OECD-FAO Agricultural Outlook 2016-2025 OECD,Food and Agriculture Organization of the United Nations,2016-07-04 The OECD-FAO Agricultural Outlook 2016-2025 provides an assessment of prospects for the coming decade of the agricultural commodity markets across 41 countries and 12 regions, including OECD countries and key agricultural producers, such as India, China, Brazil, the Russian Federation and Argentina.

Hydrological Extremes Ashish Pandey,S.K. Mishra,M.L. Kansal,R.D. Singh,V. P. Singh,2020-11-07 This book presents quality technical papers representing the recent developments in the field of hydrological modeling, water management and water governance including practical applications. The content covers multifarious aspects of hydrology and water resources. It includes an application of the Hydrologic Modelling System (HEC-HMS) which has been successfully demonstrated for assessment of floods. The authors suggest an approach for the mitigation of cyclone disaster through a case study of the Phailin cyclone, whilst considering mitigating pluvial flooding, developing suitable management strategies. The book includes chapters discussing the detrended fluctuation analysis which is carried out for multifractal description of droughts. Drought characteristics are analyzed, and drought indices evolved for drought preparedness/management. The use of science in community planning under changing climate is also studied and discussed. The authors present an experimental study wherein hydraulic coefficients are calibrated by using vertical orifice. A cross flow hybrid hydrokinetic turbine is also evaluated for performance, and high head regulating radial gate designed and studied its sensitivity. This book will appeal to researchers, field practitioners, NGO and other Governmental as well as private water practitioners

Law and Method Bart van Klink,Sanne Taekema,2011 This book gives an overview of the most relevant disciplines for interdisciplinary research on law. What are the characteristics of these disciplines one really needs to understand in order to do research that combines law with them? The book consists of three parts. The first part addresses general methodological questions about legal scholarship and interdisciplinary research. The second part consists of chapters exploring the

relationship between law and other disciplines. The disciplines are classified in broadly three categories: empirical social science, humanities, and language-oriented disciplines. The third part contains examples of interdisciplinary research in practice: how is it done, what kinds of problems arise when doing such research, and what insights into law does it provide?

The Myofascial Release Manual Carol J. Manheim, 1994 Describes the ways in which the therapist receives feedback from the patient, particularly nonverbal feedback. The therapist learns to sense the feedback and interpret and respond to it. As a result, the therapist will determine how much, how long, and how forceful the stretch will be according to the responses of the patient's body. Includes Assessment Forms to help the therapist evaluate the patient's need for Myofascial Release and monitor progress throughout therapy. Discusses soft-tissue injury and its treatment through the myofascial stretching technique. Long standing injuries that have not responded to other methods of treatment can often be treated successfully with Myofascial Release.

Remote Sensing of Northwest Himalayan Ecosystems R. R. Navalgund, A. Senthil Kumar, Subrata Nandy, 2018-10-18 Himalaya, one of the global biodiversity hotspots, is the abode of a variety of flora and fauna. The Himalayan ecosystems have immense ecological, socioeconomic, and aesthetic significance as they provide a wide range of ecosystem services. The northwest Himalaya (NWH), covering three states of India viz., Uttarakhand, Himachal Pradesh, and Jammu and Kashmir, starts from the foothills of Shivaliks in the south and extends to the greater Himalaya in the north. This region is also the source of some of the major rivers of India. With the increase in population, the NWH ecosystems have been under threat due to deforestation, loss of biodiversity, expansion of agriculture and settlement, overexploitation of natural resources, habitat loss and fragmentation, poaching, mining, construction of roads and large dams, and unplanned tourism. The Himalaya being young and geotectonically active, remains inherently unstable, fragile, and prone to natural disasters. Climate change is also likely to impact the Himalayan cryosphere drastically. Recognizing the importance of the Himalaya, a National Mission for Sustaining the Himalayan Ecosystem, one of the eight missions under the National Action Plan on Climate Change (NAPCC) of Govt. of India, to conserve biodiversity, forest cover and other ecological values in the Himalayan region has been taken up. Spaceborne remote sensing with its ability to provide synoptic and repetitive coverage has emerged as a powerful tool for assessment and monitoring of the Himalayan resources and phenomena. Indian Institute of Remote Sensing, Dehradun has taken up a number of studies in the fields of geology, water resources, forestry, agriculture, urban settlement, etc., over the last decade. The book summarises the work carried out in different disciplines, illustrated with tables and figures and a host of relevant references. It is hoped that the book serves as an excellent reference of immense value to the students, researchers, professors, scientists, professionals, and decision makers working in the NWH region.

Education, 1982

The Protection of the Right to Education by International Law Klaus Dieter Beiter, 2006 In view of the trend of demoting education from human right to human need, this book seeks to affirm education as a human right and to describe the various state duties flowing from the right to education, by systematically analyzing article 13 of the International Covenant on Economic, Social and Cultural Rights.

Learning from Practice Leah Wortham, Alexander Scherr, Nancy M. Maurer, Susan L. Brooks, 2016 Softbound - New, softbound print book.

