The Revolution of 1525 Peter Blickle,1981 A major book that scholars will want to study closely, both for its provocative treatment of the interaction of economic and social pressures with politics and ideology and for its many revisions of Marxist and non-Marxist interpretations... [Blickle's] book will influence scholarship for some time to come.-- Journal of Modern History.

The Dream Is Over Simon Marginson, 2016-09-08 A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program for monographs. Visit www.luminosoa.org to learn more. The Dream Is Over tells the extraordinary story of the 1960 Master Plan for Higher Education in California, created by visionary University of California President Clark Kerr and his contemporaries. The Master Plan's equality of opportunity policy brought college within reach of millions of American families for the first time and fashioned the world's leading system of public research universities. The California idea became the leading model for higher education across the world and has had great influence in the rapid growth of universities in China and East Asia. Yet, remarkably, the political conditions supporting the California idea in California itself have evaporated. Universal access is faltering, public tuition is rising, the great research universities face new challenges, and educational participation in California, once the national leader, lags far behind. Can the social values embodied in Kerr's vision be renewed?

The Free Speech Movement Robert Cohen, Reginald E. Zelnik, 2002-10-01 This is the authoritative and long-awaited volume on Berkeley's celebrated Free Speech Movement (FSM) of 1964. Drawing from the experiences of many movement veterans, this collection of scholarly articles and personal memoirs illuminates in fresh ways one of the most important events in the recent history of American higher education. The contributors—whose perspectives range from that of FSM leader Mario Savio to University of California president Clark Kerr—shed new light on such issues as the origins of the FSM in the civil rights movement, the political tensions within the FSM, the day-to-day dynamics of the protest movement, the role of the Berkeley faculty and its various factions, the 1965 trial of the arrested students, and the virtually unknown little Free Speech Movement of 1966.

Education for Life and Work National Research Council, Division of Behavioral and Social Sciences and

Education, Board on Science Education, Board on Testing and Assessment, Committee on Defining Deeper Learning and 21st Century Skills, 2013-01-18 Americans have long recognized that investments in public education contribute to the common good, enhancing national prosperity and supporting stable families, neighborhoods, and communities. Education is even more critical today, in the face of economic, environmental, and social challenges. Today's children can meet future challenges if their schooling and informal learning activities prepare them for adult roles as citizens, employees, managers, parents, volunteers, and entrepreneurs. To achieve their full potential as adults, young people need to develop a range of skills and knowledge that facilitate mastery and application of English, mathematics, and other school subjects. At the same time, business and political leaders are increasingly asking schools to develop skills such as problem solving, critical thinking, communication, collaboration, and self-management - often referred to as 21st century skills. Education for Life and Work: Developing Transferable Knowledge and Skills in the 21st Century describes this important set of key skills that increase deeper learning, college and career readiness, student-centered learning, and higher order thinking. These labels include both cognitive and non-cognitive skills- such as critical thinking, problem solving, collaboration, effective communication, motivation, persistence, and learning to learn. 21st century skills also include creativity, innovation, and ethics that are important to later success and may be developed in formal or informal learning environments. This report also describes how these skills relate to each other and to more traditional academic skills and content in the key disciplines of reading, mathematics, and science. Education for Life and Work: Developing Transferable Knowledge and Skills in the 21st Century summarizes the findings of the research that investigates the importance of such skills to success in education, work, and other areas of adult responsibility and that demonstrates the importance of developing these skills in K-16 education. In this report, features related to learning these skills are identified, which include teacher professional development, curriculum, assessment, after-school and out-of-school programs, and informal learning centers such as exhibits and museums.

Engaging Contradictions Charles R. Hale, 2008-05-07 Scholars in many fields increasingly find themselves caught between the academy, with its demands for rigor and objectivity, and direct engagement in social activism. Some advocate on behalf of the communities they study; others incorporate the knowledge and leadership of their informants directly into the process of knowledge production. What ethical, political, and practical tensions arise in the course of such work? In this wide-ranging and multidisciplinary volume, leading scholar-activists map the terrain on which political engagement and academic rigor meet. Contributors: Ruth Wilson Gilmore, Edmund T. Gordon, Davydd Greenwood, Joy James, Peter Nien-chu Kiang, George Lipsitz, Samuel Martínez, Jennifer Bickham Mendez, Dani Nabudere, Jessica Gordon Nembhard, Jemima Pierre, Laura Pulido, Shannon Speed, Shirley Suet-ling Tang, João Vargas

Performing Ethnomusicology Ted Solis, 2004-08-13 'Performing Ethnomusicology' is the first book to deal exclusively with

creating, teaching, & contextualizing academic world music performing ensembles. 16 essays discuss the problems of public performance & the pragmatics of pedagogy & learning processes.

