100 Projects UK CLT Waugh Thistleton Architects, 2018 The benefits of cross-laminated timber (CLT) are clear: building in timber is quick, clean, and easy. It can be achieved with a measured accuracy and lack of noise, waste, or need for material storage space. This book is a study of the 100 of the most significant buildings constructed from CLT in the United Kingdom over the past 15 years. Authors Andrew Waugh and Anthony Thistleton of Waugh Thistleton Architects have contacted a wide range of individuals and businesses to interview them about their experiences building in CLT to help inform this book. -- Thinkwood.com.

A Vast Machine Paul N. Edwards, 2013-02-08 The science behind global warming, and its history: how scientists learned to understand the atmosphere, to measure it, to trace its past, and to model its future. Global warming skeptics often fall back on the argument that the scientific case for global warming is all model predictions, nothing but simulation; they warn us that we need to wait for real data, “sound science.” In *A Vast Machine* Paul Edwards has news for these skeptics: without models, there are no data. Today, no collection of signals or observations—even from satellites, which can “see” the whole planet with a single instrument—becomes global in time and space without passing through a series of data models. Everything we know about the world's climate we know through models. Edwards offers an engaging and innovative history of how scientists learned to understand the atmosphere—to measure it, trace its past, and model its future.

Ethnicity and Race in the UK Byrne, Bridget, Alexander, Claire, 2020-04-08 Available Open Access under CC-BY-NC licence. 50 years after the establishment of the Runnymede Trust and the Race Relations Act of 1968 which sought to end discrimination in public life, this accessible book provides commentary by some of the UK's foremost scholars of race and ethnicity on data relating to a wide range of sectors of society, including employment, health, education, criminal justice, housing and representation in the arts and media. It explores what progress has been made, identifies those areas where inequalities remain stubbornly resistant to change, and asks how our thinking around race and ethnicity has changed in an era of Islamophobia, Brexit and an increasingly diverse population.

Global Re-introduction Perspectives Pritpal S. Soorae,2010 This is the second issue in the Global Re-introduction Perspectives series and has been produced in the same standardized format as the previous one. The case-studies are arranged in the following order: Introduction, Goals, Success Indicators, Project Summary, Major Difficulties Faced, Major Lessons Learned, Success of Project with reasons for success or failure. For this second issue we received a total of 72 case-studies compared to 62 in the last issue. These case studies cover the following taxa as follows: invertebrates (9), fish (6), amphibians (5), reptiles (7), birds (13), mammals (20) and plants (12) ... We hope the information presented in this book will provide a broad global perspective on challenges facing re-introduction projects trying to restore biodiversity.--Pritpal S. Soorae.

Open Access Peter Suber,2012-07-20 A concise introduction to the basics of open access, describing what it is (and isn't) and showing that it is easy, fast, inexpensive, legal, and beneficial. The Internet lets us share perfect copies of our work with a worldwide audience at virtually no cost. We take advantage of this revolutionary opportunity when we make our work "open access": digital, online, free of charge, and free of most copyright and licensing restrictions. Open access is made possible by the Internet and copyright-holder consent, and many authors, musicians, filmmakers, and other creators who depend on royalties are understandably unwilling to give their consent. But for 350 years, scholars have written peer-reviewed journal articles for impact, not for money, and are free to consent to open access without losing revenue. In this concise introduction, Peter Suber tells us what open access is and isn't, how it benefits authors and readers of research, how we pay for it, how it avoids copyright problems, how it has moved from the periphery to the mainstream, and what its future may hold. Distilling a decade of Suber's influential writing and thinking about open access, this is the indispensable book on the subject for researchers, librarians, administrators, funders, publishers, and policy makers.

World Investment Report 2018 United Nations Publications,2018 The World Investment Report 2018 provides analysis of the interaction between new industrial policies and investment policies. It provides an overview of industrial policy models - based on an inventory of industrial policies adopted by more than 100 countries over the last decade - and the role of investment policies within each model. The Report illustrates how investment policy instruments are used differently across

various models and suggests ways to improve the impact of industrial policy through more effective and efficient investment policies. Finally, the Report offers recommendations to update existing investment policy instruments, including investment incentives, special economic zones, investment facilitation and foreign investment screening mechanisms.--Provided by publisher.

