**Rabindranath Tagore's Journey as an Educator** Mohammad A. Quayum,2022-12-20 This book looks at Rabindranath Tagore's, experiments and journey as an educator and the influence of humanistic worldviews, nationalism and cosmopolitanism in his philosophy of education. It juxtaposes the educational systems and institutions set up by the British colonial administration with Tagore's pedagogical vision and schools in Santiniketan, West Bengal—Brahmacharya Asram (1901), Visva-Bharati University (1921) and Sriniketan Institute of Village Reconstruction (1922). An educational pioneer and a poet-teacher, Tagore combined nature and culture, tradition and modernity, East and West, in formulating his educational methodology. The essays in this volume analyse the relevance of his theories and practice in encouraging greater cultural exchange and the dissolution of the walls between classrooms and communities. This book will be useful for scholars and researchers of education, Tagore studies, literature, cultural studies, sociology of education, South Asian studies and colonial and postcolonial studies.

**Democracy and Executive Power** Susan Rose-Ackerman,2021-10-26 A defense of regulatory agencies' efforts to combine public consultation with bureaucratic expertise to serve the interest of all citizens The statutory delegation of rule-making authority to the executive has recently become a source of controversy. There are guiding models, but none, Susan

Rose-Ackerman claims, is a good fit with the needs of regulating in the public interest. Using a cross-national comparison of public policy-making in the United States, the United Kingdom, France, and Germany, she argues that public participation inside executive rule-making processes is necessary to preserve the legitimacy of regulatory policy-making.

**Real Analysis** Barry Simon,2015-11-02 A Comprehensive Course in Analysis by Poincaré Prize winner Barry Simon is a five-volume set that can serve as a graduate-level analysis textbook with a lot of additional bonus information, including hundreds of problems and numerous notes that extend the text and provide important historical background. Depth and breadth of exposition make this set a valuable reference source for almost all areas of classical analysis. Part 1 is devoted to real analysis. From one point of view, it presents the infinitesimal calculus of the twentieth century with the ultimate integral calculus (measure theory) and the ultimate differential calculus (distribution theory). From another, it shows the triumph of abstract spaces: topological spaces, Banach and Hilbert spaces, measure spaces, Riesz spaces, Polish spaces, locally convex spaces, Fréchet spaces, Schwartz space, and spaces. Finally it is the study of big techniques, including the Fourier series and transform, dual spaces, the Baire category, fixed point theorems, probability ideas, and Hausdorff dimension. Applications include the constructions of nowhere differentiable functions, Brownian motion, space-filling curves, solutions of the moment problem, Haar measure, and equilibrium measures in potential theory.

**Reading Fashion in Art** Ingrid E. Mida,2021-02-11 Shortlisted for the CSA Millia Davenport Publication Award, 2021  
Dress and fashion are central to our understanding of art. From the stylization of the body to subtle textile embellishments and richly symbolic colors, dress tells a story and provides clues as to the cultural beliefs of the time in which artworks were

produced. This concise and accessible book provides a step-by-step guide to analysing dress in art, including paintings, photographs, drawings and art installations. The first section of the book includes an introduction to visual analysis and explains how to 'read' fashion and dress in an artwork using the checklists. The second section offers case studies which demonstrate how artworks can be analysed from the point of view of key themes including status and identity, modernity, ideals of beauty, gender, race, globalization and politics. The book includes iconic as well as lesser known works of art, including work by Elisabeth Vigée le Brun, Thomas Gainsborough, James Jacques Tissot, Marcel Duchamp and Man Ray, Yinka Shonibare, Mickalene Thomas, Kent Monkman and many others. Reading Fashion in Art is the perfect text for students of fashion coming to art history for the first time as well as art history students studying dress in art and will be an essential handbook for any gallery visitor. The step-by-step methodology helps the reader learn to look at any work of art that includes the dressed or undressed body and confidently develop a critical analysis of what they see.

**The Dress Detective** Ingrid Mida,Alexandra Kim,2018-08 The Dress Detective is the first practical guide to analyzing fashion objects, clearly demonstrating how their close analysis can enhance and enrich interdisciplinary research. This accessible book provides readers with the tools to uncover the hidden stories in garments, setting out a carefully developed research methodology specific to dress, and providing easy-to-use checklists that guide the reader through the process. Beautifully illustrated, the book contains seven case studies of fashionable Western garments - ranging from an 1820s coat to a 2004 Kenzo jacket - that articulate the methodological framework for the process, illustrate the use of the checklists, and show how evidence from the garment itself can be used to corroborate theories of dress or fashion.This book outlines a skillset that has, until now, typically been passed on informally. Written in plain language, it will give any budding fashion historian, curator, or researcher the knowledge and confidence to analyze the material in front of them effectively.
