The Rise of Digital Repression Steven Feldstein, 2021 A Carnegie Endowment for International Peace Book -- dust jacket.

Policing the New World Disorder Robert B. Oakley, Michael J. Dziedzic, Eliot M. Goldberg, 1998 In the post-Cold War era anarchic conditions within sovereign states have repeatedly posed serious and intractable challenges to the international order. Nations have been called upon to conduct peace operations in response to dysfunctional or disintegrating states (such as Somalia, Haiti, and the former Yugoslavia). Among the more vigorous therapies for this kind of disorder is revitalizing

local public security institutions --the police, judiciary, and penal system. This volume presents insights into the process of restoring public security gleaned from a wide range of practitioners and academic specialists.

The Psychology of Peace Promotion Mary Gloria C. Njoku,Leonard A. Jason,R. Burke Johnson,2019-07-04 This volume *Psychology of Peace Promotion* builds on previous volumes of peace psychology, extending its contributions by drawing from peace research and practices from five continents – Africa, Asia, Europe, North America and South America. The book discusses emerging disciplinary and inter-disciplinary theories and actions. Each chapter begins with a theoretical framework for understanding peace, followed by a critical review of peace promotion in a specific setting, and concludes with an illustration of psychological principles or theories in either a narrative format or an empirical investigation. This volume develops, as well as guides, its readers on the epistemology of promoting and sustaining peace in varied settings around the world. This book presents relevant, cutting-edge peace promotion strategies to anyone interested in promoting peace more effectively, including peace practitioners, scholars, teachers, and researchers, as well as the general reader. It presents a number of innovative approaches, illustrating their applications to specific social problems, settings and populations. In addition, this volume has much in store for both academic and practice-based scientists in the field of peace psychology, mental health professionals, administrators, educators, and graduate students from various disciplines. The goal is the promotion and sustenance of peace, using theoretically sound, yet innovative and creative approaches. As expressed by the United Nations Secretary, “peace does not occur by happenstance.” Promoting and sustaining peace requires reflective, thoughtful, and targeted efforts. This book inspires its readers to develop a better understanding of peace and the means of promoting peace in a sustainable way.

Western Grassfields (Cameroun Republic) E. M. Chilver,Phyllis Mary Kaberry,1974

End of an Era Carl Minzner,2018 China's reform era is ending. Core factors that characterized it-political stability, ideological openness, and rapid economic growth-are unraveling. Since the 1990s, Beijing's leaders have firmly rejected any fundamental reform of their authoritarian one-party political system, and on the surface, their efforts have been a success. But as Carl Minzner shows, a closer look at China's reform era reveals a different truth. Over the past three decades, a frozen political system has fueled both the rise of entrenched interests within the Communist Party itself, and the systematic underdevelopment of institutions of governance among state and society at large. Economic cleavages have widened. Social unrest has worsened. Ideological polarization has deepened. Now, to address these looming problems, China's leaders are progressively cannibalizing institutional norms and practices that have formed the bedrock of the regime's stability in the reform era. *End of an Era* explains how China arrived at this dangerous turning point, and outlines the potential outcomes that could result.

Non-international Armed Conflict in the Twenty-first Century Kenneth Watkin, Andrew J. Norris, 2012 Examines the legal issues surrounding non-international armed conflict (NIAC) in the modern era.

Heroism and the Changing Character of War S. Scheipers, 2014-04-01 Post-heroism is often perceived as one of the main aspects of change in the character of war, a phenomenon prevalent in western societies. According to this view, demographic and cultural changes in the west have severely decreased the tolerance for casualties in war. This edited volume provides a critical examination of this idea.

Designing Sustainable Energy for All Carlo Vezzoli, Fabrizio Ceschin, Lilac Osanjo, Mugendi K. M'Rithaa, Richie Moalosi, Venny Nakazibwe, Jan Carel Diehl, 2018-05-17 This open access book addresses the issue of diffusing sustainable energy access in low- and middle-income contexts. Access to energy is one of the greatest challenges for many people living in low- income and developing contexts, as around 1.4 billion people lack access to electricity. Distributed Renewable Energy systems (DRE) are considered a promising approach to address this challenge and provide energy access to all. However, even if promising, the implementation of DRE systems is not always straightforward. The book analyses, discusses and classifies the promising Sustainable Product-Service System (S.PSS) business models to deliver Distributed Renewable Energy systems in an effective, efficient and sustainable way. Its message is supported with cases studies and examples, discussing the economic, environmental and socioethical benefits as well as its limitations and barriers to its implementation. An innovative design approach is proposed and a set of design tools are supplied, enabling readers to create and develop Sustainable Product-Service System (S.PSS) solutions to deliver Distributed Renewable Energy systems. Practical applications of the book's design approach and tools by companies and practitioners are discussed and the book will be of interest to readers in design, industry, governmental institutions, NGOs as well as researchers.

