Dublin Zoo Catherine De Courcy, 2009 As Dublin Zoo makes the transition from bars and cages to state-of-the-art animal habitats it is appropriate to record its story so far. Beginning in 1831, stories of animals and visitors are interwoven to record magical moments as visitors experienced the smells, sounds, behaviors, and magic of exotic animals. The mixed fortunes of the zoo are traced as it survived the famine years, political trouble, economic hardship, and public discomfort with wild animals kept in cages.

Timelines of Nearly Everything Manjunath.R, 2021-07-03 This book takes readers back and forth through time and makes the past accessible to all families, students and the general reader and is an unprecedented collection of a list of events in chronological order and a wealth of informative knowledge about the rise and fall of empires, major scientific breakthroughs, groundbreaking inventions, and monumental moments about everything that has ever happened.

Decent Work and Economic Growth Walter Leal Filho, Anabela Marisa Azul, Luciana Brandli, Amanda Lange Salvia, Tony Wall, 2020-10-20 The problems related to the process of industrialisation such as biodiversity depletion, climate change and a worsening of health and living conditions, especially but not only in developing countries, intensify. Therefore, there is an increasing need to search for integrated solutions to make development more sustainable. The United Nations has acknowledged the problem and approved the “2030 Agenda for Sustainable Development”. On 1st January 2016, the 17 Sustainable Development Goals (SDGs) of the Agenda officially came into force. These goals cover the three dimensions of sustainable development: economic growth, social inclusion and environmental protection. The Encyclopedia of the UN Sustainable Development Goals comprehensively addresses the SDGs in an integrated way. The Encyclopedia encompasses 17 volumes, each one devoted to one of the 17 SDGs. This volume addresses SDG 8, namely Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all and contains the description of a range of terms, to allow a better understanding and foster knowledge. The predominant economic model is promoting a lopsided economic growth that is further increasing the gap between the have and the have-nots. This SDG is not just proposing the

attainment of more just and empowering economic models, but it also puts at the forefront the well-being of workers by striving to provide employment and better working conditions that respect the dignity of workers. Concretely, the defined targets are: Sustain per capita economic growth in accordance with national circumstances and, in particular, at least 7 per cent gross domestic product growth per annum in the least developed countries Achieve higher levels of economic productivity through diversification, technological upgrading and innovation, including through a focus on high-value added and labour-intensive sectors Promote development-oriented policies that support productive activities, decent job creation, entrepreneurship, creativity and innovation, and encourage the formalization and growth of micro-, small- and medium-sized enterprises, including through access to financial services Improve progressively, through 2030, global resource efficiency in consumption and production and endeavour to decouple economic growth from environmental degradation, in accordance with the 10-Year Framework of Programmes on Sustainable Consumption and Production, with developed countries taking the lead Achieve full and productive employment and decent work for all women and men, including for young people and persons with disabilities, and equal pay for work of equal value Substantially reduce the proportion of youth not in employment, education or training Take immediate and effective measures to eradicate forced labour, end modern slavery and human trafficking and secure the prohibition and elimination of the worst forms of child labour, including recruitment and use of child soldiers, and end child labour in all its forms Protect labour rights and promote safe and secure working environments for all workers, including migrant workers, in particular women migrants, and those in precarious employment Devise and implement policies to promote sustainable tourism that creates jobs and promotes local culture and products Strengthen the capacity of domestic financial institutions to encourage and expand access to banking, insurance and financial services for all Increase Aid for Trade support for developing countries, in particular least developed countries, including through the Enhanced Integrated Framework for Trade-related Technical Assistance to Least Developed Countries Develop and operationalize a global strategy for youth employment and implement the Global Jobs Pact of the International Labour Organization Editorial Board Rimjhim M Aggarwal, Rosa Maria Fernandez, Edurne A. Wastewater Reuse and Watershed Management Ajai Singh, 2019-06-26 Water is a finite resource, and the demand for clean water is constantly growing. Clean freshwater is needed to meet irrigation demands for agriculture, for consumption, and for industrial uses. The world produces billions of tons of wastewater every year. This volume looks at a multitude of ways to capture, treat, and reuse wastewater and how to effectively manage watersheds. It presents a selection of new technologies and methods to recycle, reclaim, and reuse water for agricultural, industrial, and environmental purposes. The editor states that more than 75-80% of the wastewater we produce goes back to nature without being properly treated, leading to pollution and all sorts of negative health and productivity consequences. Topics cover a wide selection of research, including molluscs as a tool for river health assessment, flood risk modeling, biological removal of toxins from groundwater, saline water intrusion into coastal areas, urban drainage simulations, rainwater harvesting, irrigation topics, and more. Key features: • explores the existing methodologies in the field of reuse of wastewater • looks at different approaches in integrated water resources management • examines the issues of groundwater management and development • discusses saline water intrusion in coastal areas • presents various watershed management approaches • includes case studies and analyses of various water management efforts

The Salukis in My Life Terence Clark, Alan Munro, 2018-03-06 Sir Terence Clark's Salukis: Here, There and Everywhere is part-memoir, part-travelogue, and explores, in lively and unprecedented detail, the history and significance of the Saluki across the world. Indigenous to the Arabian peninsula, the desert-bred Saluki has for centuries been revered, and remains as highly valued today for its elegance and intelligence. Sir Terence's own life and work have been profoundly influenced by this ancient breed. His commitment to the study, enjoyment and preservation of these 'Companions of Kings' has taken him far and wide and introduced him to extraordinary people and places: in Iraq and Oman (where he was British Ambassador), throughout the Middle East and across Syria, into Central Asia, China and Russia. Beautifully illustrated with personal photographs, artwork and calligraphy, this book interweaves Sir Terence's fascinating life story with the history of the breed throughout the region. His passion for Salukis is infectious - whether for hunting, showing, coursing, breeding or simply companionship, the reader cannot help but share the love.

Brunel's Ships Denis Griffiths, Fred M. Walker, Andrew D. Lambert, 1999 Isambard Kingdom Brunel created a number of quite revolutionary steamships - the Great Western which was the first practical transatlantic paddle-steamer; the Great Britain, the first iron-built screw-driven liner; and the monster Great Eastern which remained the largest ship in the world for

almost half a century. Besides these well-known wonders of the maritime world, Brunel also worked with the Admiralty on the introduction of the screw propeller into naval service.

A to Z of Sport Trevor Montague,2004 THE A TO Z OF SPORT is unique: nothing as comprehensive has ever appeared before. It covers more than one hundred sports, with the treatment of some of the nation's favourites, such as football, rugby, cricket and athletics, almost meriting books in themselves. The sports covered include everything you can think of: from football to fencing, cricket to croquet, motor racing to marbles, all the way from adventure racing to wrestling - no sport is too big or small for inclusion. There is an introductory essay for each sport, explaining its history and rules. These are followed by the most comprehensive lists of tournaments, champions, cups, venues and participants ever assembled. And there are further sections on Sportspeople, the Television Sports Personality of the Year, Trophies, Sporting Quotations and Sporting Current Affairs. From remarkable facts to argument-settling information, the A TO Z OF SPORT is the indispensable reference book for every sports fan.