Digital Roots Gabriele Balbi,Nelson Ribeiro,Valérie Schafer,Christian Schwarzenegger,2021-09-07 As media environments and communication practices evolve over time, so do theoretical concepts. This book analyzes some of the most well-known and fiercely discussed concepts of the digital age from a historical perspective, showing how many of them have pre-digital roots and how they have changed and still are constantly changing in the digital era. Written by leading authors in media and communication studies, the chapters historicize 16 concepts that have become central in the digital media literature, focusing on three main areas. The first part, Technologies and Connections, historicises concepts like network, media convergence, multimedia, interactivity and artificial intelligence. The second one is related to Agency and Politics and explores global governance, datafication, fake news, echo chambers, digital media activism. The last one, Users and Practices, is finally devoted to telepresence, digital loneliness, amateurism, user generated content, fandom and authenticity. The book aims to shed light on how concepts emerge and are co-shaped, circulated, used and reappropriated in different contexts. It argues for the need for a conceptual media and communication history that will reveal new developments without concealing continuities and it demonstrates how the analogue/digital dichotomy is often a misleading one.

The State of Food and Agriculture 2018 Food and Agriculture Organization of the United Nations,2018-10-22 Migration is an expanding global reality, one that allows millions of people to seek new opportunities. But it also involves challenges for migrants and for societies, both in areas of origin and of destination. This report analyses migratory flows – internal and international – and how they are linked to processes of economic development, demographic change, and natural-resource pressure. The focus is on rural migration, the many forms it takes and the important role it plays in both developing and developed countries. The report investigates the drivers and impacts of rural migration and highlights how related policy priorities depend on country contexts that are in continuous evolution. These priorities will be different for countries in protracted crises, countries where rural youth employment is a challenge, countries in economic and demographic transition, and developed countries in need of migrant workers, not least to support agriculture and rural economies.

Making One's Way in the World Martin Bell,2020-02-28 The book draws on the evidence of landscape archaeology,

palaeoenvironmental studies, ethnohistory and animal tracking to address the neglected topic of how we identify and interpret past patterns of movement in the landscape. It challenges the pessimism of previous generations which regarded prehistoric routes such as hollow ways as generally undatable. The premise is that archaeologists tend to focus on 'sites' while neglecting the patterns of habitual movement that made them part of living landscapes. Evidence of past movement is considered in a multi-scalar way from the individual footprint to the long distance path including the traces created in vegetation by animal and human movement. It is argued that routes may be perpetuated over long timescales creating landscape structures which influence the activities of subsequent generations. In other instances radical changes of axes of communication and landscape structures provide evidence of upheaval and social change. Palaeoenvironmental and ethnohistorical evidence from the American North West coast sets the scene with evidence for the effects of burning, animal movement, faeces deposition and transplantation which can create readable routes along which are favoured resources. Evidence from European hunter-gatherer sites hints at similar practices of niche construction on a range of spatial scales. On a local scale, footprints help to establish axes of movement, the locations of lost settlements and activity areas. Wood trackways likewise provide evidence of favoured patterns of movement and past settlement location. Among early farming communities alignments of burial mounds, enclosure entrances and other monuments indicate axes of communication. From the middle Bronze Age in Europe there is more clearly defined evidence of trackways flanked by ditches and fields. Landscape scale survey and excavation enables the dating of trackways using spatial relationships with dated features and many examples indicate long-term continuity of routeways. Where fields flank routeways a range of methods, including scientific approaches, provide dates. Prehistorians have often assumed that Ridgeways provided the main axes of early movement but there is little evidence for their early origins and rather better evidence for early routes crossing topography and providing connections between different environmental zones. The book concludes with a case study of the Weald of South East England which demonstrates that some axes of cross topographic movement used as droveways, and generally considered as early medieval, can be shown to be of prehistoric origin. One reason that dryland routes have proved difficult to recognise is that insufficient attention has been paid to the parts played by riverine and maritime longer distance communication. It is argued that understanding the origins of the paths we use today contributes to appreciation of the distinctive qualities of landscapes. Appreciation will help to bring about effective strategies for conservation of mutual benefit to people and wildlife by maintaining and enhancing corridors of connectivity between different landscape zones including fragmented nature reserves and valued places. In these ways an understanding of past routeways can contribute to sustainable landscapes, communities and quality of life

Studies in History and Jurisprudence, Vol. 2 James Bryce, 2017 This volume contains a collection of studies composed at different times over a long series of years. It treats of diverse topics: yet through many of them there runs a common thread,

that of a comparison between the history and law of Rome and the history and law of England. The author has handled this comparison from several points of view, applying it in one essay to the growth of the Roman and British Empires, in another to the extension over the world of their respective legal systems, in another to their Constitutions, in others to their legislation, in another to an important branch of their private civil law. The topic is one profitable to a student of the history of either nation; and it has not been largely treated by any writers before Bryce, as indeed few historians touch upon the legal aspects of history. This is volume two out of two.

