Psychology and Pathophysiological Outcomes of Eating Akikazu Takada, Hubertus Himmerich, 2021-12-01 The psychology of eating is regulated by neural mechanisms. When not well controlled, eating may result in disorders and health hazards such as obesity, type 2 diabetes mellitus, and vascular diseases. Lifestyles and cultures influence eating habits, thus there are differences in the prevalence of health problems depending upon living environments. This book examines the psychology and the pathophysiological outcomes of eating. Chapters address such topics as the influence of lifestyle, circadian rhythm, sleep, and fragrant odors on appetite and weight regulation; the impact of glucose, sucrose, lactate, and ketone bodies on the brain; the consequences of glycation stress on the skeletal muscle; and much more.

Handbook of Research Ethics and Scientific Integrity Ron Iphofen, 2020-04-02 This handbook is a 'one-stop shop' for current information, issues and challenges in the fields of research ethics and scientific integrity. It provides a comprehensive coverage of research and integrity issues, both within researchers' 'home' discipline and in relation to similar concerns in other disciplines. The handbook covers common elements shared by disciplines and research professions, such as consent, privacy, data management, fraud, and plagiarism. The handbook also includes contributions and perspectives from academics from various disciplines, treating issues specific to their fields. Readers are able to quickly source the most comprehensive and up-to-date information, protagonists, issues and challenges in the field. Experienced researchers keen to assess their own perspectives, as well as novice researchers aiming to establish the field, will equally find the handbook of interest and practical benefit. It saves them a great deal of time in sourcing the disparate available material in these fields and it is the first 'port of call' for a wide range of researchers, research advisors, funding agencies and research reviewers. The most important feature is the handbook's ability to provide practical advice and guidance to researchers in a wide range of disciplines and professions to help them 'think through' their approach to difficult questions related to the principles, values and standards they need to bring to their research practice.

Hormone Replacement: Therapy and Breast Cancer Risk R.D. Mann, 1992-07-15 This book covers a topic of considerable current interest and presents many of the most significant research findings available to date. Workers at the forefront of research on hormone replacement therapy and the implications for the risk of breast cancer were invited to attend a special Conference at the Royal Society of Medicine in London in September, 1991, where the latest data were

presented to a distinguished audience and the implications of this research were discussed. The volume reviews various aspects of HRT and breast cancer, the physiology of the menopause, the current use of HRT in practice, osteoporosis and epidemiology and presents results from a range of European, American and Australian studies on the role of breast cancer and HRT, finishing with an overview of benefits, use and cost-effectiveness and a general summary. The book represents a definitive statement of current knowledge in this field and an informative update on the implications of recent research. It will be a valuable addition of special significance to the libraries of all those concerned with hormone replacement therapy and the study of breast cancer.

Juzen-taiho-to (Shi-Quan-Da-Bu-Tang) Haruki Yamada,Ikuo Saiki,2005-04-29 Kampo is a traditional Japanese herbal medicine that takes a holistic approach to healing. Since Kampo is currently being used for the treatment of a wide range of diseases with many reports of clinical effectiveness, it is playing an increasingly important role in Japan's modern-day health care. **Juzen-taiho-to (Shi-Quan-Da-Bu-Tang): Scientific Evaluation and Clinical Applications** presents a concise overview of the important Kampo formula of Juzen-taiho-to. The book describes the therapeutic indications and traditional uses of Juzen-taiho-to, followed by its taxonomy, cultivation, quality assurance, and chemical constituents and pharmacological actions of raw plant material as the component herbs. Experts in the field discuss up-to-date findings and topics associated with the pharmacology and clinical application of Juzen-taiho-to, including its important immunomodulating, anti-tumor, and anti-metastatic properties, toxicology and side effects, and other related formulations. Today, Kampo medicine is steadily gaining acceptance by Japan's national health insurance system, the medical community, and contemporary society. This book provides a comprehensive review of Juzen-taiho-to and demonstrates how Kampo and other herbal medicines are becoming the popular, practical, and preferred treatments of tomorrow.

