[Cochrane Handbook for Systematic Reviews of Interventions](#) Julian P. T. Higgins, Sally Green, 2008-11-24 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

The Oxford Handbook of Job Loss and Job Search Ute-Christine Klehe PhD, Edwin van Hooft PhD, 2018-05-08 Job search is and always has been an integral part of people's working lives. Whether one is brand new to the labor market or considered a mature, experienced worker, job seekers are regularly met with new challenges in a variety of organizational settings. Edited by Ute-Christine Klehe and Edwin A.J. van Hooft, The Oxford Handbook of Job Loss and Job Search provides readers with one of the first comprehensive overviews of the latest research and empirical knowledge in the areas of job loss and job search. Multidisciplinary in nature, Klehe, van Hooft, and their contributing authors offer fascinating insight into the

diverse theoretical and methodological perspectives from which job loss and job search have been studied, such as psychology, sociology, labor studies, and economics. Discussing the antecedents and consequences of job loss, as well as outside circumstances that may necessitate a more rigorous job hunt, this Handbook presents in-depth and up-to-date knowledge on the methods and processes of this important time in one's life. Further, it examines the unique circumstances faced by different populations during their job search, such as those working job-to-job, the unemployed, mature job seekers, international job seekers, and temporary employed workers. Job loss and unemployment are among the worst stressors individuals can encounter during their lifetimes. As a result, this Handbook concludes with a discussion of the various types of interventions developed to aid the unemployed. Further, it offers readers important insights and identifies best practices for both scholars and practitioners working in the areas of job loss, unemployment, career transitions, outplacement, and job search.

William Cecil and Episcopacy, 1559-1577 Brett Usher, 2017-03-02 The figure of William Cecil dominates the court of Elizabeth I, and next to the queen herself, no one did more to shape the political, religious and economic landscape of late sixteenth century England. Nowhere is this influence more evident than in the ecclesiastical settlements that Elizabeth imposed on a country wracked by religious divisions and uncertainty. At the very heart of this settlement lay the question of the role of the bishops, and it is to this problem that Cecil was to devote much time and energy. Broadening our understanding of the Elizabethan Church, this study utilises a number of hitherto underused primary sources to re-examine the vexed issue of the role of bishops. It addresses the question of why certain men were appointed bishops whilst others, often seemingly better qualified, were passed over. Taking a broadly chronological approach, this book argues that Cecil, a committed protestant, hoped to remodel episcopacy along 'reformed' continental lines. Rather than great princes of the church, Cecil envisaged 'superintendents' shorn of much of their traditional temporal power and wealth. Charting the first two decades of Elizabeth's reign it is shown how Cecil tried to convince the queen to abandon the established economic foundations of 'prelacy' in favour of a properly funded superintendency. In this he failed. Yet as long as Cecil remained a dominating voice at the council table the Church of England, through the mediation of a bench of conscientious and hard-working (if often hard-pressed) bishops, was assured of a broad base and an evangelical future. The remainder of Cecil's career, from 1577 to 1598, will be dealt with in a subsequent volume Lord Burghley and Episcopacy.

Jesuit Schools and Universities in Europe, 1548-1773 Paul F. Grendler,2018-11-26 A survey of Jesuit schools and universities across Europe from 1548 to 1773 by Paul F. Grendler. The article discusses organization, curriculum, pedagogy, enrollments, and relations with civil authorities with examples from France, Germany, Austria, Italy, Portugal, Spain, and eastern Europe.

The Age of Reformation Alec Ryrie,2024-04-16 Now in its third edition, The Age of Reformation has been fully updated and extended, offering a comprehensive study of the relationships between religion, politics, and social change in the sixteenth century. The book charts the new challenges and crises facing the English, Scottish, and Irish states in the early modern age as they contended with the spread of Protestantism and a powerful Tudor monarchy. Constructing a clear narrative of the events and actors of this era of reformations, both political and religious, the book provides an accessible entry point for studying a period of upheaval and transformation, synthesising key research and drawing unexpected connections. Each chapter of the third edition has been revised, with additions including expanded treatments of popular politics, the implementation of the Reformation in the parishes, and England's global expansion and the Tudor roots of the 'British empire'. Accompanied by new maps and drawing on the latest research, this book is essential reading for all students of religion, reformation, and politics in early modern British history.

Epistemologies of the South Boaventura de Sousa Santos,2015-11-17 This book explores the concept of 'cognitive injustice': the failure to recognise the different ways of knowing by which people across the globe run their lives and provide meaning to their existence. Boaventura de Sousa Santos shows why global social justice is not possible without global cognitive justice. Santos argues that Western domination has profoundly marginalised knowledge and wisdom that had been in existence in the global South. She contends that today it is imperative to recover and valorize the epistemological diversity of the world. Epistemologies of the South outlines a new kind of bottom-up cosmopolitanism, in which conviviality, solidarity and life triumph against the logic of market-ridden greed and individualism.

Alternative Water Supply Systems Fayyaz Ali Memon,Sarah Ward,2014-10-15 Owing to climate change related uncertainties and anticipated population growth, different parts of the developing and the developed world (particularly urban areas) are experiencing water shortages or flooding and security of fit-for-purpose supplies is becoming a major issue. The emphasis on decentralized alternative water supply systems has increased considerably. Most of the information on such systems is either scattered or focuses on large scale reuse with little consideration given to decentralized small to medium scale systems. Alternative Water Supply Systems brings together recent research into the available and innovative options and additionally shares experiences from a wide range of contexts from both developed and developing countries. Alternative

Water Supply Systems covers technical, social, financial and institutional aspects associated with decentralized alternative water supply systems. These include systems for greywater recycling, rainwater harvesting, recovery of water through condensation and sewer mining. A number of case studies from the UK, the USA, Australia and the developing world are presented to discuss associated environmental and health implications. The book provides insights into a range of aspects associated with alternative water supply systems and an evidence base (through case studies) on potential water savings and trade-offs. The information organized in the book is aimed at facilitating wider uptake of context specific alternatives at a decentralized scale mainly in urban areas. This book is a key reference for postgraduate level students and researchers interested in environmental engineering, water resources management, urban planning and resource efficiency, water demand management, building service engineering and sustainable architecture. It provides practical insights for water professionals such as systems designers, operators, and decision makers responsible for planning and delivering sustainable water management in urban areas through the implementation of decentralized water recycling. How Tobacco Smoke Causes Disease United States. Public Health Service. Office of the Surgeon General,2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

The path of pleasantness Giulia Vidori,2021-04-14 Ippolito II d'Este (1509-1572), cardinal and prince of Ferrara, played a crucial role in shaping the political and cultural connections between Italy and France. Seen by his contemporaries as staunchly 'French', his life rather followed a difficult balance between the political and spatial entities - Rome, Paris, and Ferrara - through which he continuously moved and from which he derived his power. Following his career as cardinal protector of the Valois crown, royal administrator of Siena on behalf of Henry II, and papal legate to France on the eve of the

Wars of Religion, this book argues that Ippolito's apparent diplomatic access ultimately weakened his family's position in Italy and left it ill-equipped to compete in the changing politics of the peninsula.
