**Emergency Response Guidebook** U.S. Department of Transportation, 2013-06-03 Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.

**World Wildlife Crime Report 2020** United Nations Publications, 2021-03-31 The report presents the latest assessment of global trends in wildlife crime. It includes discussions on illicit rosewood, ivory, rhino horn, pangolin scales, live reptiles, tigers and other big cats, and European eel. The COVID-19 (coronavirus) pandemic has highlighted that wildlife crime is a threat not only to the environment and biodiversity, but also to human health, economic development and security. Zoonotic diseases - those caused by pathogens that spread from animals to humans - represent up to 75% of all emerging infectious diseases. Trafficked wild species and the resulting products offered for human consumption, by definition, escape any hygiene or sanitary control, and therefore pose even greater risks of infection.

**Social policy in the European Union: state of play 2015** David Natali (OSE), Bart Vanhercke (OSE), 2015-09-23 The sixteenth edition of Social policy in the European Union: state of play has a triple ambition. First, it provides easily accessible information to a wide audience about recent developments in both EU and domestic social policymaking. Second, the volume

provides a more analytical reading, embedding the key developments of the year 2014 in the most recent academic discourses. Third, the forward-looking perspective of the book aims to provide stakeholders and policymakers with specific tools that allow them to discern new opportunities to influence policymaking. In this 2015 edition of Social policy in the European Union: state of play, the authors tackle the topics of the state of EU politics after the parliamentary elections, the socialisation of the European Semester, methods of political protest, the Juncker investment plan, the EU's contradictory education investment, the EU's contested influence on national healthcare reforms, and the neoliberal Trojan Horse of the Transatlantic Trade and Investment Partnership (TTIP).

**Environment Act 2021** Great Britain, 2021-11-16 Royal Assent, 9th November 2021. An Act to make provision about targets, plans and policies for improving the natural environment; for statements and reports about environmental protection; for the Office for Environmental Protection; about waste and resource efficiency; about air quality; for the recall of products that fail to meet environmental standards; about water; about nature and biodiversity; for conservation covenants; about the regulation of chemicals. Explanatory Notes have been produced to assist in the understanding of this Act and are available separately

**Lumpy Skin Disease** Eeva S. M. Tuppurainen, Shawn Babiuk, Eyal Klement, 2018-07-03 This book provides a comprehensive but concise overview on the economically important emerging cattle pox virus derived Lumpy Skin Disease, including the characteristics of causative agent, description of clinical signs in cattle, pathology and histopathology, immunity, geographical distribution, epidemiology and transmission pathways, control and eradication of the disease. In addition the recent developments in vaccination, mathematical modeling and risk assessment are discussed. Lumpy Skin Disease currently spreads aggressively across the Middle and Near East. The first incursion to the European Union territory occurred in Greece in autumn 2015. The book targets clinicians and field veterinarians in Lumpy Skin Disease affected regions, veterinary authorities as well as advanced students in veterinary medicine and virology.

Electronic Signatures in Law Stephen Mason, 2012-01-26 Using case law from multiple jurisdictions, Stephen Mason examines the nature and legal bearing of electronic signatures.

Mobile Museums Felix Driver, Mark Nesbitt, Caroline Cornish, 2021-04-19 Mobile Museums presents an argument for the importance of circulation in the study of museum collections, past and present. It brings together an impressive array of international scholars and curators from a wide variety of disciplines – including the history of science, museum anthropology and postcolonial history – to consider the mobility of collections. The book combines historical perspectives on the circulation of museum objects in the past with contemporary accounts of their re-mobilisation, notably in the context of Indigenous community engagement. Contributors seek to explore processes of circulation historically in order to re-examine, inform and unsettle common assumptions about the way museum collections have evolved over time and through space. By

foregrounding questions of circulation, the chapters in *Mobile Museums* collectively represent a fundamental shift in the understanding of the history and future uses of museum collections. The book addresses a variety of different types of collection, including the botanical, the ethnographic, the economic and the archaeological. Its perspective is truly global, with case studies drawn from South America, West Africa, Oceania, Australia, the United States, Europe and the UK. *Mobile Museums* helps us to understand why the mobility of museum collections was a fundamental aspect of their history and why it continues to matter today. Praise for *Mobile Museums* 'This book advances a paradigm shift in studies of museums and collections. A distinguished group of contributors reveal that collections are not dead assemblages. The nineteenth and twentieth centuries were marked by vigorous international traffic in ethnography and natural history specimens that tell us much about colonialism, travel and the history of knowledge – and have implications for the remobilisation of museums in the future.' – Nicholas Thomas, University of Cambridge 'The first major work to examine the implications and consequences of the migration of materials from one scientific or cultural milieu to another, it highlights the need for a more nuanced understanding of collections and offers insights into their potential for future re-mobilisation.' – Arthur MacGregor

**Winning the Oil Endgame** Amory B. Lovins, 2004 Enough about the oil problem. Here's the solution. Over a few decades, starting now, a vibrant US economy (then others) can completely phase out oil. This will save a net \$70 billion a year, revitalize key industries and rural America, create a million jobs, and enhance security. Here's the roadmap ? independent, peer-reviewed, co-sponsored by the Pentagon ? for the transition beyond oil, led by business and profit.

