Ulysses S. Grant - General and President (Biography) Biographiq,2008-04 Ulysses S. Grant - General and President is the biography of Ulysses S. Grant, an American General and the eighteenth President of the United States (1869-1877). He achieved international fame as the leading Union General in the American Civil War. Named commanding General of the Federal armies in 1864, he implemented a coordinated strategy of simultaneous attacks aimed at destroying the South's ability to carry on the war. In 1865, after conducting a costly war of attrition in the East, he accepted the surrender of his Confederate opponent Robert E. Lee at Appomattox Court House. In 1868, Grant was elected President as a Republican. Grant was the first President to serve two full terms since Andrew Jackson forty years prior. Grant led Radical Reconstruction and built a powerful patronage-based Republican party in the South. Ulysses S. Grant - General and President is highly recommended for those interested in the history and story of this Civil War General and American President.

In this invigorating, essential book, Maggie Nelson explores how we might think, experience or talk about the concept in ways that are responsive to our divided world. Drawing on pop culture, theory and the intimacies and plain exchanges of daily life, she follows freedom - with all its complexities - through four realms: art, sex, drugs and climate. On Freedom offers a bold new perspective on the challenging times in which we live. Like Nobody's Business Andrew C. Comrie,2021-02-23 How do university finances really work? From flagship public research universities to small, private liberal arts colleges, there are few aspects of these institutions associated with more confusion, myths or lack of understanding than how they fund themselves and function in the business of higher education. Using simple, approachable explanations supported by clear illustrations, this book takes the reader on an engaging and enlightening tour of how the money flows. How does the university really pay for itself? Why do tuition and fees rise so fast? Why do universities lose money on research? Do most donations go to athletics? Grounded in hard data, original analyses, and the practical experience of a seasoned administrator, this book provides refreshingly clear answers and comprehensive insights for anyone on or off campus who is interested in the business of the university: how it earns its money, how it spends it, and how it all works.

The Presentation of Self in Everyday Life Erving Goffman,2021-09-29 A notable contribution to our understanding of ourselves. This book explores the realm of human behavior in social situations and the way that we appear to others. Dr. Goffman uses the metaphor of theatrical performance as a framework. Each person in everyday social intercourse presents himself and his activity to others, attempts to guide and control the impressions they form of him, and employs certain techniques in order to sustain his performance, just as an actor presents a character to an audience. The discussions of these social techniques offered here are based upon detailed research and observation of social customs in many regions.

Introduction to Information Retrieval Christopher D. Manning,Prabhakar Raghavan,Hinrich Schütze,2008-07-07 Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the

book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

Dismantling Race in Higher Education Jason Arday, Heidi Safia Mirza, 2018-08-31 This book reveals the roots of structural racism that limit social mobility and equality within Britain for Black and ethnicised students and academics in its inherently white Higher Education institutions. It brings together both established and emerging scholars in the fields of Race and Education to explore what institutional racism in British Higher Education looks like in colour-blind 'post-race' times, when racism is deemed to be 'off the political agenda'. Keeping pace with our rapidly changing global universities, this edited collection asks difficult and challenging questions, including why black academics leave the system; why the curriculum is still white; how elite universities reproduce race privilege; and how Black, Muslim and Gypsy traveller students are disadvantaged and excluded. The book also discusses why British racial equality legislation has failed to address racism, and explores what the Black student movement is doing about this. As the authors powerfully argue, it is only by dismantling the invisible architecture of post-colonial white privilege that the 21st century struggle for a truly decolonised academy can begin. This collection will be essential reading for students and academics working in the fields of Education, Sociology, and Race.

The American University of Beirut Betty S. Anderson, 2011-11-15 Since the American University of Beirut opened its doors in 1866, the campus has stood at the intersection of a rapidly changing American educational project for the Middle East and an ongoing student quest for Arab national identity and empowerment. Betty S. Anderson provides a unique and comprehensive analysis of how the school shifted from a missionary institution providing a curriculum in Arabic to one offering an English-language American liberal education extolling freedom of speech and analytical discovery. Anderson discusses how generations of students demanded that they be considered legitimate voices of authority over their own education; increasingly, these students sought to introduce into their classrooms the real-life political issues raging in the Arab world. The Darwin Affair of 1882, the introduction of coeducation in the 1920s, the Arab nationalist protests of the late 1940s and early 1950s, and the even larger protests of the 1970s all challenged the Americans and Arabs to fashion an educational program relevant to a student body constantly bombarded with political and social change. Anderson reveals that the two groups chose to develop a program that combined American goals for liberal education with an Arab student demand that the educational experience remain relevant to their lives outside the school's walls. As a result, in eras of both cooperation and conflict, the American leaders and the students at the school have made this American institution of the Arab world and of Beirut.

Transgender Marxism Jules Joanne Gleeson,Elle O'Rourke,2021-05-20 Transgender Marxism is the first volume of its kind, offering a provocative and groundbreaking synthesis of transgender studies and Marxist theory.Reflecting on the relations between gender and labour, it shows how these linked phenomena structure antagonisms in particular social and historical situations. While no one is spared gendered conditioning, the contributors argue that transgender people nonetheless face particular pressures, oppressions and state persecution. The collection makes a particular contribution to Marxist feminism and social reproduction theory, through both personal and analytic examinations of the social activity demanded of trans people around the world.Exploring trans lives and movements through a Marxist lens, the book also assesses the particular experience of surviving as trans in light of the totality of gendered experience under capitalism. Twinning Marxism with other schools of thought - including psychoanalysis, phenomenology and Butlerian performativity - Transgender Marxism ultimately offers an insight into transgender experience, and an exciting renewal of Marxist theory itself.