Forging the Ideal Educated Girl Shenila Khoja-Moolji,2018-06-01 A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program for monographs. Visit www.luminosoa.org to learn more. In Forging the Ideal Educated Girl, Shenila Khoja-Moolji traces the figure of the 'educated girl' to examine the evolving politics of educational reform and development campaigns in colonial India and Pakistan. She challenges the prevailing common sense associated with calls for women's and girls' education and argues that such advocacy is not simply about access to education but, more crucially, concerned with producing ideal Muslim woman-/girl-subjects with specific relationships to the patriarchal family, paid work, Islam, and the nation-state. Thus, discourses on girls'/ women's education are sites for the construction of not only gender but also class relations, religion, and the nation.

Practical Research Paul D. Leedy, Jeanne Ellis Ormrod, 2013-07-30 For undergraduate or graduate courses that include planning, conducting, and evaluating research. A do-it-yourself, understand-it-yourself manual designed to help students understand the fundamental structure of research and the methodical process that leads to valid, reliable results. Written in uncommonly engaging and elegant prose, this text guides the reader, step-by-step, from the selection of a problem, through the process of conducting authentic research, to the preparation of a completed report, with practical suggestions based on a solid theoretical framework and sound pedagogy. Suitable as the core text in any introductory research course or even for self-instruction, this text will show students two things: 1) that quality research demands planning and design; and, 2) how their own research projects can be executed effectively and professionally.

L.A. Rebellion Allyson Field,2015-11-13 L.A. Rebellion: Creating a New Black Cinema is the first book dedicated to the films and filmmakers of the L.A. Rebellion, a group of African, Caribbean, and African American independent film and video artists that formed at the University of California, Los Angeles, in the 1970s and 1980s. The group—including Charles Burnett, Julie Dash, Haile Gerima, Billy Woodberry, Jamaa Fanaka, and Zeinabu irene Davis—shared a desire to create alternatives to the dominant modes of narrative, style, and practice in American cinema, works that reflected the full complexity of Black experiences. This landmark collection of essays and oral histories examines the creative output of the L.A. Rebellion, contextualizing the group's film practices and offering sustained analyses of the wide range of works, with particular attention to newly discovered films and lesser-known filmmakers. Based on extensive archival work and preservation, this collection includes a complete filmography of the movement, over 100 illustrations (most of which are previously unpublished), and a bibliography of primary and secondary materials. This is an indispensible sourcebook for scholars and enthusiasts, establishing the key role played by the L.A. Rebellion within the histories of cinema, Black visual culture, and postwar art in Los Angeles.

**Mining the Home Movie** Karen L. Ishizuka, Patricia Rodden Zimmermann, 2008 Features essays that combine research, critical analyses and theoretical approaches regarding the meaning and value of amateur and archival films. This book identifies home movies as methods of visually preserving history. It defines a genre of film studies and establishes the home movie as a tool for extracting historical and social insights.

Invisible Labor Marion Crain, Winifred Poster, Miriam Cherry, 2016-06-28 Demographic and technological trends have yielded new forms of work that are increasingly more precarious, globalized, and brand centered. Some of these shifts have led to a marked decrease in the visibility of work or workers. This edited collection examines situations in which technology and employment practices hide labor within the formal paid labor market, with implications for workplace activism, social policy, and law. In some cases, technological platforms, space, and temporality hide workers and sometimes obscure their tasks as well. In other situations, workers may be highly visible--indeed, the employer may rely upon the workers' aesthetics to market the branded product--but their aesthetic labor is not seen as work. In still other cases, the work occurs within a social interaction and appears as leisure--a voluntary or chosen activity--rather than as work. Alternatively, the workers themselves may be conceptualized as consumers rather than as workers. Crossing the occupational hierarchy and spectrum from high- to low-waged work, from professional to manual labor, and from production to service labor, the authors argue for a broader understanding of labor in the contemporary era. This book adopts an interdisciplinary approach that integrates perspectives from law, sociology, and industrial/labor relations--Provided by publisher.