**Citizenship, Democracy and Belonging in Suburban Britain** David Jeevendrampillai, 2021-10-12 A study of the conditions of being a citizen, belonging and democracy in suburban Britain, this book focuses on understanding how a community takes on the social responsibility and pressures of being a good citizen through what they call 'stupid' events, festivals and parades. Building a community is perceived to be an important and necessary act to enable resilience against the perceived threats of neoliberal socio-economic life such as isolation, selfishness and loss of community. *Citizenship, Democracy and Belonging in Suburban Britain* explores how authoritative knowledge is developed, maintained and deployed by this group as they encounter other 'social projects', such as the local council planning committee or academic projects researching participation in urban planning. The activists, who call themselves the 'Seething Villagers', model their community activity on the mythical ancient village of Seething where moral tales of how to work together, love others and be a community are laid out in the *Seething Tales*. These tales include Seething 'facts' such as the fact that the ancient Mountain of Seething was destroyed by a giant. The assertion of fact is central to the mechanisms of play and the refusal of expertise at the heart of the Seething community. The book also stands as a reflexive critique on anthropological practice, as the author examines their role in mobilising knowledge and speaking on behalf of others. *Citizenship, Democracy and Belonging in Suburban Britain* is of interest to anthropologists, urban studies scholars, geographers and those interested in

the notions of democracy, inclusion, citizenship and anthropological practice.

*Digital Roots* Gabriele Balbi, Nelson Ribeiro, Valérie Schafer, Christian Schwarzenegger, 2021-09-07 As media environments and communication practices evolve over time, so do theoretical concepts. This book analyzes some of the most well-known and fiercely discussed concepts of the digital age from a historical perspective, showing how many of them have pre-digital roots and how they have changed and still are constantly changing in the digital era. Written by leading authors in media and communication studies, the chapters historicize 16 concepts that have become central in the digital media literature, focusing on three main areas. The first part, Technologies and Connections, historicises concepts like network, media convergence, multimedia, interactivity and artificial intelligence. The second one is related to Agency and Politics and explores global governance, datafication, fake news, echo chambers, digital media activism. The last one, Users and Practices, is finally devoted to telepresence, digital loneliness, amateurism, user generated content, fandom and authenticity. The book aims to shed light on how concepts emerge and are co-shaped, circulated, used and reappropriated in different contexts. It argues for the need for a conceptual media and communication history that will reveal new developments without concealing continuities and it demonstrates how the analogue/digital dichotomy is often a misleading one.

*Kerala Development Report* India. Planning Commission, 2008 Full of data on various sectors and issues--among them finance, tourism, foreign trade, agriculture, and governance--this report on the state of Kerala is designed to benefit businesses, NGOs, and policy makers. While Kerala has a strong economy and is India's most literate state, areas such as human rights and the treatment of women and minorities leave room for improvement. This extensive reference discusses the constraints and challenges faced by Kerala and provides a blueprint for its socioeconomic progress.

**Circular Economy in Textiles and Apparel** Subramanian Senthilkannan Muthu, 2018-11-05 Circular Economy in Textiles and Apparel: Processing, Manufacturing, and Design is the first book to provide guidance on this subject, presenting the tools for implementing this paradigm and their impact on textile production methods. Sustainable business strategies are also covered, as are new design methods that can help in the reduction of waste. Drawing on contributions from leading experts in industry and academia, this book covers every aspect of this increasingly important subject and speculates on future developments. Provides case studies on the circular economy in operation in the textiles industry Identifies challenges to implementation and areas where more research is needed Draws on both industrial innovation and academic research to explain an emerging topic with the potential to entirely change the way we make and use clothing