The World of Organic Agriculture Minou Youssefi-Menzler, 2010-09-23 The new edition of this annual publication (previously published solely by IFOAM and FiBL) documents recent developments in global organic agriculture. It includes contributions from representatives of the organic sector from throughout the world and provides comprehensive organic farming statistics that cover surface area under organic management, numbers of farms and specific information about commodities and land use in organic systems. The book also contains information on the global market of the burgeoning organic sector, the latest developments in organic certification, standards and regulations, and insights into current status and emerging trends for organic agriculture by continent from the world's foremost experts. For this edition, all statistical data and regional review chapters have been thoroughly updated. Completely new chapters on organic agriculture in the Pacific, on the International Task Force on Harmonization and Equivalence in Organic Agriculture and on organic aquaculture have been added. Published with IFOAM and FiBL

UNESCO Science Report, 2005 Unesco, 2005 This is the fourth in a series of UNESCO reports which periodically examine the emerging trends in scientific research and higher education around the world. Written by an independent team of experts, each chapter describes how research and development activities are organised in the following countries or regions: the United States, Latin America and the Spanish-speaking Caribbean, the Caribbean Common Market (CARICOM) countries, the European Union, South-East Europe, the Russian Federation, the Arab States, Africa, Japan, East and South-East Asia, South Asia. Key themes highlighted include: the development of 'knowledge societies'; the drive for innovation and the role of the private sector; the importance of international co-operation in broadening the number of countries involved in scientific research; and the strengthening position of Asia on the international scene, driven largely by China's dynamism.

Food Wastage Footprint, 2013 This study provides a worldwide account of the environmental footprint of food wastage along the food supply chain, focusing on impacts on climate, water, land and biodiversity, as well as economic quantification based on producer prices ...--Introduction.

Nature Tourism, Conservation, and Development in Kwazulu-Natal, South Africa Bruce A. Aylward, Ernst Lutz, 2003 This publication considers environmental, social and economic issues concerning the development of nature

tourism. Using KwaZulu-Natal in South Africa as a case study, it highlights the benefits and trade-offs in promoting and managing sustainable nature tourism development, and examines how to promote the objectives of economic growth, poverty reduction and conservation. Three key issues are explored: the need to move beyond development of a wildlife industry to the creation of a true nature tourism economy that supports biodiversity; the role of the private sector in achieving equitable development and job creation while generating conservation finance; and alternative pricing and other market mechanisms to encourage the growth and economic viability of nature tourism.

Tilapias: Biology and Exploitation M.C.M Beveridge, B. McAndrew, 2012-12-06 Referred to in the Bible, pictured on the wall-friezes of ancient Egyptian tombs, and a subject of fascination for generations of scientists, the tilapias (Cichlidae: Tilapiini) have featured in the diet and culture of humankind for thousands of years. The present century has seen their spread from Africa throughout the tropics and sub-tropics, largely for food and fisheries purposes. This book attempts to pull together our knowledge of this important group - their biology and fisheries and aquaculture - in a single volume, something that has not been done comprehensively for nearly two decades. A succession of chapters by acknowledged authorities covers evolution, phylogenetic relationships and biogeography, reproductive biology, mating systems and parental care, diet, feeding and digestive physiology, environmental physiology and energetics, the role of tilapias in ecosystems, population dynamics and management, genetics, seed production, nutrition, farming, economics and marketing. The book is aimed at biologists, fisheries scientists, aquaculturists, and all interested in aquatic ecology.

A Handbook on Using the Mixed Survey for Measuring Informal Employment and the Informal Sector Asian Development Bank, 2011-03-01 This handbook presents a cost-effective and reliable data collection strategy for measuring and analyzing informal employment and the informal sector. The cornerstone of this methodology is a version of the mixed survey that is anchored to the Labor Force Survey conducted regularly by developing countries. The Handbook draws from experience in the implementation of the mixed survey in Armenia, Bangladesh, and Indonesia under regional technical assistance 6430: Measuring the Informal Sector. It discusses viable methodologies and processes by which data collected from the mixed survey can be utilized to generate statistics on informal employment and the informal sector. The empirical evidence that will be produced can solidify the efforts on these topics, from research to policy making.