Rethinking Counterinsurgency John Mackinlay, Alison Al-Baddawy, 2008 In contrast, the modern jihadist insurgency is characterized by its complex and global nature. Unlike past insurgent forms that aspired to shape national politics, the jihadist movement espouses larger thematic goals, like overthrowing the global order. The modern jihadist insurgency is also more global in terms of its popular support and operational territory. It makes far better use of communications technology and propaganda to reach the minds and hearts of global audiences. The contemporary international security environment has therefore become a frustrating place for Western powers. Despite great technological and military advances, British and U.S. counterinsurgency (COIN) operations have been slow to respond and adapt to the rise of the global jihadist insurgency. Operational failures in Iraq and Afghanistan have highlighted the need for the West to rethink and retool its current COIN strategy.

Private Sector, Public Wars James Jay Carafano,2008

Religion in Today's World Melissa M. Wilcox,2013-12-19 Religion is a major force in contemporary society. It is also one of the least understood social and political influences on individuals and communities. In this innovative collection of original essays and classic readings, experts explore the significance of contemporary religiosity: as a source of meaning and motivation, how it unites and divides us, and how it is used politically and culturally. Readers will be introduced to the broad debates in ways that will equip them to analyze, discuss, and make their own judgments about religion and society. This book should be read by anyone interested in understanding religion as a central source of meaning and politics, and is ideally suited for undergraduate teaching on religion and social issues and from a global perspective.

Historical Dictionary of Nepal Nanda R. Shrestha,2017-02-10 Nepal is a living example of contrasts and contradictions.It is a country that was born in medieval times, grew up in the 16th century, and now finds itself engulfed in the high-tech gadgets and material marvels of the 21st century. Nepal has its share of problem which include inadequate economic development and social infrastructure, poverty and corruption, plus worsening pollution, but now it finally has relative peace and quiet after a hasty Maoist uprising. Indeed, it has passed through several democratic elections, and finally seems to be getting on the right track. This second edition of Historical Dictionary of Nepal contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 700 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent resource for students, researchers, and anyone wanting to know more about Nepal.

Research in the Archival Multiverse Anne J. Gilliland,Sue McKemmish,Andrew J. Lau,2017 Within the past 15 years, the field of archival studies around the world has experienced unprecedented growth and archival studies graduate education programs today have among the highest enrollments in any information field. During the same period, there has also been unparalleled expansion and innovation in the diversity of methods and theories being applied in archival scholarship. Global in scope, *Research in the Archival Multiverse* compiles critical and reflective essays across a wide range of emerging research areas and interests in archival studies with the aim of providing current and future archival academics with a text addressing possible methods and theoretical frameworks that have been and might be used in archival scholarship. More than a collation of research methods for handy reference, this volume advocates for reflexive research practice as a means by which to lay bare the fuzziness and messiness of research. Whereas research in the form of published research papers and juried conference presentations provide a view of the study framed in terms of research questions and findings, reflexive research practice reveals the context of the study and chains of situations, choices, and decisions that

influence the trajectories of the studies themselves. Such elucidations from the position of the researcher are instructive for others, who may be inspired to apply or adapt the method for their own research. *** This book is a landmark publication on research in archival science, tracing the development of ideas in the discipline in part one, then exploring possibilities and pathways in the following chapters. It is essential reading on the evolution and progression of the discipline, particularly for every Masters and PhD student in archival science, whether looking for a deeper understanding of archival theory or inspiration on research design and process. It will be invaluable to all archival educators, but particularly to supervisors of research students. --Karen Anderson, *Archives and Manuscripts*, 2017 *** The compilation reflects an array of directions in which research in the broadly defined area of archives is heading. While an ambitious collection, it in no way limits our understanding of the multiverse; in fact, quite the opposite, it hints at the notion that the multiverse may be limitless. -- *Library and Information Science Research* 39 (2017) 159 (Series: Social Informatics) [Subject: Research Studies, Digital Studies, Archival Science, History]

Habiba Razinat T. Mohammed, 2023-05-15 Saleh's love and respect for his mother, Hamsatu, is not only detrimental to his own life but also injurious to his family life. Hamsatu makes all the decisions in his life. She becomes despotic and decides who her son, Saleh, should marry, and the type of children his wife should bear. Habiba is just thirteen when her grandmother, Hamsatu brings in a suitor, Zubairu, a contemporary of her late husband. Although Saleh wishes to send all his children to school, a rainstorm renders him hopeless as his mother takes ill and eventually dies. Following his mother's death, Saleh's bankruptcy compels him to take a loan from the elderly Zubairu and his failure to repay the loan compels him to hand over his daughter, Habiba, in marriage to Zubairu. Consequently, Habiba is helpless and soon discovers that she must pay not just for her father's wrongs but must also shoulder the responsibility of his abandoned wife and children by remaining married to Zubairu who is willing to assist them as long as she plays his game. Habiba desires to punish both her father and Zubairu for ruining her dreams. What will she have to do to get at them?