Russia's Military Interventions Samuel Charap, Edward Geist, Frederick, Bryan, Drennan, John J., Chandler, Nathan, Kavanagh, Jennifer, 2021-09-27 Moscow's use of its military abroad in recent years has radically reshaped perceptions of Russia as an international actor. With the 2014 annexation of Crimea, the invasion of eastern Ukraine and

sustainment of an insurgency there, and (in particular) the 2015 intervention in Syria, Russia repeatedly surprised U.S. policymakers with its willingness and ability to use its military to achieve its foreign policy objectives. Despite Russia's relatively small global economic footprint, it has engaged in more interventions than any other U.S. competitor since the end of the Cold War. In this report, the authors assess when, where, and why Russia conducts military interventions by analyzing the 25 interventions that Russia has undertaken since 1991, including detailed case studies of the 2008 Russia-Georgia War and Moscow's involvement in the ongoing Syrian civil war. The authors suggest that Russia is most likely to intervene to prevent erosion of its influence in its neighborhood, particularly following a shock that portends such an erosion occurring rapidly. If there were to be a regime change in a core Russian regional ally, such as Belarus or Armenia, that brought to power a government hostile to Moscow's interests, it is possible (if not likely) that a military intervention could ensue.

**The Future of International Environmental Law** David Kenneth Leary, Balakrishna Pisupati, 2010 This book explores the future of international environmental law in a world of ever worsening environmental crises. It examines the success stories and failures of international environmental law and argues that future responses to global environmental crises will be more about good environmental governance than just more treaties and laws. Environmental governance will need to accommodate the needs and aspirations of peoples from developed and developing countries alike and will have to be based on decisions and actions by a vast range of actors and stakeholders--not just the nation-state that has traditionally dominated environmental diplomacy. This also suggests a need to be cognizant of the close links to other areas of international law, including human rights. The Future of International Environmental Law tackles the major environmental challenges of our times including climate change, biodiversity loss, and pollution and overfishing of the oceans. It examines what we can learn from the implementation of existing international environmental laws over the past few decades. It also considers a range of emerging issues such as the management of the environmental challenges faced by the Arctic, nanotechnology, biofuels and synthetic genomics.

**Insolvency Litigation** Louis G. Doyle, Steven Fennell, 1999 This updated edition of Derrick Wyatt's and Alan Dashwood's undergraduate textbook on European Union law has been extensively rewritten, and provides a comprehensive guide to EU institutions and law

**Small Wars** Charles Edward Callwell, 2012-08-12 This is the original manual for "small wars," now known variously as guerrilla warfare, asymmetric combat, and low-intensity conflict. It was first published in 1896 as an analysis and how-to guide for the British Army as it fought to expand the boundaries of the British Empire. Its author, Major General Sir Charles Edward Callwell, collects and distills combat experience from a vast range of British, French, and Russian imperial campaigns and rebellions. Callwell then draws several universal small-war combat lessons that are still true today, including the need for "boldness and vigor" to keep irregular forces off-balance, the vital role of intelligence, the importance of seizing

and holding important terrain (most often the high ground), and the final war-winning requirement to “seize what the enemy prizes most.” He also shows that technological superiority alone is not enough, and that logistics and supply can lock an army in place instead of freeing it. Some of the Afghanistan battlefields described in the book are still being fought over today, with much the same disparity in forces, over a century later – it is impossible to miss the lessons of history in this classic work.

The Last Potter of Black Burton Lee Cartledge, 2021-01-31 The pottery industry was key for Burton-in-Lonsdale on the borders of Yorkshire, Lancashire and Cumbria for nearly three centuries until its demise in 1944. This book tells the story of Richard Bateson, the last potter of Black Burton, a renowned thrower and teacher. It encapsulates the history and traditions of this lost trade; the personalities, the struggles, the humour alongside the hard work. The book is a grand contribution to the history of Burton, the history of pottery and the story of rural arts in transformation from an industrial to a more artistic endeavour. The most comprehensive collection of history, stories, first-hand accounts and photographs we are ever likely to see... social history of a high order; rooted in its context, explored by those who really understand how it was. From the Foreword by Mark McKergow (Richard) didn't like Bernard Leach's pots, because all Leach's pots had a wobble and Richard's never did. David Frith, Brookhouse Pottery

Concepts of Biology Samantha Fowler, Rebecca Roush, James Wise, 2018-01-07 Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Birth by Design Raymond G. De Vries, 2001 This anthology examines Love's Labours Lost from a variety of perspectives and through a wide range of materials. Selections discuss the play in terms of historical context, dating, and sources; character analysis; comic elements and verbal conceits; evidence of authorship; performance analysis; and feminist

interpretations. Alongside theater reviews, production photographs, and critical commentary, the volume also includes essays written by practicing theater artists who have worked on the play. An index by name, literary work, and concept rounds out this valuable resource.
