Kumba Africa Sampson Ejike Odum,2020-11-03 'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven't

tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.

Innovation and Creativity Filip De Beule, Ysabel Nauwelaerts, 2013-01-01 This book brings together different insights into the importance of innovation and creativity to build competitiveness in the European industry and society from different angles. The authors first look at how European countries and their policies have fared on innovation and creativity measures. They go on to examine multinational companies in particular, analyzing research and innovation at the headquarters and subsidiary level and the linkages between them. Looking at the management of innovation in firms and subsidiaries, they gain insights into how firms can innovate more effectively and efficiently. The study examines the role of management control and culture in stimulating creativity as well as an important driver of innovation. The chapters in the book are also complementary in the sense that they include qualitative as well as quantitative studies, from academic researchers to people working in the field. Researchers, professors, managers, students and policymakers interested in innovation, creativity, knowledge, multinational companies, competitiveness and Europe will be enlightened on how to be more creative and innovative.

English as a Medium of Instruction in Postcolonial Contexts Lizzi O. Milligan, Leon Tikly, 2018-10-16 Almost all low- and

middle-income postcolonial countries now use English or another dominant language as the medium of instruction for some, if not all, of the basic education cycle. Much of the literature about language-in-education in such countries has focused on the instrumentalist value of English, on one side, and the rights of learners to high quality mother tongue-based education, on the other. The polarised nature of the debate has tended to leave issues related to the processes of learning in English as a Medium Instruction (EMI) classrooms under-researched. This book aims to provide a greater understanding of the existing challenges for learners and educators and potential strategies that can support more effective teaching and learning in EMI classrooms. Contributions illustrate the impact that learning in English has on learners in a range of regional, national and local contexts and put forward theoretical and empirical analyses to support more relevant and inclusive educational policies. This volume was originally published as a special issue of Comparative Education.

This book examines the key challenges currently facing the Chinese economy. It considers China's increasing global impact, discusses the institutional drivers of China's economic growth, assesses critically China's need for structural reform, and explores issues related to sustainability and human rights.

Elmer Again David McKee, 2012 It's coming up to Elmer's Day, the day when all gray elephants paint themselves in bright colors. Life seems far too quiet for Elmer, the patchwork elephant, so he thinks up a fantastic joke to play on the other elephants, while they're asleep.

Management of International Trade Eun Sup Lee, 2013-01-03 Under the current multilateral trading system, most business entities have turned their attention away from focusing exclusively on their domestic market to the management of international business transactions on the global market. Around the world, this trend has increased the demand for education and training on the principles of international trade and, more practically, the administration of international business transactions. This book aims to give upper-level undergraduates and graduate students a comprehensive understanding of the administrative and practical aspects of international commerce. It seeks to provide students, as the potential future practitioners of international trade, with the ability to gather and administrate the information needed to decide on and manage complex international business transactions, including in- and outsourcing problems, exports and imports.
