Global Technical Strategy for Malaria 2016-2030 World Health Organization,2015-11-04 The World Health Organization's Global Technical Strategy for Malaria 2016- 2030 has been developed with the aim to help countries to reduce the human suffering caused by the world's deadliest mosquito-borne disease. Adopted by the World Health Assembly in May 2015 it provides comprehensive technical guidance to countries and development partners for the next 15 years emphasizing the importance of scaling up malaria responses and moving towards elimination. It also highlights the urgent need to increase investments across all interventions - including preventive measures diagnostic testing treatment and disease surveillance- as well as in harnessing innovation and expanding research. By adopting this strategy WHO Member States have endorsed the bold vision of a world free of malaria and set the ambitious new target of reducing the global malaria burden by 90% by 2030. They also agreed to strengthen health systems address emerging multi-drug and insecticide resistance and intensify national cross-border and regional efforts to scale up malaria responses to protect everyone at risk.

Judgment Misguided Jonathan Baron,1998 People often follow intuitive principles of decision making, ranging from group loyalty to the belief that nature is benign. But instead of using these principles as rules of thumb, we often treat them as absolutes and ignore the consequences of following them blindly. In *Judgment Misguided*, Jonathan Baron explores our well-meant and deeply felt personal intuitions about what is right and wrong, and how they affect the public domain. Baron argues that when these intuitions are valued in their own right, rather than as a means to another end, they often prevent us from achieving the results we want. Focusing on cases where our intuitive principles take over public decision making, the book examines some of our most common intuitions and the ways they can be misused. According to Baron, we can avoid these problems by paying more attention to the effects of our decisions. Written in a accessible style, the book is filled with

compelling case studies, such as abortion, nuclear power, immigration, and the decline of the Atlantic fishery, among others, which illustrate a range of intuitions and how they impede the public's best interests. Judgment Misguided will be important reading for those involved in public decision making, and researchers and students in psychology and the social sciences, as well as everyone looking for insight into the decisions that affect us all.

Why So Few? Catherine Hill, Christianne Corbett, Andresse St. Rose, 2010 In an era when women are increasingly prominent in medicine, law and business, why are there so few women scientists and engineers? A new research report by AAUW presents compelling evidence that can help to explain this puzzle. Why So Few? Women in Science, Technology, Engineering, and Mathematics presents in-depth yet accessible profiles of eight key research findings that point to environmental and social barriers - including stereotypes, gender bias and the climate of science and engineering departments in colleges and universities - that continue to block women's participation and progress in science, technology, engineering, and math. The report also includes up to date statistics on girls' and women's achievement and participation in these areas and offers new ideas for what each of us can do to more fully open scientific and engineering fields to girls and women.--pub. desc.

Oxford Textbook of Palliative Medicine Nathan I. Cherny, Marie Fallon, Stein Kaasa, Russell K. Virtual exchange and 21st century teacher education: short papers from the 2019 EVALUATE conference Mirjam Hauck, Andreas Müller-Hartmann, 2020-11-30 The Evaluating and Upscaling Telecollaborative Teacher Education (EVALUATE) project was a European policy experiment funded by Erasmus+ between 2017 and 2019. The EVALUATE consortium trained teacher trainers and organised virtual exchanges which involved over 1,000 student teachers at over 34 initial teacher education institutions in Europe and beyond. Following the successful capstone conference of the EVALUATE project in September 2019, a number of colleagues answered our call for submissions to the proceedings. The articles you find here provide a window into the multifaceted contributions not only to the conference, but to the field of telecollaboration and virtual exchange at large. We hope you enjoy finding out about the many different ways in which our colleagues engage with this innovative pedagogical approach that combines the deep impact of intercultural dialogue and exchange with the broad reach of digital technology.