Tomosynthesis Imaging Ingrid Reiser,Stephen Glick,2016-04-19 An innovative, three-dimensional x-ray imaging technique that enhances projection radiography by adding depth resolution, Tomosynthesis Imaging explores tomosynthesis, an emerging limited-angle tomographic imaging technology that is being considered for use in a range of clinical applications, and is currently being used for breast cancer screening

Pediatric Acute Lymphoblastic Leukemia Motohiro Kato,2019-11-26 This book discusses key aspects of childhood acute lymphoblastic leukemia (ALL), presenting the latest research on the biology and treatment of the disease and related issues. The cure rate for ALL has improved dramatically due to advances such as supportive care, treatment stratification based on relapse risk, and the optimization of treatment regimens. Gathering contributions by eminent scholars **Pediatric Acute Lymphoblastic Leukemia** is a valuable resource for pediatric hematologists as well as for medical students, interns, residents and fellows. It not only offers comprehensive insights, but also provides a springboard for future research.

Polymer Electrolyte Fuel Cell Degradation Matthew M. Mench,Emin Caglan Kumbur,T. Nejat Veziro glu,2012 For full

market implementation of PEM fuel cells to become a reality, two main limiting technical issues must be overcome- cost and durability. This cutting-edge volume directly addresses the state-of-the-art advances in durability within every fuel cell stack component. [...] chapters on durability in the individual fuel cell components -- membranes, electrodes, diffusion media, and bipolar plates -- highlight specific degradation modes and mitigation strategies. The book also includes chapters which synthesize the component-related failure modes to examine experimental diagnostics, computational modeling, and laboratory protocol--Back cover.

Proceedings of the International Symposium on Engineering under Uncertainty: Safety Assessment and Management (ISEUSAM - 2012) Subrata Chakraborty, Gautam Bhattacharya, 2013-03-12 International Symposium on Engineering under Uncertainty: Safety Assessment and Management (ISEUSAM - 2012) is organized by Bengal Engineering and Science University, India during the first week of January 2012 at Kolkata. The primary aim of ISEUSAM 2012 is to provide a platform to facilitate the discussion for a better understanding and management of uncertainty and risk, encompassing various aspects of safety and reliability of engineering systems. The conference received an overwhelming response from national as well as international scholars, experts and delegates from different parts of the world. Papers received from authors of several countries including Australia, Canada, China, Germany, Italy, UAE, UK and USA, besides India. More than two hundred authors have shown their interest in the symposium. The Proceedings presents ninety two high quality papers which address issues of uncertainty encompassing various fields of engineering, i.e. uncertainty analysis and modelling, structural reliability, geotechnical engineering, vibration control, earthquake engineering, environmental engineering, stochastic dynamics, transportation system, system identification and damage assessment, and infrastructure engineering.

2017 International Conference on Broadband Communication, Wireless Sensors and Powering (BCWSP) IEEE Staff, 2017-11-21 The scopes of the conference are modern microwave and millimeter waves, which consists of broadband communication, wireless sensors and wireless powering Moreover, it includes the internet of things, the telecommunication management and regulations, and some similar topics in ICT

Ethical Imperialism Zachary M. Schrag, 2010-09-01 A powerful indictment of the IRB regime. University researchers in the United States seeking to observe, survey, or interview people are required first to complete ethical training courses and to submit their proposals to an institutional review board (IRB). Under current rules, IRBs have the power to deny funding, degrees, or promotion if their recommended modifications to scholars' proposals are not followed. This volume explains how this system of regulation arose and discusses its chilling effects on research in the social sciences and humanities. Zachary M. Schrag draws on original research and interviews with the key shapers of the institutional review board regime to raise important points about the effect of the IRB process on scholarship. He explores the origins and the application of these

regulations and analyzes how the rules—initially crafted to protect the health and privacy of the human subjects of medical experiments—can limit even casual scholarly interactions such as a humanist interviewing a poet about his or her writing. In assessing the issue, Schrag argues that biomedical researchers and bioethicists repeatedly excluded social scientists from rule making and ignored the existing ethical traditions in nonmedical fields. Ultimately, he contends, IRBs not only threaten to polarize medical and social scientists, they also create an atmosphere wherein certain types of academics can impede and even silence others. The first work to document the troubled emergence of today's system of regulating scholarly research, *Ethical Imperialism* illuminates the problems caused by simple, universal rule making in academic and professional research. This short, smart analysis will engage scholars across academia.

The Ethics Rupture Will C. van den Hoonaard, Ann Hamilton, 2016-01-01 For decades now, researchers in the social sciences and humanities have been expressing a deep dissatisfaction with the process of research-ethics review in academia. Continuing the ongoing critique of ethics review begun in Will C. van den Hoonaard's *Walking the Tightrope* and *The Seduction of Ethics*, *The Ethics Rupture* offers both an account of the system's failings and a series of proposals on how to ensure that social research is ethical, rather than merely compliant with institutional requirements. Containing twenty-five essays written by leading experts from around the world in various disciplines, *The Ethics Rupture* is a landmark study of the problems caused by our current research-ethics system and the ways in which scholars are seeking solutions.