Media Archaeology Erkki Huhtamo, Jussi Parikka, 2011-06-12 "Huhtamo and Parikka, from the first and second generations of media archaeology, have brought together the best writings from almost all of the best authors in the field. Whether we speak of cultural materialism, media art history, new historicism or software studies, the essays compiled here provide not only an anthology of innovative historical case studies, but also a methodology for the future of media studies as material and historical analysis. Media Archaeology is destined to be a key handbook for a new generation of media scholars." —Sean Cubitt, author of *The Cinema Effect* Taken together, this excellent collection of essays by a wide range of scholars and practitioners demonstrates how the emerging field of media archaeology not only excavates the ways in which newer media work to remediate earlier forms and practices but also sketches out how older media help to premeditate new ones. —Richard Grusin, author of *Premediation: Affect and Mediality after 9/11* "In Media Archaeology, a constellation of

interdisciplinary writers explore society's relationship with the technological imaginary through history, with fascinating essays on influencing machines, Freud as media theorist, interactive games from the 19th century to the present day, just to name a few. As an artist, my mind is set on fire by discussions of the marvelous inventions that never made it to the mainstream, such as optophonic poetry, Christopher Strachey's 1952 'Love letter generator' for the Manchester Mark II computer, and the 'Baby talkie.'" —Zoe Beloff, artist and editor of The Coney Island Amateur Psychoanalytic Society and Its Circle A long-awaited synthesis addressing media archaeology in all of its epistemological complexity. With wide-ranging intellectual breath and creative insight, Huhtamo and Parikka bring together an eminent array of international scholars in film and media studies, literary criticism, and history of science in the spirit of making the discourse of the humanities legible to artist-intellectuals. This foundational volume enables a sophisticated understanding of reproducible audiovisual media culture as apparatus, historical form, and avant-garde space of play. —Peter J. Bloom, author of *French Colonial Documentary: Mythologies of Humanitarianism* An essential read for everyone interested in the histories of media and art. —Oliver Grau, author of *MediaArtHistories* Media archaeology is a wonderful new shadow field. If you are willing to step outside the glow of new media, this book's approaches can shift how you experience the objects and experiences that fill the new everyday of contemporary life. No one captures the beauty of studying new media in the shadow of older media implements and practices better than Erkki Huhtamo, the Finnish writer, curator, and scholar of media technology and design famous for his creative work as a preservationist and an interpreter of pre-cinematic technologies of visual display. He has teamed up here with Jussi Parikka, the Finnish scholar who has brought us an insect theory of media, to give us this long-awaited collection of essays in media archaeology. The surprise of the book is that the essays collectively bring forward a range of approaches to considering archaeological practice, giving us new ways to think about our embodied and subjective orientations to technologies and objects through the lens of the material remnants of practice, rather than offering a narrow definition of the field. The collection moves between computational machines and influencing machines, preservation and imagination, offering a range of ways to live the new everyday of media experience through the imaginary of archaeology. —Lisa Cartwright, co-author of *Practices of Looking: An Introduction to Visual Culture* "Where McLuhan's Understanding Media ends, Media Archaeology actually begins. Refusing the often futile search for the eternal laws of media, Media Archaeology does something more difficult and rare. It literally brings the history of media alive by drawing into presence the enigmatic, heterogeneous, unruly past of the media—its artifacts, machines, imaginaries, tactics, and games. What results is a fabulous cabinet of (media) memories: the imaginary moving with kinetic frenzy, histories of what happens when media collide in the electronic space of the virtual, and stories about those strange interstitial spaces between analogue and digital." —Arthur Kroker, author of *The Will to Technology and the Culture of Nihilism* "Rupturing the continuities and established values of traditional media history, this exciting and thought-provoking collection makes a significant

contribution to our understanding of media culture, and demonstrates that the presence of the past in present-day media is central to the recognition and re-cognition that media archaeology promotes.” —John Fullerton, editor of *Screen Culture: History and Textuality* “Here, at last, is a collection of essays that are a critical step to comprehending the history of our impulse to see ourselves in the machines we have made. This could be the beginning of 'Archaeology of Intention.' —Bernie Lubell, artist “Huhtamo and Parikka’s expertly curated collection is a kaleidoscopic tour of media archaeology, giving us forceful evidence of that unruly domain’s vitality while preserving its wonderful unpredictability. With this essential volume, countless new paths have been opened up for media and cultural historians. —Charles R. Acland, author of *Screen Traffic* “This brilliant collection of essays provides much needed material and historical grounding for our understanding of new media. At the same time, it animates that ground by recognizing the integral roles that imagination, embodiment, and even productive disturbance play in media historiography. Yet these essays constitute more than a collection of historical case studies; together, they transform the book’s subject into its overall method. Media Archaeology performs media archaeology. Huhtamo and Parikka excavate the intellectual traditions and map the epistemological terrain of media archaeology itself, demonstrating that the field is ripe with possibilities not only for further historical examination, but also for imagining exciting new scholarly and creative futures.” —Shannon Mattern, *The New School*