**ERS Handbook of Respiratory Medicine** Paolo Palange, Gernot Rohde, 2019-09-01 The European Respiratory Society (ERS) Handbook of Respiratory Medicine, now in its third edition, is a concise, compact and easy-to-read guide to each of the key areas in respiratory medicine. Its 20 sections, written by clinicians and researchers at the forefront of the field, explain the structure and function of the respiratory system, its disorders and how to treat them. The Handbook is a must-have for anyone who intends to remain up to date in the field, and to have within arm's reach a reference that covers everything from the basics to the latest developments in respiratory medicine.

The Science of Subjective Well-Being Michael Eid, Randy J. Larsen, 2008-01-01 This authoritative volume reviews the breadth of current scientific knowledge on subjective well-being (SWB): its definition, causes and consequences, measurement, and practical applications that may help people become happier. Leading experts explore the connections between SWB and a range of intrapersonal and interpersonal phenomena, including personality, health, relationship satisfaction, wealth, cognitive processes, emotion regulation, religion, family life, school and work experiences, and culture. Interventions and practices that enhance SWB are examined, with attention to both their benefits and limitations. The concluding chapter from Ed Diener dispels common myths in the field and presents a thoughtful agenda for future research.

Data Science for Undergraduates National Academies of Sciences, Engineering, and Medicine, Division of Behavioral

and Social Sciences and Education, Board on Science Education, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Board on Mathematical Sciences and Analytics, Computer Science and Telecommunications Board, Committee on Envisioning the Data Science Discipline: The Undergraduate Perspective, 2018-11-11 Data science is emerging as a field that is revolutionizing science and industries alike. Work across nearly all domains is becoming more data driven, affecting both the jobs that are available and the skills that are required. As more data and ways of analyzing them become available, more aspects of the economy, society, and daily life will become dependent on data. It is imperative that educators, administrators, and students begin today to consider how to best prepare for and keep pace with this data-driven era of tomorrow. Undergraduate teaching, in particular, offers a critical link in offering more data science exposure to students and expanding the supply of data science talent. Data Science for Undergraduates: Opportunities and Options offers a vision for the emerging discipline of data science at the undergraduate level. This report outlines some considerations and approaches for academic institutions and others in the broader data science communities to help guide the ongoing transformation of this field.

Women's Empowerment and Global Health Shari Dworkin, Monica Gandhi, Paige Passano, 2017 What is women's empowerment, and how and why does it matter for women's health? Despite the rise of a human rights-based approach to women's health and increasing awareness of the synergies between women's health and empowerment, a lack of consensus remains as to how to measure empowerment and successfully intervene in ways that improve health. Women's Empowerment and Global Health provides thirteen detailed, multidisciplinary case studies from across the globe and through the course of a woman's life to show how science and advocacy can be creatively merged to enhance the agency and status of women. Accompanying short videos provide background about programs on the ground in India, the United States, Mexico, Nicaragua, Zimbabwe, and South Africa. Women's Empowerment and Global Health explores the promises and limits of programmatic, scientific, and rights-based work in real-world settings and provides the next generation of researchers and practitioners, as well as students in global and public health, sociology, anthropology, women's studies, law, business, and medicine, with cutting edge and inspirational examples of programs that point the way toward achieving women's equality and fulfilling the right to health.--Provided by publisher.

**Systematic Reviews** ,2009 For adults. There is a pressing need for methodologically sound RCTs to confirm whether such interventions are helpful and, if so, for whom.

**Shaping the Future** National Science Foundation (U.S.). Directorate for Education and Human Resources,1996 *Birth as an American Rite of Passage* Robbie E. Davis-Floyd,2004-03-15 Why do so many American women allow

themselves to become enmeshed in the standardized routines of technocratic childbirth--routines that can be insensitive, unnecessary, and even unhealthy? Anthropologist Robbie Davis-Floyd first addressed these questions in the 1992 edition. Her new preface to this 2003 edition of a book that has been read, applauded, and loved by women all over the world, makes it clear that the issues surrounding childbirth remain as controversial as ever.