Loss and Damage from Climate Change Reinhard Mechler, Laurens M. Bouwer, Thomas Schinko, Swenja Surminski, JoAnne Linnerooth-Bayer, 2018-11-28 This book provides an authoritative insight on the Loss and Damage discourse by highlighting state-of-the-art research and policy linked to this discourse and articulating its multiple concepts, principles and methods. Written by leading researchers and practitioners, it identifies practical and evidence-based policy

options to inform the discourse and climate negotiations. With climate-related risks on the rise and impacts being felt around the globe has come the recognition that climate mitigation and adaptation may not be enough to manage the effects from anthropogenic climate change. This recognition led to the creation of the Warsaw International Mechanism on Loss and Damage in 2013, a climate policy mechanism dedicated to dealing with climate-related effects in highly vulnerable countries that face severe constraints and limits to adaptation. Endorsed in 2015 by the Paris Agreement and effectively considered a third pillar of international climate policy, debate and research on Loss and Damage continues to gain enormous traction. Yet, concepts, methods and tools as well as directions for policy and implementation have remained contested and vague. Suitable for researchers, policy-advisors, practitioners and the interested public, the book furthermore: • discusses the political, legal, economic and institutional dimensions of the issue • highlights normative questions central to the discourse • provides a focus on climate risks and climate risk management. • presents salient case studies from around the world.

The Politics of Polio in Northern Nigeria Elisha P. Renne, 2010-07-30 In 2008, Northern Nigeria had the greatest number of confirmed cases of polio in the world and was the source of outbreaks in several West African countries. Elisha P. Renne explores the politics and social dynamics of the Northern Nigerian response to the Global Polio Eradication Initiative, which has been met with extreme skepticism, subversion, and the refusal of some parents to immunize their children. Renne explains this resistance by situating the eradication effort within the social, political, cultural, and historical context of the experience of polio in Northern Nigeria. Questions of vaccine safety, the ability of the government to provide basic health care, and the role of the international community are factored into this sensitive and complex treatment of the ethics of global polio eradication efforts.

The Digitalization of Public Diplomacy Ilan Manor, 2019-01-14 This book addresses how digitalization has influenced the institutions, practitioners and audiences of diplomacy. Throughout, the author argues that terms such as 'digitalized public diplomacy' or 'digital public diplomacy' are misleading, as they suggest that Ministries of Foreign Affairs (MFAs) are either digital or non-digital, when in fact digitalization should be conceptualized as a long-term process in which the values, norms, working procedures and goals of public diplomacy are challenged and re-defined. Subsequently, through case study examination, this book also argues that different MFAs are at different stages of the digitalization process. By adopting the term 'the digitalization of public diplomacy', this book will offer a new conceptual framework for investigating the impact of

digitalization on the practice of public diplomacy.

Anthropologies of Global Maternal and Reproductive Health Lauren J. Wallace,Margaret E. MacDonald,Katerini T. Storeng,2022-01-11 This open access edited book brings together new research on the mechanisms by which maternal and reproductive health policies are formed and implemented in diverse locales around the world, from global policy spaces to sites of practice. The authors – both internationally respected anthropologists and new voices – demonstrate the value of ethnography and the utility of reproduction as a lens through which to generate rich insights into professionals’ and lay people’s intimate encounters with policy. Authors look closely at core policy debates in the history of global maternal health across six different continents, including: Women’s use of misoprostol for abortion in Burkina Faso The place of traditional birth attendants in global maternal health Donor-driven maternal health programs in Tanzania Efforts to integrate qualitative evidence in WHO maternal and child health policy-making *Anthropologies of Global Maternal and Reproductive Health* will engage readers interested in critical conversations about global health policy today. The broad range of foci makes it a valuable resource for teaching in medical anthropology, anthropology of reproduction, and interdisciplinary global health programs. The book will also find readership amongst critical public health scholars, health policy and systems researchers, and global public health practitioners.

