**The Haskins Society Journal 34** Person William North, Contributor Laura E Wangerin, 2024-10-08 Essays illuminating a wide range of topics from Cistercian preachers and the geography of purgatory to royal and ecclesiastical justice and power. This volume continues the Society's commitment to historical and interdisciplinary research from the early and central Middle Ages and demonstrates its belief that the close interrogation of primary documents yields new insights into or important recalibrations of our understanding of the past. It begins by surveying the works of the Greek Fathers rendered into Latin in late antiquity, exploring their reception and deployment in England before the conquest. The twelfth century occupies a central place in this volume. Four papers offer close readings or re-readings of key authors or sources: one reconstructs William of Malmesbury's journeys in the mid-1130s; another offers a new reading of two of Aelred of Rievaulx's royal biographies; a third considers the influence of Henry of Marcy on Herbert of Clairvaux's *Liber visionum et miraculorum Clarevallensium*; and a fourth examines the *Historia Gaufredi Ducis* and its outsized impact on the history of the ritual of dubbing. Two papers address royal and ecclesiastical justice in mid-thirteenth-century France through meticulous work with archival sources: they respectively consider the case of Geoffroy de Milly and limits of sovereign authority and *enquêtes* as a technique of power. Further topics include the emerging geography of purgatory in the imagination of the twelfth and thirteenth centuries; the different dimensions of medieval institutional culture as seen in the intersection of earthly and angelic power in Angevin England (placed in dialogue with American medieval historiography); and the evolving historiographical treatment of men of the Church employed as trusted administrators by Italian communes. The volume concludes with two essays on significant moments in the history of American medieval studies: examinations of the publication history of Evelyn Faye Wilson's *Stella Maris* of John of Garland and of the life, scholarship and legacy of Bennett David Hill round out the volume.

**Code Clone Analysis** Katsuro Inoue, Chanchal K. Roy, 2021-08-03 This is the first book organized around code clone analysis. To cover the broad studies of code clone analysis, this book selects past research results that are important to the progress of the field and updates them with new results and future directions. The first chapter provides an introduction for readers who are inexperienced in the foundation of code clone analysis, defines clones and related terms, and discusses the classification of clones. The chapters that follow are categorized into three main parts to present 1) major tools for code clone analysis, 2) fundamental topics such as evaluation benchmarks, clone visualization, code clone searches, and code similarities, and 3) applications to actual problems. Each chapter includes a valuable reference list that will help readers to achieve a comprehensive understanding of this diverse field and to catch up with the latest research results. Code clone analysis relies heavily on computer science theories such as pattern matching algorithms, computer language, and software metrics. Consequently, code clone analysis can be applied to a variety of real-world tasks in software development and maintenance such as bug finding and program refactoring. This book will also be useful in designing an effective curriculum that combines theory and application of code clone analysis in university software engineering courses.

**Literary Biographies in The Lives of Remarkable People Series in Russia** Carol Ueland, Ludmilla A. Trigos, 2022-03-14 The legendary Russian biography series, *The Lives of Remarkable People*, has played a significant role in Russian culture from its inception in 1890 until today. The longest running biography series in world literature, it spans three centuries and widely divergent political and cultural epochs: Imperial, Soviet, and Post-Soviet Russia. The authors argue that the treatment of biographical figures in the series is a case study for continuities and changes in Russian national identity over time. Biography in Russia and elsewhere remains a most influential literary genre and the distinctive approach and branding of the series has made it the economic engine of its publisher, Molodaia gvardiia. The centrality of biographies of major literary figures in the series reflects their heightened importance in Russian culture. The contributors examine the

ways that biographies of Russia's foremost writers shaped the literary canon while mirroring the political and social realities of both the subjects' and their biographers' times. Starting with Alexander Pushkin and ending with Joseph Brodsky, the authors analyze the interplay of research and imagination in biographical narrative, the changing perceptions of what constitutes literary greatness, and the subversive possibilities of biography during eras of political censorship.

Calming America Dennis S. O’Leary MD,2022-09-16 Pot Luck Spokesman? The information void in the hours following the shooting of US President Ronald Reagan late Monday afternoon, March 30, 1981, spawned many false rumors and misinformation, which White House political adviser Lyn Nofziger understood threatened the credibility of the White House. He therefore took the podium before the 200 plus assembled press in Ross Hall to tell them that he would be bringing with him a credible physician to brief them once the president was out of surgery. However, he didn’t have many options to draw from for that credible physician. At the hospital, the surgeons tending the three shooting victims had first-hand information about the afternoon’s events, but each surgeon knew only about his own injured patient. White House physician Dan Ruge meanwhile had been at the president’s side throughout the afternoon and was a possible candidate, but his White House association made his credibility suspect according to White House aides. The job became the drafting of the most logical person to be spokesman. That would have been the seasoned physician CEO of the George Washington University Medical Center Ron Kaufman, but he was out of town. Next up was Dennis O’Leary, the physician dean for clinical affairs, as the preferred spokesman. To the White House, O’Leary was a total unknown, but a review of his credentials would hardly have been reassuring. He had originally been recruited to George Washington University as a blood specialist. Reticent by nature, he had minimal public-relations and public-speaking experience, save two years as a member of his hometown high school debate team. He had no surgical or trauma training or experience. But beggars can’t be choosers, as the saying goes. Kindly stated, O’Leary was probably the least bad choice to serve as White House/hospital spokesman to inform the world of the status of the wounded President Reagan, special agent Tim McCarthy, and press secretary Jim Brady. Yet, with a little bit of luck, it might all work out. And it did.

