Nematodes as Model Organisms Itamar Glazer,David I. Shapiro-Ilan,Paul W. Sternberg,2022 Nematodes, especially *Caenorhabditis elegans* have been used as a model for research in molecular biology since the 1960's. This is a much-needed update on research on fundamental processes in areas such as genetics, developmental biology, nutrition, toxicology, ecology, pharmacology and medicine--

Geocomputation Robert J. Abraham,Stan Openshaw,Linda M. See,2003-09-02 Geocomputation is essentially the follow-on revolution from Geographic Information Science and is expected to gather speed and momentum in the first decade of the 21st century. It comes into use once a GIS database has been set up, with a digital data library, and expanded and linked to a global geographical two or three dimensional co-ordinate system. It exploits developments in IT and new data gathering and earth observing technologies, and takes the notion of GIS beyond data and towards its analysis, modelling, and use in problem solving. This book provides pointers on how to harness these technologies in tandem and in the context of multiple different subjects and problem areas. It seeks to establish the principles and set the foundations for subsequent growth. L

The Musical Sounds of Medieval French Cities Gretchen Peters,2012-09-27 Drawing upon hundreds of newly uncovered archival records, Gretchen Peters reconstructs the music of everyday life in over twenty cities in late medieval France. Through the comparative study of these cities' political and musical histories, the book establishes that the degree to which a city achieved civic authority and independence determined the nature and use of music within the urban setting. The world of urban minstrels beyond civic patronage is explored through the use of diverse records; their livelihood depended upon seeking out and securing a variety of engagements from confraternities to bathhouses. Minstrels engaged in complex professional relationships on a broad level, as with guilds and minstrel schools, and on an individual level, as with partnerships and apprenticeships. The study investigates how minstrels fared economically and socially, recognizing the diversity within this body of musicians in the Middle Ages from itinerant outcasts to wealthy and respected town musicians.