The Earth's Plasmasphere Fabien Darrouzet, Johan de Keyser, Viviane Pierrard, 2009-08-21 James L. Burch · C. Philippe Escoubet Originally published in the journal *Space Science Reviews*, Volume 145, Nos 1-2, 1-2. DOI: 10.1007/s11214-009-9532-7 © Springer Science+Business Media B. V. 2009 The IMAGE and CLUSTER spacecraft have revolutionized our understanding of the inner magnetosphere and in particular the plasmasphere. Before launch, the plasmasphere was not a prime objective of the CLUSTER mission. In fact, CLUSTER might not have ever observed this region because a few years before the CLUSTER launch (at the beginning of the 1990s), it was proposed to raise the perigee of the orbit to 8 Earth radii to make multipoint measurements in the current disruption region in the tail. Because of ground segment constraints, this proposal did not materialize. In view of the great depth and breadth of plasmaspheric research and numerous papers published on the plasmasphere since the CLUSTER launch, this choice certainly was a judicious one. The fact that the plasmasphere was one of the prime targets in the inner magnetosphere for IMAGE provided a unique opportunity to make great strides using the new and complementary measurements of the two missions. IMAGE, with sensitive EUV cameras, could for the first time make global images of the plasmasphere and show its great variability during storm-time. CLUSTER, with four-spacecraft, could analyze in situ spatial and temporal structures at the plasmopause that are particularly important in such a dynamic system.

Indigenous Research Ethics Lily George, Juan Tauri, Lindsey Te Ata o Tu MacDonald, 2020-10-19 It's important that

research with indigenous peoples is ethically and methodologically relevant. This volume looks at challenges involved in this research and offers best practice guidelines to research communities, exploring how adherence to ethical research principles acknowledges and maintains the integrity of indigenous people and knowledge.

Saving Britain Will Hutton, Andrew Adonis, 2018-06-07 Britain's Brexit voters are right. They have been shamefully neglected. But the answer is to change Britain, not to leave Europe. This book sets out how we can radically improve the lives of people and communities shut out from prosperity. The EU, despite its frailties and strains, is a success story. The advantages of leaving are illusory: no gains in trade from deals with protectionist China and the United States can compensate for what is being lost in Europe. Britain is weakening a pillar of the world's diplomatic and trade order at the same time as weakening itself - an act of self-harm, especially when so many countries are retreating from democracy, free trade and progressive values. In *Saving Britain* Will Hutton and Andrew Adonis set out a bold plan to transform Britain and fight for Europe as a force for good at home and abroad.

II-IV Compound Semiconductor Photovoltaic Materials: Volume 668 Robert Birkmire, 2001-10-15 This book focuses on materials issues related to $\text{Cu}(\text{In,Ga})(\text{Se,S})_2$ and CdTe -based polycrystalline thin-film photovoltaic solar cells and related oxides and chalcogenides. Phase equilibrium and thermochemical kinetic aspects of the absorber layer formation of CdTe and $\text{Cu}(\text{In,Ga})(\text{Se,S})_2$ are emphasized and several papers on micro-analytical analysis report on detailed structural properties of thin films. The use of flexible plastic or metal foil substrates as an alternative to glass is addressed in terms of solar-cell performance and limitations imposed by the nature of the substrates. Properties of defects and interfaces in CdTe and CIGSS are highlighted using electrical, optical, and micro-analytical tools. While film properties are correlated to device physics, controversy still exists on the detailed operation of both CdTe and CIGSS devices. Topics include: materials and synthesis; thin films on alternate substrates; defects; growth and junction formation; surfaces and interfaces and film and device characterization.

Modeling and Simulation of Thin-Film Processing: Volume 389 David J. Srolovitz, 1995-10-02 A diverse set of materials science communities come together in this volume to review the extraordinary progress made in the development of computer simulation and modeling techniques for the prediction of film morphology, microstructure, composition, profile and structure. These techniques are rapidly moving out of the area of academic research and into technological and production design areas of thin-film-based industries. The book is loosely organized in ascending order of modeling-length scales - from atomic, up to the entire deposition reactor. Topics include: deposition and growth modeling; film morphology and topology;

film microstructure; failure mechanisms; etching; process modeling and control and reactor-scale modeling.