*Contemporary Topics in Graduate Medical Education* Stanislaw P. Stawicki,Michael S. Firstenberg,James P. Orlando,Thomas Papadimos,2022-10-26 Graduate medical education (GME) continues its decades-long evolution. Evidence-based approaches are increasingly transforming the way we educate, evaluate, and promote GME trainees. Key to this transformation is our ability to recognize that “medical education” constitutes a true lifelong continuum, beginning with pre-medical education, then proceeding to medical school, residency (and potentially subsequent fellowship) training, and then finally the so-called maintenance of certification that continues throughout one’s entire professional career. This book explores a broad range of important topics, including the novel concept of “coping intelligence,” the important role of “work-life integration,” professional coaching and mentorship, professional development and career-long learning, patient-provider relationship, the impact of the COVID-19 pandemic on medical education, as well as the introduction of modern technologies

to ameliorate the effects of social distancing. The book further discusses two important aspects of GME program management: the process of establishing new GME programs as well as the highly intricate process of merging residency programs. Different aspects and perspectives are incorporated, including those of residents, faculty, and program leadership. The book ends with chapters on diversity, equity and inclusion, and the importance of community-based medical education.

**Constructing Economic Science** Keith Tribe, 2021-11-26 An accessible account of the role of the modern university in the creation of economics During the late nineteenth century concerns about international commercial rivalry were often expressed in terms of national provision for training and education, and the role of universities in such provision. It was in this context that the modern university discipline of economics emerged. The first undergraduate economics program was inaugurated in Cambridge in 1903; but this was merely a starting point. Constructing Economic Science charts the path through commercial education to the discipline of economics and the creation of an economics curriculum that could then be replicated around the world. Rather than describing this transition epistemologically, as a process of theoretical creation, Keith Tribe shows how the new science of economics was primarily an institutional creation of the modern university. He demonstrates how finance, student numbers, curricula, teaching, new media, the demands of employment, and more broadly, the international perception that industrializing economies required a technically-skilled workforce, all played their part in shaping economics as we know it today. This study explains the conditions originally shaping the science of economics, providing in turn a foundation for an understanding of the way in which this new language transformed public policy.

**When Texas Prison Scams Religion** Michael G. Maness, 2023-05-22 When Texas Prison Scams Religion exposes corruption in the Texas Department of Criminal Justice, especially in the abuse of religion. In many ways, this book is a literature review of 1,800-plus works that defends freedom of conscience in prison while exposing the unconstitutionality of the seminary program that “buys faith with favor” from prisoners. The state veritably ordains the prisoner a “Field Minister” that represents the offices of the Governor, TDCJ Director, and wardens throughout the prison. Therein, TDCJ lies about neutrality in a program all about Christian missions and lies again in falsely certifying elementary Bible students as counselors. Why is the director sponsoring psychopaths counseling psychopaths? In fact, TDCJ pays \$314 million a year to UTMB for psychiatric care and receives not a single report of the care given, and worse, for UTMB generates no reports itself. The underbelly TDCJ’s executive culture of cover up is exposed. TDCJ has hired the lowest qualified of the applicant pool many times in the last 25 years and regularly destroys statistics on violence. TDCJ Dir. Collier led the prison to model Louisiana Warden Burl Cain, the most scandal-ridden in penal history according to a host of published news stories for 20 years. Therein, Collier led TDCJ to favor the smallest segment of religious society within Evangelical Dominionism. Texas has no business endorsing the truth of any religion over another. We close with a proposal that utilizes the 400,000,000 hours of officer contact over ten years as a definitive influence in contrast to a commissioner that spends less than 10 minutes on each

decision. Maness has been lobbying Austin for 15 years to definitively access staff for his “100,000 Mothers’ 1% Certainty Parole Texas Constitutional Amendment,” which would revolutionize prison culture and save Texans millions of the dollars.

**The Routledge Handbook of Landscape Architecture Education** Diedrich Bruns, Stefanie Hennecke, 2022-11-15 In this handbook, 60 authors, senior and junior educators, and researchers from six continents provide an overview of 200 years of landscape architectural education. They tell the stories of schools and people, of visions, and of experiments that constitute landscape architecture education heritage. Through taking an international perspective, the handbook centers inclusivity with an appreciation for how education develops in different political and societal contexts. Part I introduces the field of education history research, including research approaches and international research exchange. Spanning more than 100 years, Parts II and III investigate and compare early and recent histories of landscape architecture education in different countries and schools. In Part IV, the book offers new perspectives for landscape architecture education. Education research presents a substantial opportunity for challenging studies to increase the pedagogic and didactic, the academic and historic, and the disciplinary knowledge basis. Through a boundary-crossing approach, these studies about landscape architecture education provide a reference to teachers and students, policymakers, and administrators, who strive for innovative, holistic, and interdisciplinary practice.