The Health Sector in Ghana Karima Saleh,2012-12-28 ... briefly discusses some of the debates in Ghana's health sector: decentralization and governance, private sector partnership, strengthening health systems, and health financing. It brings together several elements of health system development and challenges and links it to health financing and delivery performance. The volume reviews the situation among human resources for health and pharmaceuticals. The private sector is growing and attention is required on its development. The volume benefits from health service delivery assessments in the public and private sectors, and finds large variations in distribution and weak incentives to improve productivity and performance. It also reviews the demand side financing reform, its coverage of the population and its effect on service use and the financial sustainability of the National Health Insurance Scheme ...--Publisher's website.

The Future of Precision Medicine in Australia Robert C. Williamson, Warwick Anderson, Stephen Duckett, Ian Frazer, Carrie Hillyard, Emma Kowal, John Mattick, Catriona McLean, Kathryn North, Adrian Turner, Courtney Addison, 2018-01-31 The Future of Precision Medicine in Australia explores the current trends in precision medicine technologies and the role that broader implementation of precision medicine capabilities may play in the Australian context. Recent technological advances allow the determination of a wide range of data about an individual's genetic and biochemical make-up, as formed by their genes, environment and lifestyle. These advances can and do affect the clinical management of a person's health and disease. The ability to analyse disease in terms of an individual's make-up, when compared with and studied alongside aggregated clinical and laboratory data from healthy and diseased populations, is termed 'precision' or 'personalised' medicine. Although medicine has always had personal and predictive aspects, precision medicine allows health and disease to be viewed at an increasingly fine-grained resolution, attuned to the complexities of both the biology of each individual and variation within the population.

Leading the Way Ronald B. Hartzer, Lois E. Walker, Rebecca Gatewood, Katherine Grandine, Kathryn M. Kuranda, 2014 Leading the way describes how the men and women of Air Force civil engineering have provided the basing that enabled the Air Force to fly, fight, and win. This book depicts how engineers built hundreds of bases during World Wars I and II, Korea, Vietnam, the Gulf War, and Operations Enduring Freedom and Iraqi Freedom. At the same time, these engineers operated and maintained a global network of enduring, peacetime bases. It describes the engineers' role in special projects such as the ballistic missile program, the Arctic early warning sites, and construction of the U.S. Air Force Academy. Using hundreds of sources, this detailed narrative tells the story of how civil engineers have been organized, trained, equipped, and employed for more than 100 years. From the beaches of Normandy to the mountains of Afghanistan, civil engineers have forged an unmatched record of success and built a solid foundation for today's Air Force.--Back cover.

Australia and the United Nations James Cotton, David Lee, 2012 This landmark reference work is the first complete history of Australia and its relationship with, and role within, the United Nations. On 17 January 1946, when the United Nations Security Council held its inaugural session, an Australian representative, Norman Makin, presided. If all members adhered to the principles of the United Nations Charter, predicted Makin, the United Nations would become a great power for the good

of the world, bringing that freedom from fear, which is necessary before we can hope for progress and welfare in all lands. Australia and the United Nations traces how Australia committed itself to the United Nations project, from before the convening of the first United Nations Security Council until the eve of its election to a fifth term on that body. The book begins with Australian involvement with the organisation that preceded the United Nations, the League of Nations. It then analyses the role played by Australian Minister for External Affairs, HV Evatt, and his staff in framing the United Nations Charter at San Francisco in 1945. Three chapters analyse Australia's diplomacy towards the Security Council, its efforts in peacekeeping, and evolving policies and attitudes towards arms control and disarmament. Two chapters discuss Australia's engagement with the United Nations' manifold specialised agencies and the role of the broader UN family in development. Another two chapters are devoted to a study of Australia's role in areas of United Nations operation only dimly foreseen by its founders at San Francisco-decolonisation and the environment. The two final chapters examine Australia's contribution to the promotion of human rights and international law and the important role it has played seeking to improve the United Nations' performance to equip it to meet new challenges in global politics. Australia and the United Nations tells us what was done in the past, and why. It is essential reading for anyone who wants to better understand Australia's multilateral diplomacy, and our future choices.
