**Uzbekistan Quality Job Creation as a Cornerstone for Sustainable Economic Growth** Kym Anderson, Edimon Ginting, Kiyoshi Taniguchi, 2020-06-01  
Uzbekistan has achieved sustained growth through its gradual transition to a market-based economy through cautious economic policy reforms. Despite its gradual approach to development challenges, the country experienced the smallest output decline among former Soviet economies and enjoyed high rates of economic growth from 2004 to 2015, largely driven by the high prices of its major export commodities. However, the drop in the global prices of many key commodities in recent years have severely impacted Uzbekistan's economy. Under these circumstances, the new government introduced major reforms. The pace of reform is unprecedented. The government has formulated its long-term economic strategy in its Vision 2030, which aims to double the country's gross domestic product by 2030 through a program of economic diversification. This book analyzes how Uzbekistan can boost sustainable economic growth to create more and better jobs. It considers how the country can consolidate achievements from recent policy reforms and maintain reform efforts to accelerate sustainable growth. Policy recommendations cover fostering macroeconomic stability, increasing investment in physical infrastructure, enhancing human capital, improving firms' access to finance, and lowering barriers to international trade and foreign investment inflows.

**Regime of Obstruction** William K. Carroll,2021-04-23 Rapidly rising carbon emissions from the intense development of Western Canada’s fossil fuels continue to aggravate the global climate emergency and destabilize democratic structures. The urgency of the situation demands not only scholarly understanding, but effective action. Regime of Obstruction aims to make visible the complex connections between corporate power and the extraction and use of carbon energy. Edited by William Carroll, this rigorous collection presents research findings from the first three years of the seven-year, SSHRC-funded partnership, the Corporate Mapping Project. Anchored in sociological and political theory, this comprehensive volume provides hard data and empirical research that traces the power and influence of the fossil fuel industry through economics, politics, media, and higher education. Contributors demonstrate how corporations secure popular consent, and coopt, disorganize, or marginalize dissenting perspectives to position the fossil fuel industry as a national public good. They also investigate the difficult position of Indigenous communities who, while suffering the worst environmental and health impacts from carbon extraction, must fight for their land or participate in fossil capitalism to secure income and jobs. The volume concludes with a look at emergent forms of activism and resistance, spurred by the fact that a just energy transition is still feasible. This book provides essential context to the climate crisis and will transform discussions of energy democracy. Contributions by Laurie Adkin, Angele Alook, Clifford Atleo, Emilia Belliveau-Thompson, John Bermingham, Paul Bowles, Gwendolyn Blue, Shannon Daub, Jessica Dempsey, Emily Eaton, Chuka Ejeckam, Simon Enoch, Nick Graham, Shane Gunster, Mark Hudson, Jouke Huizer, Ian Hussey, Emma Jackson, Michael Lang, James Lawson, Marc Lee, Fiona MacPhail, Alicia Massie, Kevin McCartney, Bob Neubauer, Eric Pineault, Lise Margaux Rajewicz, James Rowe, JP Sapinsky, Karena Shaw, and Zoe Yunker.