The Good Society John Kenneth Galbraith, 1997-04-30 The legendary economist explains how a nation can remain both compassionate and fiscally sound, with “common sense raised to the level of genius” (The New Yorker). This compact, eloquent book offers a blueprint for a workable national agenda that allows for human weakness without compromising a humane culture. Arguing that it is in the best interest of the United States to avoid excessive wealth and income inequality, and to safeguard the well-being of its citizens, he explores how the goal of a good society can be achieved in an economically feasible way. Touching on topics from regulation, inflation, and deficits to education, the environment, bureaucracy, and the military, Galbraith avoids purely partisan or rigid ideological politics—instead addressing practical problems with logic and well-thought-out principles. “Carefully reasoned . . . the pragmatically liberal Galbraith [argues] that both socialism and complete surrender to market forces are irrelevant as guides to public action.” —Publishers Weekly

Do Stronger Intellectual Property Rights Increase International Technology Transfer? Lee Branstetter, Raymond Fisman, C. Fritz Foley, 2004 One of the alleged benefits of the recent global movement to strengthen intellectual property rights (IPRs) is that such reforms accelerate transfers of technology between countries. Branstetter, Fisman, and Foley examine how technology transfer among U.S. multinational firms changes in response to a series of IPR reforms undertaken by 12 countries over the 1982-99 period. Their analysis of detailed firm-level data reveal that royalty payments for intangibles transferred to affiliates increase at the time of reforms, as do affiliate research and development (R & D) expenditures and total levels of foreign patent applications. Increases in royalty payments and R & D expenditures are more than 20 percent larger among affiliates of parent companies that use U.S. patents more extensively prior to reform and therefore are expected to value IPR reform most. This paper--a product of Trade, Development Research Group--is part of a larger effort in the group to understand the global impact of stronger intellectual property rights.

Aquinas, Education and the East Thomas Brian Mooney, Mark Nowacki, 2013-03-12 A confluence of scholarly interest has resulted in a revival of Thomistic scholarship across the world. Several areas in the investigation of St. Thomas Aquinas, however, remain under-explored. This volume contributes to two of these neglected areas. First, the volume evaluates the contemporary relevance of St. Thomas's views for the philosophy and practice of education. The second area explored involves the intersections of the Angelic Doctor's thought and the numerous cultures and intellectual traditions of the East.

Contributors to this section examine the reception, creative appropriation, and various points of convergence between St. Thomas and the East.

Selected Methodological Issues Krishnan Namboodiri, Ronald G. Corwin, 1989

The Political Economy of Gunnar Myrdal James Angresano, 1997 This book provides an evaluation of the intellectual development of Gunnar Myrdal, emphasizing his methodology, his beliefs about economics and the role of economists in modern society. It explains how Gunnar Myrdal became an institutional economist and how this perspective influenced his contribution to economic development and attempts to close the gap between rich and poor countries. The main argument of the book is that economists, despite being trained in the orthodox neoclassical tradition, can develop an alternative conception that is more relevant and appropriate for analysis and policy making in developing and transition economies. Much of the discussion focuses on the evolution of Gunnar Myrdal's intellectual development and his contributions to transformation issues in an historical context. Specific issues discussed include political and social problems and transformation policy for Central and Eastern Europe. *The Political Economy of Gunnar Myrdal* will be welcomed by academics and students researching in the fields of the history of economic thought, comparative economics and economic development.

A Handbook For Teacher Research Lankshear, Colin, Knobel, Michele, 2004-04-01 A comprehensive approach to teacher research as systematic, methodical and informed practice. It identifies five generic features that must be present in all kinds of research, and provides guidelines for teachers to meet these in studies designed to enhance their vocation as educators.

Learning to Teach Geography in the Secondary School David Lambert, David Balderstone, 2012-08-21 *Learning to Teach Geography in the Secondary School* has become the widely recommended textbook for student and new teachers of geography. It helps them acquire a deeper understanding of the role, purpose and potential of geography within the secondary curriculum, and provides the practical skills needed to design, teach and evaluate stimulating and creative lessons. This fully revised and updated second edition takes account of new legislation and important developments in geography education, including literacy, numeracy, citizenship, and GIS. Brand new chapters in this edition provide essential guidance on fieldwork, and using ICT in the context of geography teaching and learning. Chapters on teaching strategies, learning styles and assessment place the learner at the centre stage, and direct advice and activities encourage successful practice. Designed for use as a core textbook *Learning to Teach Geography in the Secondary School* is essential reading for all student teachers of geography who aspire to become effective, reflective teachers. Praise for the first edition of *Learning to Teach Geography in the Secondary School*: 'This is a practical and visionary book, as well as being superbly optimistic. It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments

everywhere. Practical activities and ideas are set within a carefully worked out, authoritative, conceptual framework.' - The Times Educational Supplement 'This is a modern, powerful, relevant and comprehensive work that is likely to become a standard reference for many beginning teachers on geography initial teacher training courses in England and Wales.' - Educational Review

Transparency in Global Change Burkart Holzner, Leslie Holzner, 2010-06-15 Transparency in Global Change examines the quest for information exchange in an increasingly international, open society. Recent transformations in governments and cultures have brought about a surge in the pursuit of knowledge in areas of law, trade, professions, investment, education, and medical practice—among others. Technological advancements in communications, led by the United States, and public access to information fuel the phenomenon of transparency. This rise in transparency parallels a diminution of secrecy—though, as Burkart and Leslie Holzner point out, secrecy continues to exist on many levels. Based on current events and historical references in literature and the social sciences, Transparency in Global Change focuses on the turning points of information cultures, such as scandals, that lead to pressure for transparency. Moreover, the Holzners illuminate byproducts of transparency—debate, insight, and impetus for change, as transparency exposes the moral corruptions of dictatorship, empire, and inequity.
