain, meets his most cerebral, disquisitional interpreter. – ODIA OFEIMUN, Leading African poet and former President, Association of Nigerian Authors. This is not just another addition to a growing Fela scholarship but a fascinating and frequently insightful study. It is both a celebration of Fela's uncommon virtuosity and an exploration of his mystique. – NIYI OSUNDARE, Poet and Professor of English, University of New Orleans. A Major contribution to Fela scholarship in particular, and African popular culture studies in general; it explores Afrobeat as musical practice and cultural politics. – TEJUMOLA OLANIYAN, Associate Professor of English, University of Virginia. An original effort. Like Fela's life, this account of it is not only a wild ride but a magical African musical mystery tour. – DAVID COPLAN, Professor of Social Anthropology University of Witwatersrand, South Africa.

Liberia's Civil War Adekeye Adebajo,2002 This text aims to unravel the tangled web of the conflict by addressing questions including: why did Nigeria intervene in Liberia and remain committed throughout the seven-year civil war?; and to what extent was ECOMOG's intervention shaped by Nigeria's hegemonic aspirations.

Well-Being Daniel Kahneman,Edward Diener,Norbert Schwarz,1999-07-08 The nature of well-being is one of the most enduring and elusive subjects of human inquiry. Well-Being draws upon the latest scientific research to transform our understanding of this ancient question. With contributions from leading authorities in psychology, social psychology, and neuroscience, this volume presents the definitive account of current scientific efforts to understand human pleasure and pain, contentment and despair. The distinguished contributors to this volume combine a rigorous analysis of human sensations, emotions, and moods with a broad assessment of the many factors, from heredity to nationality, that bear on our well-being. Using the tools of experimental science, the contributors confront the puzzles of human likes and dislikes. Why do we grow accustomed and desensitized to changes in our lives, both good and bad? Does our happiness reflect the circumstances of our lives or is it determined by our temperament and personality? Why do humans acquire tastes for sensations that are initially painful or unpleasant? By examining the roots of our everyday likes and dislikes, the book also sheds light on some of the more extreme examples of attraction and aversion, such as addiction and depression. Among its wide ranging inquiries, Well-Being examines systematic differences in moods and behaviors between genders, explaining

why women suffer higher rates of depression and anxiety than men, but are also more inclined to express positive emotions. The book also makes international comparisons, finding that some countries' populations report higher levels of happiness than others. The contributors deploy an array of methods, from the surveys and questionnaires of social science to psychological and physiological experiments, to develop a comprehensive new approach to the study of well-being. They show how the sensory pleasures of the body can tell us something about the higher pleasures of the mind and even how the effectiveness of our immune system can depend upon the health of our social relationships.

Researching Lived Experience Max van Manen, 2016-06-16 Bestselling author Max van Manen's *Researching Lived Experience*, Second Edition, introduces a human science approach to research methodology in education and related fields. It shows readers how to orient oneself to human experience in education and how to construct a textual question which evokes a fundamental sense of wonder, and it provides a broad and systematic set of approaches for gaining experiential material which forms the basis for textual reflections. The second edition of this classic work has never before been released outside Canada.

Qualitative Research & Evaluation Methods Michael Quinn Patton, 2014-10-29 Drawing on more than 40 years of experience conducting applied social science research and program evaluation, author Michael Quinn Patton has crafted the most comprehensive and systematic book on qualitative research and evaluation methods, inquiry frameworks, and analysis options available today. Now offering more balance between applied research and evaluation, this Fourth Edition illuminates all aspects of qualitative inquiry through new examples, stories, and cartoons; more than a hundred new summarizing and synthesizing exhibits; and a wide range of new highlight sections/sidebars that elaborate on important and emergent issues. For the first time, full case studies are included to illustrate extended research and evaluation examples. In addition, each chapter features an extended rumination, written in a voice and style more emphatic and engaging than traditional textbook style, about a core issue of persistent debate and controversy.

Theories of Political Protest and Social Movements Karl-Dieter Opp, 2009-04-08 Political protest and social movements are ubiquitous phenomena. This book focuses on the current theoretical approaches that aim at explaining them: the theory of collective action, the resource mobilization perspective, political opportunity structure theory, the identity approach, the framing perspective, and the dynamics of contention approach. The book has three objectives: (1) Many basic concepts like political opportunities or identity are not clearly defined. It is further often a matter of interpretation what

factors are supposed to affect which phenomena. The first aim is therefore to provide a detailed introduction to and a clear restatement of the theories. Only then is it possible to assess and improve them. (2) For each theory the major strengths and weaknesses are discussed, and various modifications and extensions are suggested. (3) Building on these analyses, it is shown how the theories can be integrated into a single theoretical paradigm: the structural-cognitive model.
